Contents

1 Introduction

- Course Objectives 1-2
- Organization 1-3
- Agenda 1-4
- What Is Not Included 1-6
- Who Tunes? 1-7
- What Does the DBA Tune? 1-8
- How to Tune 1-10
- Tuning Methodology 1-11
- Effective Tuning Goals 1-13
- General Tuning Session 1-15
- Quiz 1-17
- Summary 1-18

2 Basic Tuning Diagnostics

- Objectives 2-2
- Performance Tuning Diagnostics 2-3
- Performance Tuning Tools 2-4
- Tuning Objectives 2-6
- Top Timed Events 2-7
- DB Time 2-8
- CPU and Wait Time Tuning Dimensions 2-9
- Time Model: Overview 2-10
- Time Model Statistics Hierarchy 2-11
- Time Model Example 2-13
- Quiz 2-14
- Dynamic Performance Views 2-15
- Dynamic Performance Views: Usage Examples 2-16
- Dynamic Performance Views: Considerations 2-17
- Statistic Levels 2-18
- Instance Activity and Wait Event Statistics 2-20
- System Statistic Classes 2-22
- Displaying Statistics 2-23
- Displaying SGA Statistics 2-25
- Wait Events 2-26
- Using the V\$EVENT_NAME View 2-27
- Wait Classes 2-28

- Displaying Wait Event Statistics 2-29
- Commonly Observed Wait Events 2-31
- Using the `v$SESSION_WAIT` View 2-32
- Precision of System Statistics 2-34
- Quiz 2-35
- Using Features of the Packs 2-36
- Accessing the Database Home Page 2-38
- Performance Information on the Database Home Page 2-39
- Viewing the Alert Log 2-41
- Using Alert Log Information as an Aid in Tuning 2-42
- User Trace Files 2-44
- Background Processes Trace Files 2-45
- Quiz 2-46
- Summary 2-47
- Practice 2 Overview: Using Basic Tools 2-48

3 Using Automatic Workload Repository

- Objectives 3-2
- Automatic Workload Repository: Overview 3-3
- Automatic Workload Repository Data 3-4
- Workload Repository 3-5
- Database Control and AWR 3-6
- AWR Snapshot Purging Policy 3-7
- AWR Snapshot Settings 3-8
- Manual AWR Snapshots 3-9
- Managing Snapshots with PL/SQL 3-10
- Generating AWR Reports in EM 3-11
- Generating AWR Reports in SQL*Plus 3-12
- Reading the AWR Report 3-13
- Snapshots and Periods Comparisons 3-14
- Compare Periods: Benefits 3-15
- Compare Periods: Results 3-16
- Compare Periods: Report 3-17
- Compare Periods: Load Profile 3-18
- Compare Periods: Top Events 3-19
- Quiz 3-20
- Summary 3-21
- Practice 3 Overview: Using AWR-Based Tools 3-22

4 Defining Problems

- Objectives 4-2
- Defining the Problem 4-3
- Limit the Scope 4-4
- Setting the Priority 4-5
- Top 5 Timed Events 4-6
- Setting the Priority: Example 4-7
- Top SQL Reports 4-8
- Common Tuning Problems 4-9
- Tuning Life Cycle Phases 4-11
- Tuning During the Life Cycle 4-12
- Application Design and Development 4-13
- Testing: Database Configuration 4-14
- Deployment 4-15
- Production 4-16
- Migration, Upgrade, and Environment Changes 4-17
- ADDM Tuning Session 4-18
- Performance Versus Business Requirements 4-19
- Performance Tuning Resources 4-20
- Filing a Performance Service Request 4-21
- RDA Report 4-22
- Monitoring and Tuning Tool: Overview 4-23
- Quiz 4-25
- Summary 4-26
- Practice 4 Overview: Identifying the Problem 4-27

5 Using Metrics and Alerts

- Objectives 5-2
- Metrics and Alerts 5-3
- Limitation of Base Statistics 5-4
- Typical Delta Tools 5-5
- Oracle Database 11g Solution: Metrics 5-6
- Benefits of Metrics 5-7
- Viewing Metric History Information 5-8
- Using EM to View Metric Details 5-9
- Statistic Histograms 5-10
- Histogram Views 5-11
- Server-Generated Alerts 5-12
- Alert Usage Model 5-13
- Setting Thresholds 5-14
- Creating and Testing an Alert 5-15
- Metric and Alert Views 5-16

Quiz 5-17
 Summary 5-18
 Practice Overview 5: Working with Metrics 5-19

6 Using Baselines

Objectives 6-2
 Comparative Performance Analysis with AWR Baselines 6-3
 Automatic Workload Repository Baselines 6-4
 Moving Window Baseline 6-5
 Baselines in Performance Page Settings 6-6
 Baseline Templates 6-7
 AWR Baselines 6-8
 Creating AWR Baselines 6-9
 Single AWR Baseline 6-10
 Creating a Repeating Baseline Template 6-11
 Managing Baselines with PL/SQL 6-12
 Generating a Baseline Template for a Single Time Period 6-13
 Creating a Repeating Baseline Template 6-14
 Baseline Views 6-15
 Performance Monitoring and Baselines 6-16
 Defining Alert Thresholds Using a Static Baseline 6-18
 Using EM to Quickly Configure Adaptive Thresholds 6-19
 Changing Adaptive Threshold Settings 6-21
 Quiz 6-22
 Summary 6-23
 Practice 6: Overview Using AWR Baselines 6-24

7 Using AWR-Based Tools

Objectives 7-2
 Automatic Maintenance Tasks 7-3
 Maintenance Windows 7-4
 Default Maintenance Plan 7-5
 Automated Maintenance Task Priorities 7-6
 Tuning Automatic Maintenance Tasks 7-7
 ADDM Performance Monitoring 7-8
 ADDM and Database Time 7-9
 DBTime-Graph and ADDM Methodology 7-10
 Top Performance Issues Detected 7-12
 Database Control and ADDM Findings 7-13
 ADDM Analysis Results 7-14
 ADDM Recommendations 7-15

- Database Control and ADDM Task 7-16
- Changing ADDM Attributes 7-17
- Retrieving ADDM Reports by Using SQL 7-18
- Quiz 7-19
- Active Session History: Overview 7-20
- Active Session History: Mechanics 7-21
- ASH Sampling: Example 7-22
- Accessing ASH Data 7-23
- Analyzing the ASH Data 7-24
- Generating ASH Reports 7-25
- ASH Report Script 7-26
- ASH Report: General Section 7-27
- ASH Report Structure 7-28
- ASH Report: Activity Over Time 7-29
- New or Enhanced Automatic Workload Repository Views 7-30
- Quiz 7-31
- Summary 7-32
- Practice 7 Overview: Using AWR-Based Tools 7-33

8 Monitoring Applications

- Objectives 8-2
- What Is a Service? 8-3
- Service Attributes 8-4
- Service Types 8-5
- Creating Services 8-6
- Managing Services in a Single-Instance Environment 8-7
- Where Are Services Used? 8-8
- Using Services with Client Applications 8-9
- Using Services with the Resource Manager 8-10
- Services and Resource Manager with EM 8-11
- Services and the Resource Manager: Example 8-12
- Services and the Scheduler with EM 8-13
- Services and the Scheduler: Example 8-15
- Using Services with Metric Thresholds 8-16
- Changing Service Thresholds by Using EM 8-17
- Services and Metric Thresholds: Example 8-18
- Service Aggregation and Tracing 8-19
- Top Services Performance Page 8-20
- Service Aggregation Configuration 8-21
- Service Aggregation: Example 8-22
- Client Identifier Aggregation and Tracing 8-23

trcsess Utility 8-24
 Service Performance Views 8-25
 Quiz 8-27
 Summary 8-28
 Practice 8 Overview: Using Services 8-29

9 Identifying Problem SQL Statements

Objectives 9-2
 SQL Statement Processing Phases 9-3
 Parse Phase 9-4
 SQL Cursor Storage 9-5
 Cursor Usage and Parsing 9-6
 SQL Statement Processing Phases: Bind 9-8
 SQL Statement Processing Phases: Execute and Fetch 9-9
 Processing a DML Statement 9-10
 COMMIT Processing 9-12
 Role of the Oracle Optimizer 9-13
 Quiz 9-15
 Identifying Bad SQL 9-16
 TOP SQL Reports 9-17
 SQL Monitoring 9-18
 Monitored SQL Executions 9-19
 SQL Monitoring List 9-20
 Monitored SQL Execution Details 9-21
 The SQL Monitoring Report 9-22
 Quiz 9-23
 What Is an Execution Plan? 9-24
 Methods for Viewing Execution Plans 9-25
 Uses of Execution Plans 9-27
 DBMS_XPLAN Package: Overview 9-28
 EXPLAIN PLAN Command 9-30
 EXPLAIN PLAN Command: Example 9-31
 EXPLAIN PLAN Command: Output 9-32
 Reading an Execution Plan 9-33
 Using the V\$SQL_PLAN View 9-34
 V\$SQL_PLAN Columns 9-35
 Querying V\$SQL_PLAN 9-36
 V\$SQL_PLAN_STATISTICS View 9-37
 Querying the AWR 9-38
 SQL*Plus AUTOTRACE 9-40

- Using SQL*Plus AUTOTRACE 9-41
- SQL*Plus AUTOTRACE: Statistics 9-42
- SQL Trace Facility 9-43
- How to Use the SQL Trace Facility 9-45
- Initialization Parameters 9-46
- Enabling SQL Trace 9-48
- Disabling SQL Trace 9-49
- Formatting Your Trace Files 9-50
- TKPROF Command Options 9-51
- Output of the TKPROF Command 9-53
- TKPROF Output with No Index: Example 9-58
- TKPROF Output with Index: Example 9-59
- Generate an Optimizer Trace 9-60
- Quiz 9-61
- Summary 9-62
- Practice Overview 9: Using Execution Plan Utilities 9-63

10 Influencing the Optimizer

- Objectives 10-2
- Functions of the Query Optimizer 10-3
- Selectivity 10-5
- Cardinality and Cost 10-6
- Changing Optimizer Behavior 10-7
- Optimizer Statistics 10-9
- Extended Statistics 10-10
- Optimizer Parameters 10-11
- Controlling the Behavior of the Optimizer with Parameters 10-12
- Enabling Query Optimizer Features 10-14
- Using Hints 10-15
- Influencing the Optimizer Approach 10-16
- Optimizing SQL Statements 10-17
- Quiz 10-18
- Access Paths 10-19
- Choosing an Access Path 10-20
- Full Table Scans 10-21
- Row ID Scans 10-23
- Index Operations 10-24
- B*Tree Index Operations 10-25
- Bitmap Indexes 10-26
- Bitmap Index Access 10-27

- Combining Bitmaps 10-28
- Bitmap Operations 10-29
- Join Operations 10-30
- Join Methods 10-31
- Nested Loop Joins 10-32
- Hash Joins 10-34
- Sort-Merge Joins 10-35
- Join Performance 10-37
- How the Query Optimizer Chooses Execution Plans for Joins 10-38
- Sort Operations 10-40
- Tuning Sort Performance 10-41
- Quiz 10-42
- Summary 10-43
- Practice 10 Overview: Influencing the Optimizer 10-44

11 Reducing the Cost

- Objectives 11-2
- Reducing the Cost 11-3
- Index Maintenance 11-4
- Dropping Indexes 11-6
- Creating Indexes 11-7
- Other Index Options 11-8
- SQL Access Advisor 11-9
- Quiz 11-10
- Table Maintenance for Performance 11-11
- Table Reorganization Methods 11-12
- Space Management 11-14
- Extent Management 11-15
- Locally Managed Extents 11-16
- Large Extents: Considerations 11-17
- How Table Data Is Stored 11-19
- Anatomy of a Database Block 11-20
- Minimize Block Visits 11-21
- The DB_BLOCK_SIZE Parameter 11-22
- Small Block Size: Considerations 11-23
- Large Block Size: Considerations 11-24
- Block Allocation 11-25
- Free Lists 11-26
- Block Space Management 11-27
- Block Space Management with Free Lists 11-28
- Automatic Segment Space Management 11-30

- Automatic Segment Space Management at Work 11-31
- Block Space Management with ASSM 11-33
- Creating an Automatic Segment Space Management Segment 11-34
- Quiz 11-35
- Migration and Chaining 11-36
- Guidelines for PCTFREE and PCTUSED 11-38
- Detecting Migration and Chaining 11-39
- Selecting Migrated Rows 11-40
- Eliminating Migrated Rows 11-41
- Shrinking Segments: Overview 11-43
- Shrinking Segments: Considerations 11-44
- Shrinking Segments by Using SQL 11-45
- Segment Shrink: Basic Execution 11-46
- Segment Shrink: Execution Considerations 11-47
- Using EM to Shrink Segments 11-48
- Table Compression: Overview 11-49
- Table Compression Concepts 11-50
- Compressing Table Data 11-51
- Using Table Compression 11-53
- Using the Compression Advisor 11-54
- Viewing Table Compression Information 11-55
- Quiz 11-56
- Summary 11-57
- Practice 11 Overview: Reducing the Cost 11-58

12 Using SQL Performance Analyzer

- Objectives 12-2
- Real Application Testing: Overview 12-3
- Real Application Testing: Use Cases 12-4
- SQL Performance Analyzer: Process 12-5
- Capturing the SQL Workload 12-7
- Creating a SQL Performance Analyzer Task 12-8
- SQL Performance Analyzer: Tasks 12-9
- Parameter Change 12-10
- SQL Performance Analyzer Task Page 12-12
- Comparison Report 12-13
- Comparison Report SQL Detail 12-14
- Tuning Regressing Statements 12-15
- Tuning Regressed SQL Statements 12-17
- Preventing Regressions 12-18
- Parameter Change Analysis 12-19

Guided Workflow Analysis 12-20
 SQL Performance Analyzer: PL/SQL Example 12-21
 SQL Performance Analyzer: Data Dictionary Views 12-23
 Quiz 12-24
 Summary 12-25
 Practice 12: Overview 12-26

13 SQL Performance Management

Objectives 13-2
 Maintaining SQL Performance 13-3
 Maintaining Optimizer Statistics 13-4
 Automated Maintenance Tasks 13-5
 Statistic Gathering Options 13-6
 Setting Statistic Preferences 13-7
 Restore Statistics 13-9
 Deferred Statistics Publishing: Overview 13-10
 Deferred Statistics Publishing: Example 13-12
 Automatic SQL Tuning: Overview 13-13
 SQL Statement Profiling 13-14
 Plan Tuning Flow and SQL Profile Creation 13-15
 SQL Tuning Loop 13-16
 Using SQL Profiles 13-17
 SQL Tuning Advisor: Overview 13-18
 Using the SQL Tuning Advisor 13-19
 SQL Tuning Advisor Options 13-20
 SQL Tuning Advisor Recommendations 13-21
 Using the SQL Tuning Advisor: Example 13-22
 Alternative Execution Plans 13-23
 Quiz 13-25
 Using the SQL Access Advisor 13-26
 View Recommendations 13-28
 View Recommendation Details 13-29
 SQL Plan Management: Overview 13-30
 SQL Plan Baseline: Architecture 13-31
 Loading SQL Plan Baselines 13-33
 Evolving SQL Plan Baselines 13-34
 Important Baseline SQL Plan Attributes 13-35
 SQL Plan Selection 13-37
 Possible SQL Plan Manageability Scenarios 13-39
 SQL Performance Analyzer and SQL Plan Baseline Scenario 13-40
 Loading a SQL Plan Baseline Automatically 13-41

Purging SQL Management Base Policy	13-42
Enterprise Manager and SQL Plan Baselines	13-43
Quiz	13-44
Summary	13-45
Practice 13: Overview Using SQL Plan Management	13-46

14 Using Database Replay

Objectives	14-2
Using Database Replay	14-3
The Big Picture	14-4
System Architecture: Capture	14-5
System Architecture: Processing the Workload	14-7
System Architecture: Replay	14-8
Capture Considerations	14-9
Replay Considerations: Preparation	14-10
Replay Considerations	14-11
Replay Options	14-12
Replay Analysis	14-13
Database Replay Workflow in Enterprise Manager	14-15
Capturing Workload with Enterprise Manager	14-16
Capture Wizard: Plan Environment	14-17
Capture Wizard: Options	14-18
Capture Wizard: Parameters	14-19
Viewing Capture Progress	14-20
Viewing Capture Report	14-21
Export Capture AWR Data	14-22
Quiz	14-23
Viewing Workload Capture History	14-24
Processing Captured Workload	14-25
Using the Preprocess Captured Workload Wizard	14-26
Using the Replay Workload Wizard	14-27
Replay Workload: Prerequisites	14-28
Replay Workload: Choose Initial Options	14-29
Replay Workload: Customize Options	14-30
Replay Workload: Prepare Replay Clients	14-31
Replay Workload: Wait for Client Connections	14-32
Replay Workload: Replay Started	14-33
Viewing Workload Replay Progress	14-34
Viewing Workload Replay Statistics	14-35
Packages and Procedures	14-37
Data Dictionary Views: Database Replay	14-38

Database Replay: PL/SQL Example 14-39
Calibrating Replay Clients 14-41
Quiz 14-42
Summary 14-43
Practice 14: Overview 14-44

15 Tuning the Shared Pool

Objectives 15-2
Shared Pool Architecture 15-3
Shared Pool Operation 15-4
The Library Cache 15-5
Latch and Mutex 15-7
Latch and Mutex: Views and Statistics 15-9
Diagnostic Tools for Tuning the Shared Pool 15-11
AWR/Statspack Indicators 15-13
Load Profile 15-14
Instance Efficiencies 15-15
Top Timed Events 15-16
Time Model 15-17
Library Cache Activity 15-19
Avoid Hard Parses 15-20
Are Cursors Being Shared? 15-21
Sharing Cursors 15-23
Adaptive Cursor Sharing: Example 15-25
Adaptive Cursor Sharing Views 15-27
Interacting with Adaptive Cursor Sharing 15-28
Reduce the Cost of Soft Parses 15-29
Quiz 15-30
Sizing the Shared Pool 15-31
Shared Pool Advisory 15-32
Shared Pool Advisor 15-34
Avoiding Fragmentation 15-35
Large Memory Requirements 15-36
Tuning the Shared Pool Reserved Space 15-38
Keeping Large Objects 15-40
Data Dictionary Cache 15-42
Dictionary Cache Misses 15-43
SQL Query Result Cache: Overview 15-44
Managing the SQL Query Result Cache 15-45
Using the `RESULT_CACHE` Hint 15-47
Using Table Annotation to Control Result Caching 15-48

Using the DBMS_RESULT_CACHE Package 15-49
 Viewing SQL Result Cache Dictionary Information 15-50
 SQL Query Result Cache: Considerations 15-51
 Quiz 15-52
 Summary 15-53
 Practice Overview 15: Tuning the Shared Pool 15-54

16 Tuning the Buffer Cache

Objectives 16-2
 Oracle Database Architecture 16-3
 Buffer Cache: Highlights 16-4
 Database Buffers 16-5
 Buffer Hash Table for Lookups 16-6
 Working Sets 16-7
 Tuning Goals and Techniques 16-9
 Symptoms 16-11
 Cache Buffer Chains Latch Contention 16-12
 Finding Hot Segments 16-13
 Buffer Busy Waits 16-14
 Buffer Cache Hit Ratio 16-15
 Buffer Cache Hit Ratio Is Not Everything 16-16
 Interpreting Buffer Cache Hit Ratio 16-17
 Read Waits 16-19
 Free Buffer Waits 16-21
 Solutions 16-22
 Sizing the Buffer Cache 16-23
 Buffer Cache Size Parameters 16-24
 Quiz 16-25
 Dynamic Buffer Cache Advisory Parameter 16-26
 Buffer Cache Advisory View 16-27
 Using the V\$DB_CACHE_ADVICE View 16-28
 Using the Buffer Cache Advisory with EM 16-29
 Caching Tables 16-30
 Multiple Buffer Pools 16-31
 Enabling Multiple Buffer Pools 16-33
 Calculating the Hit Ratio for Multiple Pools 16-34
 Multiple Block Sizes 16-36
 Multiple Database Writers 16-37
 Multiple I/O Slaves 16-38
 Use Multiple Writers or I/O Slaves 16-39
 Private Pool for I/O Intensive Operations 16-40

- Automatically Tuned Multiblock Reads 16-41
- DB Smart Flash Cache Overview 16-42
- Using DB Smart Flash Cache 16-43
- DB Smart Flash Cache Architecture Overview 16-44
- Configuring DB Smart Flash Cache 16-45
- Sizing DB Smart Flash Cache 16-46
- Specifying DB Smart Flash Cache for a Table 16-47
- Flushing the Buffer Cache (for Testing Only) 16-48
- Quiz 16-49
- Summary 16-50
- Practice 16: Overview Tuning the Buffer Cache 16-51

17 Tuning PGA and Temporary Space

- Objectives 17-2
- SQL Memory Usage 17-3
- Performance Impact 17-4
- Automatic PGA Memory 17-5
- SQL Memory Manager 17-6
- Configuring Automatic PGA Memory 17-8
- Setting `PGA_AGGREGATE_TARGET` Initially 17-9
- Monitoring SQL Memory Usage 17-10
- Monitoring SQL Memory Usage: Examples 17-12
- Tuning SQL Memory Usage 17-13
- PGA Target Advice Statistics 17-14
- PGA Target Advice Histograms 17-15
- Automatic PGA and Enterprise Manager 17-16
- Automatic PGA and AWR Reports 17-17
- Temporary Tablespace Management: Overview 17-18
- Temporary Tablespace: Best Practice 17-19
- Configuring Temporary Tablespace 17-20
- Temporary Tablespace Group: Overview 17-22
- Temporary Tablespace Group: Benefits 17-23
- Creating Temporary Tablespace Groups 17-24
- Maintaining Temporary Tablespace Groups 17-25
- View Tablespace Groups 17-26
- Monitoring Temporary Tablespace 17-27
- Temporary Tablespace Shrink 17-28
- Tablespace Option for Creating Temporary Table 17-29
- Quiz 17-30

- Summary 17-31

Practice Overview 17: Tuning PGA Memory 17-32

18 Automatic Memory Management

- Objectives 18-2
- Oracle Database Architecture 18-3
- Dynamic SGA 18-4
- Granule 18-5
- Memory Advisories 18-6
- Manually Adding Granules to Components 18-7
- Increasing the Size of an SGA Component 18-8
- Automatic Shared Memory Management: Overview 18-9
- SGA Sizing Parameters: Overview 18-10
- Dynamic SGA Transfer Modes 18-11
- Memory Broker Architecture 18-12
- Manually Resizing Dynamic SGA Parameters 18-13
- Behavior of Auto-Tuned SGA Parameters 18-14
- Behavior of Manually Tuned SGA Parameters 18-15
- Using the `V$PARAMETER` View 18-16
- Resizing `SGA_TARGET` 18-17
- Disabling Automatic Shared Memory Management 18-18
- Configuring ASMM 18-19
- SGA Advisor 18-20
- Monitoring ASMM 18-21
- Automatic Memory Management: Overview 18-22
- Oracle Database Memory Parameters 18-24
- Automatic Memory Parameter Dependency 18-25
- Enabling Automatic Memory Management 18-26
- Monitoring Automatic Memory Management 18-27
- DBCA and Automatic Memory Management 18-29
- Quiz 18-30
- Summary 18-31
- Practice 18: Overview Using Automatic Memory Tuning 18-32

19 Tuning I/O

- Objectives 19-2
- I/O Architecture 19-3
- File System Characteristics 19-4
- I/O Modes 19-5
- Direct I/O 19-6
- Bandwidth Versus Size 19-7
- Important I/O Metrics for Oracle Databases 19-8

- I/O Calibration and Enterprise Manager 19-10
- I/O Calibration and the PL/SQL Interface 19-11
- I/O Statistics: Overview 19-13
- I/O Statistics and Enterprise Manager 19-14
- Stripe and Mirror Everything 19-16
- Using RAID 19-17
- RAID Cost Versus Benefits 19-18
- Should I Use RAID 1 or RAID 5? 19-20
- Diagnostics 19-21
- Database I/O Tuning 19-22
- Quiz 19-23
- What Is Automatic Storage Management? 19-24
- Tuning ASM 19-25
- How Many Disk Groups per Database 19-26
- Which RAID Configuration for Best Availability? 19-27
- ASM Mirroring Guidelines 19-28
- ASM Striping Granularity 19-29
- What Type of Striping Works Best? 19-30
- ASM Striping Only 19-31
- Hardware RAID Striped LUNs 19-32
- ASM Guidelines 19-33
- ASM Instance Initialization Parameters 19-34
- Dynamic Performance Views 19-35
- Monitoring Long-Running Operations by Using V\$ASM_OPERATION 19-37
- ASM Instance Performance Diagnostics 19-38
- ASM Performance Page 19-39
- Database Instance Parameter Changes 19-40
- ASM Scalability 19-41
- Quiz 19-42
- Summary 19-43

20 Performance Tuning Summary

- Objectives 20-2
- Necessary Initialization Parameters with Little Performance Impact 20-3
- Important Initialization Parameters with Performance Impact 20-4
- Sizing Memory Initially 20-6
- UGA and Oracle Shared Server 20-7
- Large Pool 20-8
- Tuning the Large Pool 20-9
- Database High Availability: Best Practices 20-10
- Undo Tablespace: Best Practices 20-11

Temporary Tablespace: Best Practices	20-12
General Tablespace: Best Practices	20-14
