Version: OEL250S-O54-A00

Table of Contents

Chapter 1	
WHAT IS LINUX?	1
UNIX Origins and Design Principles	2
Unix Timeline	4
FSF and GNU	6
GPL – General Public License	7
The Linux Kernel	8
Linux Features	9
Popular Uses of Linux	10
What is a Distribution?	11
Components of a Distribution	12
Standardization	13
Oracle Linux	14
Unbreakable Enterprise Kernel	15
Unbreakable Linux Network	16
Chapter 2	
LINUX ARCHITECTURE OVERVIEW	1
The Linux Operating System Components	2
Open Standards	3
Memory Layout	4
Important Kernel Threads	5
Block Devices and the Device Mapper	6
File Systems with Linux	8
Cache and Write Barriers	10
Device Files in Linux	12
D-Bus Overview	13
Important Userland Daemons	14
Security Model Overview	15
su and Wheel	17
sudo	18
Lab Tasks	19
1. Switching Users With sudo	20
Chapter 3	
PRE-INSTALLATION CONSIDERATIONS	1
Pre-Installation Considerations	2
Hardware Compatibility	3
Multi-OS Booting	4
Partition Considerations	5
Filesystem Planning	6
Selecting a Filesystem	7
Cluster Filesystems	8
Optimal Flexible Architecture (OFA)	9
Chapter 4	
INSTALLING OEL5	1
Installation Choices	2
Starting Installations from CD/DVD or USB	4
Installing From a Network Server	5
Installing From a Local Drive	7

Anaconda	9
Installation Diagnostics	11
Language and Keyboard Selection	12
Automatic Partitioning	14
Partitioning with Disk Druid	16
Installing a Boot Loader	18
Network Configuration	20
Time Zone Configuration	21
root Password Configuration	22
Package Group Selection	23
Installing Packages	25
Install Finished	26
Firstboot	27
Firstboot Firewall Configuration	28
Firstboot SELinux Configuration	29
Firstboot Kernel Crash Dump Configuration	30
Firstboot Date and Time Configuration	31
Firstboot Authentication Configuration	32
Lab Tasks	33
1. Linux Installation	34

Chapter 5

LINUX HARDWARE DISCOVERY, INTERACTION, AND CONTROL	1
Hardware Discovery Tools	2
Configuring New Hardware with Kudzu	4
Hardware and System Clock	5
Console	6
Virtual Terminals	8
Serial Ports	11
SCSI Devices	13
USB Devices	16
USB Configuration	17
Common UNIX Printing System	19
Defining a Printer	20
Managing Optical Media	21
Tape Drives	24
Tape Libraries	25
I/O Elevators	27
Managing Linux Device Files	29
Kernel Hardware Info – /sys/	32
/sys/ Structure	33
udev	34
Kernel Modules	36
Configuring Kernel Components and Modules	38
Handling Module Dependencies	40
Configuring the Kernel via /proc/	41
Lab Tasks	43
1. Adjusting Kernel Options	44
2. Configuring Print Queues	49
3. Introduction to Troubleshooting Labs	52
4. Troubleshooting Practice: Kernel Modules	56

Chapter 6

BOOT PROCESS AND SYSV INIT	1
Booting Linux on PCs	2
GRUB Configuration	3
Kernel Boot Parameters	5
/sbin/init	6
System Init Styles	7
Linux Runlevels	9
/etc/inittab	10
/etc/rc.sysinit	12
Runlevel Implementation	13
System Configuration Files	15
Configuration Utilities	16
Typical SysV Init Script	17
The /etc/rc.local File	19
Managing Daemons	20
Controlling Service Startup	21
Shutdown and Reboot	23
Lab Tasks	24
1. Boot Process	25
2. GRUB Command Line	28
3. Basic GRUB Security	30
4. Managing Services With chkconfig	33
5. Troubleshooting Practice: Boot Process	36

Chapter 7

SOFTWARE MAINTENANCE	1
Managing Software	2
RPM Features	3
RPM Architecture	4
RPM Package Files	5
Working With RPMs	7
Querying and Verifying with rpm	9
Updating the Kernel RPM	10
Managing Software Dependencies	11
Using the YUM command	12
YUM package groups	15
Configuring YUM	17
YUM Repositories	19
Compiling/Installing from Source	20
Manually Installed Shared Libraries	22
Installing Source RPM Packages	23
Lab Tasks	24
1. Managing Software with RPM	25
2. Creating a Custom RPM Repository	28
3. Querying the RPM Database	31
4. Installing Software via RPM & Source and Rebuilding SRPMs	34
5. YUM	37

Chapter 8

USER/GROUP ADMINISTRATION	1
User and Group Concepts	2
User Administration	4
Modifying Accounts	6
Group Administration	8
Password Aging	10
Default User Files	12
Controlling Logins	13
Manual DS Client Configuration	14
system-config-authentication	15
Lab Tasks	17
1. User and Group Administration	18
2. Configure NIS Authentication	20
3. Using LDAP for Centralized User Accounts	23
4. Troubleshooting Practice: Account Management	27

Chapter 9

FILESYSTEM ADMINISTRATION	1
Partitioning Disks with fdisk	2
Partitioning Disks with parted	4
Filesystem Creation	6
Mounting Filesystems	7
Filesystem Maintenance	9
Persistent Block Devices	11
Resizing Filesystems	12
Swap	13
Two Types of Disk Space	15
Determining Disk Usage With df and du	16
Configuring Disk Quotas	18
Setting Quotas	20
Viewing and Monitoring Quotas	21
Filesystem Attributes	22
Backup Software	23
Backup Examples	25
Lab Tasks	26
1. Creating and Managing Filesystems	27
2. Hot Adding Swap	31
3. Setting User Quotas	33
4. Using tar and cpio for Backups	36
5. Using rsync and ssh for Backups	39
6. Using dump and restore for Backups	42
7. Creating ISO Images for Backups	46

Chapter 10

LVM & RAID	1
Logical Volume Management	2
Implementing LVM	3
Creating Logical Volumes	4
Manipulating VGs & LVs	5
Advanced LVM Concepts	7
system-config-lvm	8

RAID Concepts	9
Array Creation with mdadm	11
Software RAID Monitoring	12
Software RAID Control and Display	13
Lab Tasks	14
1. Creating and Managing LVM Volumes	15
2. Creating and Managing a RAID-5 Array	25
Chapter 11	
REMOTE STORAGE ADMINISTRATION	1
Remote Storage Overview	2
Remote Filesystem Protocols	4
Remote Block Device Protocols	6
File Sharing via NFS	8
NFSv4	9
NFS Clients	10
NFS Server Configuration	11
Implementing NFSv4	13
AutoFS	14
AutoFS Configuration	15
Accessing Windows/Samba Shares from Linux	17
SAN Multipathing	19
Multipath Configuration	20
Multipathing Best Practices	22
iSCSI Architecture	24
iSCSI Target Implementations	27
iSCSI Target Configuration (tgt)	28
iSCSI Target LUN Configuration (tgt)	31
iSCSI Target Auth Configuration (tgt)	33
iSCSI Persistent Configuration (tgt)	34
Open-iSCSI Initiator Implementation	36
iSCSI Initiator Discovery	38
iSCSI Initiator Node Administration	40
Mounting iSCSI Targets at Boot	42
iSCSI Multipathing Considerations	43
Lab Tasks	45
1. NFS Server Configuration	46
2. iSCSI Initiator Configuration	49
Chapter 12	
PLUGGABLE AUTHENTICATION MODULE (PAM)	1
PAM Overview	2
PAM Module Types	3
PAM Order of Processing	4
PAM Control Statements	5
PAM Modules	7
pam_unix.so	8
pam_nologin.so	9
pam_limits.so	10
pam_wheel.so	12
pam_xauth.so	13
Lab Tasks	14

1. Restricting superuser access to wheel group membership	15
2. Using pam_nologin to Restrict Logins	17
3. Setting Limits with the pam_limits Modules	20
4. Using pam_limits to Restrict Simultaneous Logins	23

Chapter 13

SECURITY ADMINISTRATION	1
Security Concepts	2
Tightening Default Security	4
Security Advisories	6
File Access Control Lists	7
Manipulating ACLs	8
Viewing ACLs	10
Backing Up ACLs	11
File Creation Permissions with umask	12
User Private Group Scheme	14
SELinux Security Framework	15
SELinux Modes	16
SELinux Commands	17
Choosing an SELinux Policy	18
SELinux Booleans	19
Graphical SELinux Policy Tools	21
Netfilter Concepts	23
Targets	25
Netfilter: Stateful Packet Filter Firewall	27
Using the iptables Command	28
Common match_specs	30
Connection Tracking	32
Lab Tasks	33
1. User Private Groups	34
2. Using Filesystem ACLs	36
3. Exploring SELinux Modes	43
4. SELinux File Contexts	46
5. Securing Services with Netfilter	47

Chapter 14

PROCESS ADMINISTRATION	1
Automating Tasks	2
at/batch	3
cron	5
/etc/cron.*/ Directories	6
anacron	7
Viewing Processes	8
Managing Processes	10
Tuning Process Scheduling	12
Process Accounting	13
Enabling Process Accounting	14
Setting Resource Limits via ulimit	16
Lab Tasks	17
1. Creating and Managing User Cron Jobs	18
2. Adding System cron Jobs	21
3. Using BSD Process Accounting	22

Chapter 15	
BASIC NETWORKING	1
IPv4 Fundamentals	2
TCP/UDP Fundamentals	4
Linux Network Interfaces	6
Ethernet Hardware Tools	7
Configuring Network Interfaces	9
Configuring Routing Tables	10
IP to MAC Address Mapping with ARP	12
Network Configuration with ip Command	13
Starting and Stopping Interfaces	14
NetworkManager	16
DNS Clients	17
DHCP Clients	19
system-config-network{,-cmd}	20
Network Diagnostics	22
Information from netstat	25
Managing Network-Wide Time	26
Continual Time Sync with NTP	28
Configuring NTP Clients	29
Lab Tasks	31
1. Network Discovery	32
2. NTP Client Configuration	34
Chapter 16	
ADVANCED NETWORKING	1
Multiple IP Addresses	2
Enabling IPv6	4
Interface Bonding	6
Interface Bridging	8
802.1q VLANs	10
Tuning Kernel Network Settings	12
Configuring a DHCP server	13
Lab Tasks	15
1. Multiple IP Addresses Per Network Interface	16
2. Configuring IPv6	19
Chapter 17	
THE X WINDOW SYSTEM	1
The X Window System	2
X Modularity	4
X.Org Drivers	5
Configuring X Manually	6
Automatic X Configuration	7
Xorg and Fonts	8
The X Font Server	9
Installing Fonts for Modern Applications	11
Installing Fonts for Legacy Applications	12
The X11 Protocol and Display Names	13
Display Managers and Graphical Login	14
Starting X Apps Automatically	16
X Access Control	18

Remote X Access (historical/insecure approach)	20
Remote X Access (modern/secure approach)	22
XDMCP	24
Remote Graphical Access With VNC and RDP	26
Specialized X Servers	27
Lab Tasks	28
1. Remote X with XDMCP	29
2. Configure X Security	32
3. Configure a VNC Server	36
4. Launching X Apps Automatically	41
5. Secure X	45
6. Troubleshooting Practice: X11	48
Chapter 18	
LOG FILE ADMINISTRATION	1
System Logging	2
/etc/syslog.conf	4
Rsyslog	6
Log Management	7
Log Anomaly Detector	9
Lab Tasks	10
1. Remote Syslog Configuration	11
2. Setting up a Full Debug Logfile	14
Chapter 19	
MONITORING & TROUBLESHOOTING	1
System Status – Memory	2
System Status – I/O	4
System Status – CPU	6
Performance Trending with sar	8
Troubleshooting Basics: The Process	10
Troubleshooting Basics: The Tools	12
strace and ltrace	15
Common Problems	17
Incorrect File Permissions	18
Inability to Boot	19
Typos in Configuration Files	20
Corrupt Filesystems	21
Rescue Environment	22
Lab Tasks	23
1. Recovering Damaged MBR	24
Appendix A	
LINUX FUNDAMENTALS CHEAT SHEETS	1
Help from Commands and Documentation	2
Getting Help with man & info	3
\$MANPATH, whatis and apropos	5
File Ownership	6
File and Directory Permissions	7
Changing File Permissions	8
Switching User Contexts	10
Pico/Nano Interface	11

Pico/Nano Shortcuts	12
Learning vi	14
Basic vi	15
Accessing Remote Shells	17
