## Preface

### **I Introduction to Oracle Database 11g: Implement Streams**

- Objectives I-2
- Course Objectives I-3
- Suggested Schedule I-4
- Oracle University Curriculum Overview I-5
- Oracle Streams Documentation I-6
- Additional Resources I-7
- What Is Oracle Streams? I-8
- Data Replication I-11
- Messaging Infrastructure in the Oracle Database I-13
- AQ Interfaces and Usage I-15
- Summary I-16

### **1 Oracle Streams: Overview**

- Objectives 1-2
- Streams: Overview 1-3
- Capture 1-4
- Logical Change Record 1-5
- Staging and Propagating Messages 1-7
- Applying Messages 1-9
- Combined Capture and Apply 1-11
- Rules 1-12
- Rule-Based Transformations 1-13
- Oracle Streams Database Configuration 1-14
- Recommended Database Parameter Settings 1-15
- Memory Requirements for Streams 1-17
- Configuring Archive Logging 1-18
- Database Storage 1-19
- Streams Administrator 1-20
- Managing Streams Administrators 1-22
- Supplemental Logging in a Streams Environment 1-23
- Database Supplemental Logging 1-25
- Table Supplemental Logging 1-27
- Determining Enabled Supplemental Logging Methods 1-29

- Configuring Communication Between Databases 1-31
- Identifying Streams Processes 1-33
- Configuring Multiple Streams Sites 1-34
- Hub-and-Spoke Configuration 1-35
- N-Way Multi-Master Replication 1-36
- Quiz 1-38
- Summary 1-39
- Practice 1 Overview: Configuring Oracle Streams Prerequisite Tasks 1-40

## **2 Configuring Simple Streams Replication**

- Objectives 2-2
- Replication Configuration Steps: Overview 2-3
- Ways to Set Up Oracle Streams 2-5
- Configuration Procedures: Overview 2-6
- Configuration Decisions 2-8
- Using the MAINTAIN\_\* Procedures: Example Configurations 2-10
- Prerequisite Steps 2-12
- Instantiation 2-13
- Instantiation Options 2-14
- Simple Streams Configuration Using Enterprise Manager 2-16
- Streams Replication Setup Wizard 2-18
- Simple Streams Configuration Example: Table Replication 2-19
- Replicating a Single Tablespace 2-21
- Replicating a Set of Tablespaces 2-23
- Replicating an Entire Database 2-25
- Replicating Schemas 2-27
- Replicating Tables 2-29
- Troubleshooting the Configuration Procedures 2-31
- Viewing the Configuration Progress 2-33
- Removing all Streams Components 2-35
- Removing an Oracle Streams Queue 2-37
- Quiz 2-38
- Summary 2-39
- Practice 2 Overview: Configuring Replication Between Two Databases 2-40
- Configured in Practice 2-1: One-directional Table Replication 2-41
- Configured in Practice 2-2: Bi-directional Schema Replication 2-42

## **3 Customizing Streams with Rules**

- Objectives 3-2
- Using Rules in Oracle Streams 3-3
- Generating System-Created Rules 3-6

- System-Created Rule: Example 3-8
- System-Created Rule Components 3-10
- Using Subset Rules with Oracle Streams 3-11
- Creating Subset Rules 3-12
- Row Subsetting 3-14
- Customizing System-Created Rules 3-15
- Negative Rule Sets 3-16
- Negative Rule Sets: Example 3-17
- Rule Evaluation with Rule Sets 3-18
- Creating Rules in a Negative Rule Set 3-20
- Monitoring System-Created Rules 3-21
- Monitoring Negative Rule Sets 3-22
- Managing Streams Process Rule Sets 3-24
- Adding New Rules: Example 3-26
- Adding a Table Rule: Example 3-27
- Dropping Rule Sets 3-28
- Managing Rule Sets Using Enterprise Manager 3-29
- Managing Rules Using Enterprise Manager 3-30
- Quiz 3-32
- Summary 3-33
- Practice 3-1 Overview: Adding a Rule to the Negative Rule Set 3-34
- Practice 3-2 Overview: Adding Schema Level Rules 3-35

#### **4 Capture Process Concepts and Configuration**

- Objectives 4-2
- Capture 4-3
- Redo-Based Capture 4-5
- Capture Process: Components 4-6
- Identifying Changes to Capture 4-7
- Data Types Captured 4-9
- Streams Support for Transparent Data Encryption 4-11
- Wallet Management 4-12
- Types of DML Changes Captured 4-13
- Types of DDL Captured 4-15
- Commands That Are Not Captured 4-16
- DDL That Is Not Supported 4-18
- Viewing Objects That Are Not Supported by Capture 4-19
- Limiting Captured Messages 4-21
- Streams Tags 4-22
- Altering the Value of Streams Tags 4-24
- Capture Process Architecture 4-25

Verifying the Use of CCA 4-26  
Which Capture Processes Use CCA? 4-27  
Quiz 4-28  
Creating the Capture Process 4-29  
Creating the Streams Queue 4-31  
Creating the Capture Process 4-32  
Detailed Capture Management 4-36  
Manually Creating the Capture Process 4-37  
Setting Capture Process Parameters 4-38  
Capture Process Parameters 4-39  
Starting the Capture Process 4-41  
Modifying the Capture Process 4-42  
Specifying Extra Attributes for Capture 4-45  
Stopping and Dropping the Capture Process 4-46  
Monitoring Capture Processes 4-47  
Managing the Capture Process in Enterprise Manager 4-49  
Quiz 4-51  
Summary 4-52  
Practice 4 Overview: Configuring the Capture Process 4-53  
Result of Practice 4: Configuring the Capture Process 4-54

## **5 Instantiation**

Objectives 5-2  
What Is Instantiation? 5-3  
Performing Instantiation 5-4  
Preparing for Instantiation 5-5  
Instantiation SCN 5-7  
Setting the Instantiation SCN 5-8  
Setting the Instantiation SCN Manually 5-9  
Instantiation Using Data Pump 5-12  
Viewing Information About Instantiation 5-14  
Verifying Instantiations at an Apply Site 5-15  
Removing Instantiation Information 5-16  
Quiz 5-17  
Summary 5-18  
Practice 5 Overview: Instantiating Tables 5-19  
Result of Practices 4 and 5: Instantiating Tables 5-20

## **6 Propagation Concepts and Configuration**

Objectives 6-2  
What Is Propagation? 6-3

- Directed Networks 6-4
- Queue Forwarding 6-5
- Apply Forwarding 6-6
- How Does Propagation Work? 6-7
- Queue-to-Queue Propagation 6-8
- Guaranteed Message Delivery 6-10
- Creating a Propagation 6-11
- Creating a Propagation: Example 6-12
- Queue-to-Queue Propagation and Real Application Clusters 6-14
- Manually Creating a Propagation 6-16
- Propagation Jobs 6-17
- Verifying the Use of CCA 6-20
- Which Propagation Processes Use CCA? 6-21
- Propagation Rules 6-22
- Managing Propagation Rules 6-24
- Managing Propagation Rules: Example 6-25
- Managing Propagations 6-27
- Monitoring Propagation 6-28
- Managing Propagation in Enterprise Manager 6-30
- Quiz 6-32
- Summary 6-33
- Practice 6 Overview: Configuring Propagation 6-34
- Result of Practices 4, 5, and 6: Configuring Propagation 6-35

## **7 Apply Concepts and Configuration**

- Objectives 7-2
- What Is Apply? 7-3
- Processing Streams Messages 7-4
- Applying DDL Messages 7-5
- Other Considerations for Applying DDL 7-6
- DDL Messages That Are Not Applied 7-7
- Applying Messages 7-8
- Error Queue 7-9
- Required Apply User Privileges 7-11
- Configuring Apply Processes 7-13
- Apply Process Components 7-14
- Apply Rules 7-15
- Enqueue Destination During Apply 7-16
- Execution Directives During Apply 7-18
- Apply Process and Column Discrepancies 7-20
- Data Types Converted Automatically During Apply 7-22

- Column Dependencies 7-23
- Virtual Dependency: Definition 7-24
- Dependency Types 7-26
- Defining Dependencies 7-27
- Creating an Apply Process 7-29
- Modifying the Apply Process 7-32
- Apply Process Parameters 7-33
- Managing Apply Processes 7-36
- Querying the Data Dictionary 7-38
- Managing the Apply Process in Enterprise Manager 7-40
- Checking the Apply Process 7-42
- Quiz 7-43
- Summary 7-45
- Practice 7 Overview: Creating an Apply Process 7-46
- Result of Practices 4, 5, 6, and 7: Configuring Apply 7-48

## **8 Transformations**

- Objectives 8-2
- Rule-Based Transformations 8-3
- Rule-Based Transformations: Example 8-5
- Rule-Based Transformations and Capture 8-6
- Rule-Based Transformations and Propagation 8-7
- Rule-Based Transformations and Apply 8-8
- Declarative LCR Transformations 8-9
- Using Declarative Transformations 8-10
- KEEP\_COLUMNS Declarative Transformation 8-12
- Custom Rule-Based Transformations 8-13
- Implementing Custom Rule-Based Transformations 8-14
- Modifying an LCR 8-15
- Modifying an LCR: Example 8-17
- Using LCR Extra Attributes 8-18
- Creating a Custom Rule-Based Transformation 8-19
- Custom Transformation Function: Example 8-20
- Creating a Custom Rule-Based Transformation 8-21
- One-to-Many Transformation Function: Example 8-22
- Viewing Rule-Based Transformations 8-23
- Managing Custom Rule-Based Transformations 8-25
- Managing Message Transformations 8-27
- Quiz 8-28
- Summary 8-29
- Practice 8 Overview: Implementing a Transformation 8-30

Result of Practice 8: Implementing a Transformation 8-31

## **9 Apply Handlers**

Objectives 9-2

Apply 9-3

Message Processing 9-4

Apply Handlers 9-5

Apply Handlers for LCR Messages 9-6

Creating an Apply Handler Procedure 9-7

Procedural DML Handler: Example 9-8

Implementing a Procedural DML Handler 9-10

Statement DML Handler Type 9-11

Creating Statement DML Handlers 9-12

Statement DML Handler Procedures 9-13

Single Statement DML Handler: Example 9-14

Viewing Statement Handler Information 9-16

Recording Table Changes 9-18

Viewing Change Table Handler Information 9-19

DDL Handler: Example 9-21

Implementing a DDL Handler 9-22

Precommit Handler 9-23

Precommit Handler: Example 9-24

Implementing a Precommit Handler 9-25

Error Handler 9-27

Default Apply with Error Handler 9-28

Example of Error Handler 9-29

Implementing an Error Handler 9-32

Restrictions for Apply Handler Procedures 9-33

Customizing Apply Handler Actions 9-34

LOB Assembly 9-36

Implementing LOB Assembly 9-37

Managing Apply Handlers 9-39

Viewing Apply Handler Information 9-40

Managing Apply Handlers in Enterprise Manager 9-41

Quiz 9-42

Summary 9-43

Practice 9-1 Overview: Creating and Configuring an Apply Handler 9-44

Practice 9-2 Overview: Maintaining Table Changes 9-45

## **10 Configuring Downstream Capture**

- Objectives 10-2
- Downstream Capture 10-3
- Prerequisites for Downstream Capture 10-5
- Configuring Log Transport Services 10-7
- Configuring Log Transport Services at the Source Database 10-8
- Configuring Downstream Initialization at the Destination Database 10-9
- Configuring Standby Logs at the Destination Database 10-10
- Creating a Downstream Capture Process with a Database Link 10-11
- Creating a Downstream Capture Process Without a Database Link 10-13
- Creating Downstream Processes with the `MAINTAIN` Procedure 10-15
- Real-Time Downstream Capture 10-16
- Monitoring Downstream Capture Processes 10-17
- Monitoring Log File Availability 10-18
- Quiz 10-19
- Summary 10-21
- Practice 10 Overview: Configuring Real-Time Downstream Capture 10-22
- Result of Practice 10: Real-Time Downstream Capture 10-23

## **11 Implementing Synchronous Capture**

- Objectives 11-2
- When to Use Synchronous Capture 11-3
- Synchronous Capture 11-4
- Captured Data Types 11-6
- Captured Changes 11-8
- Configuring Synchronous Capture 11-10
- Configuring Oracle Streams for Synchronous Capture 11-11
- Setting Up Queues for Synchronous Capture 11-12
- Creating the Propagation 11-13
- Synchronous Capture Rules 11-14
- Creating an Apply Process for Synchronous Capture 11-16
- Configuring a Synchronous Capture by Using the `DBMS_STREAMS_ADM` Package 11-17
- Configuring a Synchronous Capture by Using the `DBMS_CAPTURE_ADM` Package 11-19
- Setting the Capture User for a Synchronous Capture 11-21
- Configuring a Synchronous Capture 11-22
- Managing and Monitoring Synchronous Capture 11-23
- Displaying the Tables for Which Synchronous Capture Captures Changes 11-24
- Viewing the Extra Attributes Captured by Synchronous Capture 11-26

Displaying the Queue and Rule Set of Each Synchronous Capture 11-28  
Dropping a Synchronous Capture 11-29  
Listing Objects That Are Not Compatible with Synchronous Capture 11-30  
Quiz 11-32  
Summary 11-34  
Practice 11 Overview: Configuring Synchronous Capture 11-35  
Practice Results: Configuring Synchronous Capture 11-36

## **12 Extending the Oracle Streams Environment**

Objectives 12-2  
Extending the Replication Environment 12-3  
Automatic Extension of Oracle Streams: Adding New Shared Objects 12-4  
Prerequisites for Adding Multiple Components in a Single Procedure 12-5  
Adding a Table to a Single or Multiple-Source System 12-6  
Adding Objects to a Multiple-Source System 12-8  
Adding a New Destination 12-9  
Adding a New Destination to a Single-Source System 12-10  
Adding a New Database to a Multiple-Source Streams Environment 12-12  
Adding a New Database to a Multiple-Source System 12-13  
Final Configuration for a Populated Database 12-16  
Final Configuration for an Import Database 12-17  
Quiz 12-19  
Using Streams API for Rolling Database Upgrades or Migrations 12-21  
Preinstantiation Steps for Rolling Upgrade 12-23  
EXCLUDE\_FLAGS Parameter 12-25  
Extended Data Type Support 12-27  
Postinstantiation Steps at Capture Database 12-28  
Removing Preinstantiation and Postinstantiation: Cleanup Procedure 12-29  
Creating a New Streams Site by Using RMAN 12-31  
RMAN Database Duplication Techniques 12-32  
Creating a New Streams Site by Using the RMAN DUPLICATE Command 12-35  
Quiz 12-40  
Summary 12-41  
Practice 12-1 Overview: Configuring and Extending Your Schema Replication 12-42  
Practice 12-2 Overview: Using Generated Scripts to Extend Your Streams  
Environment 12-43

## **13 Configuring and Using XStream**

Objectives 13-2  
Heterogeneous Data Sharing Using Oracle Streams 13-3  
What Is XStream? 13-4

XStream Architecture 13-5  
XStream Out: Overview 13-6  
XStream In: Overview 13-8  
Position Order in an LCR Stream 13-9  
XStream Out: LCR Position 13-10  
XStream In: LCR Position 13-11  
Example: XStream Out Feeding XStream In 13-12  
Outbound Server Configuration Procedures 13-13  
Configuring the Outbound Server 13-15  
Example: Create Outbound Server 13-16  
Configuring the Inbound Server 13-17  
Example: Create Inbound Server 13-18  
Example: Client Application 13-19  
Example: XStream in Action 13-21  
Monitoring XStream Apply Process Information 13-22  
Monitoring: XStream Out General Information 13-23  
Monitoring: XStream Out Low Position Information 13-24  
Monitoring: XStream In General Information 13-25  
Monitoring: XStream In Low Position Information 13-26  
Monitoring XStream Rules 13-27  
Quiz 13-29  
Summary 13-32  
Practice 13 Overview: Configuring and Using XStream 13-33

## **14 Splitting and Merging of Streams Destinations**

Objectives 14-2  
When to Think About Split and Merge 14-3  
A Sample Configuration: Hub with Three Spokes 14-4  
Splitting and Merging of Streams 14-5  
Splitting of Streams 14-7  
Splitting and Merging of Streams in a CCA and Non-CCA Configuration 14-8  
Automatic Split and Merge Functionality 14-9  
New Data Dictionary Views 14-10  
Manual Splitting of Streams 14-11  
DBMS\_STREAMS\_ADM.SPLIT\_STREAMS Method 14-12  
Returning to Original Configuration 14-14  
Merging Streams 14-15  
DBMS\_STREAMS\_ADM.MERGE\_STREAMS Method 14-16  
Using the MERGE\_STREAMS\_JOB Procedure 14-18  
Quiz 14-19

Summary 14-21  
Practice 15 Overview: Splitting and Merging Streams 14-22

## **15 Avoiding Data Conflicts**

Objectives 15-2  
What Is a Replication Conflict? 15-3  
Conflict Example: Reservation System 15-4  
Error Queue 15-5  
Types of Data Conflicts 15-6  
Identifying Rows in Conflict 15-8  
Specifying Substitute Key Columns 15-9  
Detecting Conflicts 15-10  
Data Consistency and Convergence 15-11  
Conflict Avoidance and Resolution Foundation 15-13  
Conflict Resolution Responsibilities 15-14  
Avoiding Conflicts by Assigning Data Ownership 15-15  
Primary Site Ownership 15-16  
Dynamic Site Ownership: Workflow Method 15-17  
Shared Ownership 15-18  
Avoiding Conflicts: Overview 15-19  
Avoiding Uniqueness Conflicts 15-20  
Avoiding Delete Conflicts 15-21  
Suppressing Conflict Detection 15-22  
Cascading Delete Operations 15-24  
Quiz 15-25  
Summary 15-27  
Practice 15 Overview: Managing Data Conflicts 15-28  
Result of Practice 15: Detecting a Data Conflict 15-29

## **16 Resolving Data Conflicts**

Objectives 16-2  
Conflict Resolution 16-3  
Prebuilt Conflict Handlers 16-4  
Resolution Columns 16-6  
Column Lists 16-7  
Planning Column Lists 16-9  
Specifying Column Lists 16-11  
Configuring Supplemental Logging 16-12  
Resolving Conflicts with Prebuilt Update Conflict Handlers 16-13  
Resolving Conflicts with Custom Conflict Handlers 16-14  
Configuring Conflict Resolution 16-16

- Configuring Conflict Resolution: Example 16-17
- Viewing Apply Errors 16-18
- Viewing Error Transaction Information 16-19
- Printing Values from a `SYS.AnyData` Type 16-20
- Printing an LCR 16-22
- Managing Errors 16-24
- Using Procedures to Execute LCRs 16-26
- Viewing Conflict Resolution Information 16-28
- Quiz 16-29
- Summary 16-31
- Practice 16 Overview: Implementing a Conflict Handler 16-32
- Result of Practice 16: Implementing a Conflict Handler 16-33

## **17 Comparing and Converging Data**

- Objectives 17-2
- Comparing Table Data 17-3
- Performing Comparisons 17-5
- Creating a Comparison 17-7
- Performing a Comparison 17-10
- Viewing the Differences in Data 17-11
- Identifying the Rows That Differ 17-12
- Using the `CONVERGE` Procedure 17-14
- Converging Database Objects 17-16
- Converging a Shared Database Object with a Session Tag Set 17-18
- Comparing a Subset of Columns 17-20
- Comparing Without Identifying Rows 17-22
- Comparing a Random Portion 17-23
- Rechecking the Results for a Comparison 17-25
- Viewing Comparison Results 17-26
- Purging Comparison Results 17-28
- Dropping a Comparison 17-30
- Quiz 17-31
- Summary 17-32
- Practice 17 Overview: Comparing Data 17-33
- Demonstration Result: Comparing Data 17-34

## **18 Best Practices and Operational Considerations**

- Objectives 18-2
- Best Practices for Streams Database Configuration 18-3
- Archive Logging 18-5
- Sharing LogMiner Data Dictionaries 18-7

Purging the LogMiner Data Dictionary	18-9
Altering FIRST_SCN for a Capture Process	18-10
Removing Unnecessary Archived Log Files	18-11
Best Practices for Streams Database Operation	18-12
Best Practices for Captured Messages	18-13
Source Queue Growth	18-14
NOLOGGING Operations	18-15
Clock Synchronization	18-16
Integrating Triggers with Streams	18-17
SET_FIRING_PROPERTY Procedure	18-18
Firing Property of Triggers	18-19
Best Practices for Rules	18-20
Replicating DDL LCRs	18-22
Best Practices for Performing Backups of Your Streams Environment	18-23
Recovery Issues	18-25
Replicating Files	18-27
Combined Capture and Apply Requirements	18-28
What Is Possible and What Is Not Possible	18-29
How to Use Combined Capture and Apply	18-30
CCA and Point-In-Time Recovery	18-31
Upgrading Streams to Oracle Database 11g	18-32
Quiz	18-34
Summary	18-36

## **19 Monitoring Oracle Streams**

Objectives	19-2
Monitoring Tools	19-3
Managing Oracle Streams with Oracle Enterprise Manager	19-4
Monitoring Oracle Streams with Oracle Enterprise Manager	19-5
Monitoring Oracle Streams Activity by Path	19-7
Monitoring Capture Statistics	19-8
Monitoring Propagation Statistics with Enterprise Manager	19-9
Monitoring Apply Statistics	19-10
Message Tracking	19-13
Tracking a Message	19-14
Automated Alerts	19-16
Responding to Automated Alerts in Enterprise Manager	19-17
Checking the Trace Files and Alert Log	19-19
Streams Performance Advisor	19-21
Oracle Streams Performance Advisor	19-22

Viewing Oracle Streams Topology in Enterprise Manager	19-23
Viewing Oracle Streams Topology Information	19-24
Topology Statistics	19-25
Viewing Oracle Streams Topology Statistics	19-27
Viewing Performance Statistics for Oracle Streams Components	19-31
Monitoring with the UTL_SPADV Package	19-32
Reading the UTL_SPADV.SHOW_STATS Output	19-33
Performing a Streams Healthcheck	19-35
Interpreting a Streams Healthcheck	19-36
Quiz	19-37
Summary	19-38
Practice 20-1 Overview: Monitoring Oracle Streams	19-39

## **20 Troubleshooting Oracle Streams**

Objectives	20-2
How to Troubleshoot	20-3
Troubleshooting Capture	20-4
Determining Whether CCA Optimization Is Used	20-5
Capture Process Status	20-7
Determining Message Enqueuing Latency	20-9
Confirming Capture Database Configuration	20-11
Confirming Supplemental Logging	20-13
Checking the Capture Process Rules	20-14
Checking Transformations	20-15
Monitoring Large Transactions	20-16
Troubleshooting Propagation	20-18
Checking Propagation Configuration	20-19
Checking the Propagation Schedule	20-20
Checking the Propagation Rules	20-22
Troubleshooting Apply	20-23
Checking Apply Process State and Configuration	20-24
Is the Apply Process Current?	20-26
Determining the Scope of an Apply Problem	20-28
Checking for Apply Process Rules	20-29
Checking for Custom Apply or Error Handlers	20-30
Checking the Error Queue	20-31
Common Apply Errors	20-33
Quiz	20-34
Summary	20-35
Practice 20 Overview: Troubleshooting Streams	20-36

## **Appendix A: Practices and Solutions**

### **Appendix B: Rules**

- Objectives B-2
- Rules and Rule Sets B-3
- Rule Components B-4
- Rule Condition B-5
- Rule Evaluation Context B-7
- Using Rule Evaluation Contexts B-9
- Rule Action Context B-10
- Rule Action Context: Example B-11
- Rule Evaluation with the Rules Engine B-13
- Manually Evaluating Rules B-15
- Rule Component: Overview B-16
- Creating Rules and Rule Sets B-17
- Creating a Rule Evaluation Context B-18
- Creating a Rule Action Context B-19
- Creating a Rule B-20
- Creating a Rule Set B-21
- Assigning a Rule to a Rule Set B-22
- Rule and Rule Set Privileges B-23
- Granting Rule System Privileges B-24
- Granting Rule Object Privileges B-25
- Rule Evaluation Context Privileges B-26
- Managing Rules and Rule Sets B-27
- Altering a Rule B-28
- Monitoring Rule Components B-29
- Dynamic Views for Monitoring Rules B-30
- Summary B-32

### **Appendix C: Using Oracle Streams AQ**

- Objectives C-2
- Messaging Infrastructure C-3
- Oracle Streams and AQ C-4
- Tasks Related to AQ and Oracle Streams C-5
- Fundamental Concepts: Secure Queues, Queue Users and AQ Agents C-6
- Subscriptions, Recipient Lists and Subscribers C-8
- Messaging Client and Messaging Client User C-10
- Creating Messaging Client Rules C-11
- Enqueuing Messages C-12
- User-Created Messages C-13

User-Enqueued Messages	C-14
Wrapping Message Payloads	C-15
Streams Messages with Object Types	C-16
Streams Messages Containing LCRs	C-17
Queue-to-Queue Propagation	C-18
Dequeuing of User Messages	C-19
Unwrapping Message Payloads	C-21
Message Handlers for User Messages	C-22
Message Handlers	C-23
Using a Message Handler	C-24
Configuring Message Notification	C-25
Supported Notification Types	C-26
Scalable Notifications	C-28
Notification Grouping by Time	C-29
