Contents

I Introduction

- Overview 1-2
- Oracle Database Innovation 1-3
- Oracle Database 11g: The Database for Grid 1-4
- Enterprise Grid Computing 1-6
- Oracle Database 11g: Focus Areas 1-7
- Familiarizing with Oracle Database New Features Before Installation 1-8
- Simplified Configuration 1-9
- Automatic Storage Management: Overview 1-10
- ASM: Key Features and Benefits 1-11
- Flash Recovery Area: Overview 1-12
- Suggested Schedule 1-13

1 Planning Your Upgrade to Oracle Database 11g

- Objectives 1-2
- Installation: New Feature Support 1-3
- Changes to the Database Product Set 1-6
- Confirming the Hardware Requirements 1-7
- Checking the Preinstallation Requirements 1-8
- Performing the Upgrade 1-9
- Preparing the Oracle9i Database 1-10
- Steps to Upgrade to Oracle Database 11g 1-12
- Preparing to Upgrade 1-13
- Planning the Upgrade 1-14
- Oracle Database 11g, Release 1: Upgrade Paths 1-15
- Choosing an Upgrade Method 1-16
- Database Upgrade Assistant: Advantages and Disadvantages 1-17
- Manual Upgrade: Advantages and Disadvantages 1-18
- Upgrade Method Limitations 1-19
- Using the Export and Import Method 1-20
- Character Sets 1-21
- Using the Character Set Scanner 1-22
- Invoking the Character Set Scanner 1-23
- Performing Character Conversion 1-24
- Changing Word Size 1-26
- Using Optimal Flexible Architecture (OFA) 1-27

Summary 1-28
 Practice 1 Overview: Preparing to Upgrade Your Oracle9i Database to Oracle Database 11g 1-29

2 Upgrading the Oracle Database 11g

Objectives 2-2
 Performing the Upgrade 2-3
 Installing Oracle Database 11g Software 2-4
 Compatibility 2-5
 Using Oracle Universal Installer 2-6
 Using Oracle Universal Installer to Install Oracle Database 11g 2-7
 Installation Prerequisites 2-8
 Setting Environment Variables 2-9
 Oracle Database 11g: Software Installation 2-11
 Oracle Net Configuration Assistant 2-13
 Upgrading a Database with Database Upgrade Assistant 2-14
 Database Upgrade Assistant 2-15
 Key DBUA Features 2-16
 Command-Line Syntax 2-19
 Selecting the Database to Upgrade 2-20
 Setting File Destinations 2-21
 Configuring Recovery Options and `SYSAUX` Tablespace 2-22
 Setting Management and Recompilation Options 2-23
 Setting Backup Options 2-24
 Creating a Database with Database Configuration Assistant 2-25
 Selecting Configuration Options 2-26
 Specifying Passwords and Storage Options 2-27
 Specifying File Locations and Backup Options 2-28
 Defining Content and Initialization Parameters 2-29
 Setting Security and Maintenance Options 2-31
 Specifying Storage and Creating the Database 2-32
 Completing Database Creation 2-33
 Performing Other Actions with DBCA 2-34
 Summary 2-35
 Practice 2 Overview: Installing Oracle Database 11g Software 2-36

3 Real Application Testing

Objectives 3-2
 Managing Change in Oracle Database 11g 3-3
 Why Use Database Replay 3-4
 System Architecture: Capture 3-5

- System Architecture: Processing the Workload 3-6
- System Architecture: Replay 3-7
- The Big Picture 3-8
- Prechange Production System 3-9
- Workloads Supported 3-10
- Capture Considerations 3-11
- Replay Considerations 3-12
- Replay Analysis 3-14
- Replay Data Divergence 3-15
- Using Enterprise Manager for Workload Capture 3-16
- Using Enterprise Manager for Workload Replay 3-19
- Data Dictionary Views: Database Replay 3-26
- SQL Performance Analyzer: Overview 3-27
 - 1: Capture SQL Workload 3-28
 - 2: Transport to a Test System 3-29
 - 3: Build Before-Change Performance 3-30
 - 4: Build After-Change Performance 3-31
 - 5: Compare and Analyze Performance 3-32
- Creating a SQL Performance Analyzer Task 3-33
- SQL Performance Analyzer Task Page 3-34
- Comparison Report 3-35
- Tuning Regressing Statements 3-36
- SQL Performance Analyzer: Summary 3-37
- Summary 3-39
- Practice 3 Overview: Real Application Testing 3-40
- 4 Upgrading Your Database by Using Other Methods**
 - Objectives 4-2
 - The Manual Upgrade 4-3
 - Oracle Database Upgrade Enhancements 4-4
 - Pre-Upgrade Information Tool 4-5
 - Pre-Upgrade Information Analysis 4-6
 - STARTUP UPGRADE 4-7
 - Using the Post-Upgrade Status Utility 4-8
 - Rerunning the Upgrade 4-9
 - Performing the Manual Upgrade 4-10
 - Abandoning the Upgrade 4-14
 - The EXPORT / IMPORT Upgrade 4-15
 - Using Export and Import to Upgrade to Oracle Database 11g 4-16
 - Applying Oracle Software Patches 4-19
 - Installing a Hot Patch 4-20

Conventional Patching and Hot Patching 4-21
 Hot Patching Considerations 4-22
 Using the Oracle Patch Utility 4-23
 Using the Oracle Relink Utility 4-24
 Summary 4-25
 Practice 4 Overview: Upgrading Your Database to Oracle Database 11g 4-26

5 Performing Postupgrade Steps

Objectives 5-2
 Required Tasks After Database Upgrade 5-3
 Updating Environment Variables 5-4
 Upgrading the Recovery Catalog 5-5
 Upgrading the Statistics Tables 5-7
 Recommended Tasks After Database Upgrade 5-8
 Adjusting the Initialization Parameters 5-9
 Using New Features in Your Upgraded Database 5-11
 Implementing New Features 5-12
 Summary 5-13
 Practice 5 Overview: Performing Postupgrade Operations 5-14

6 Using Enterprise Manager: Database Control and Grid Control

Objectives 6-2
 Using Enterprise Manager to Manage Oracle Database 11g 6-3
 Oracle Enterprise Manager Framework 6-4
 Grid Control Components 6-5
 Managed Targets 6-6
 Management Framework 6-7
 Managing with Database Control 6-8
 Starting and Stopping Database Control 6-9
 Enterprise Manager: Database Control Login 6-10
 Enterprise Manager Navigation 6-11
 Oracle Enterprise Manager: Database Home Page 6-12
 Using the Enterprise Manager Job System 6-13
 Job Activity Page 6-14
 Granting EM Administrative Privileges 6-15
 Configuring Enterprise Manager Settings and Preferences 6-16
 Defining Blackout Time Periods 6-17
 Setting Preferred Credentials 6-18
 MetaLink Integration 6-19
 Simplified Initialization Parameters 6-20
 Summary 6-21
 Practice 6 Overview: Using Enterprise Manager Database Control 6-22

- 7 Proactively Maintaining the Database**
 - Objectives 7-2
 - The Self-Managing Database 7-3
 - Database Maintenance 7-4
 - Terminology 7-5
 - Automatic Workload Repository 7-6
 - AWR Infrastructure 7-7
 - Active Session History 7-8
 - Base Statistics and Metrics 7-9
 - Baselines 7-10
 - Enterprise Manager and AWR 7-11
 - Managing AWR 7-12
 - Statistic Levels 7-13
 - Statspack and AWR 7-14
 - Automatic Database Diagnostic Monitor (ADDM) 7-15
 - ADDM Findings 7-16
 - ADDM Recommendations 7-17
 - ADDM for Oracle RAC 7-18
 - Automatic Database Diagnostic Monitor for RAC 7-19
 - Server-Generated Alerts 7-20
 - Setting Thresholds 7-21
 - Creating and Testing an Alert 7-22
 - Alerts Notification 7-23
 - Reacting to Alerts 7-25
 - Alert Types and Clearing Alerts 7-26
 - Advisory Framework 7-27
 - Enterprise Manager and Advisors 7-29
 - DBMS_ADVISOR Package 7-30
 - Viewing Advisor Information 7-31
 - Detecting Top Performance Issues 7-32
 - Job Scheduler Concepts 7-33
 - Summary 7-34
 - Practice 7 Overview: Using Server-Generated Alerts 7-35

- 8 Managing System Resources**
 - Objectives 8-2
 - Database Resource Manager: Concepts 8-3
 - Using Database Resource Manager 8-4
 - Oracle-Supplied Plans 8-5
 - Resource Manager: EM Interface 8-6
 - Resource Plans Created by Default 8-7

- Default Plan 8-8
- I/O Resource Limit Thresholds 8-9
- Resource Manager Statistics 8-10
- Maintenance Windows 8-11
- Default Maintenance Plan 8-12
- Management Allocation Methods 8-13
- Using the `RATIO` Allocation Method 8-14
- Active Session Pool 8-15
- Active Session Pool Mechanism 8-16
- Active Session Pool Parameters 8-17
- Setting the Active Session Pool: Example 8-18
- Maximum Estimated Execution Time 8-19
- Automatic Consumer Group Switching 8-20
- Switching Consumer Groups at End of Call 8-21
- Undo Quota 8-22
- Changing Undo Quota 8-23
- Using Several Resource Allocation Methods: Example 8-24
- Summary 8-26
- Practice 8 Overview: Using the Resource Manager 8-27

9 Automating Tasks with the Scheduler

- Objectives 9-2
- Scheduling Needs 9-3
- Basic Scheduler Concepts 9-4
- Privileges for Scheduler Administration 9-6
- Privileges for Scheduler Components 9-7
- Creating a Scheduler Job 9-8
- Creating a Scheduler Job: Stand-Alone Job 9-9
- Setting the Repeat Interval for a Job 9-10
- Calendar Expressions 9-11
- Using Scheduler Programs 9-12
- Specifying Schedules for a Job 9-13
- Creating and Using Schedules 9-14
- Using Enterprise Manager to Create Schedules 9-15
- Enabling and Disabling Scheduler Components 9-16
- Managing Jobs 9-17
- Managing Programs with Enterprise Manager 9-18
- Managing Schedules 9-19
- Advanced Scheduler Concepts 9-20
- Creating a Job Class 9-21
- Using Enterprise Manager to Create a Job Class 9-22

Job Logging	9-23
Scheduler Concepts: Windows	9-24
Scheduler Concepts: Window Groups	9-25
Creating a Window	9-26
Windows and Resources	9-27
Windows and Jobs	9-28
Adding a New Task to a Window with PL/SQL	9-29
Prioritizing Jobs	9-30
Prioritizing Jobs in a Job Class	9-31
Opening Windows	9-32
Closing Windows	9-33
Window Priority	9-34
Managing the Attributes of Scheduler Components	9-35
Viewing the Attributes of Scheduler Components	9-36
Setting Global Attributes of the Scheduler	9-37
Viewing Job Execution Details	9-38
Viewing Job Logs	9-39
Viewing PURGE_LOG Job Information	9-40
Purging Job Logs	9-41
Lightweight Jobs	9-42
Remote Jobs	9-43
Summary	9-44
Practice 9 Overview: Using the Scheduler	9-45

10 Managing Memory Structures

Objectives	10-2
Oracle Database SGA Parameters	10-3
Managing Autotuned SGA Parameters	10-4
Managing Manually Tuned SGA Parameters	10-6
Oracle Database PGA Parameters	10-7
Memory Management in Oracle 11g: Overview	10-9
Automatic Memory Management: Overview	10-10
Oracle Database 11g Memory Parameters	10-11
Automatic Memory Management: Architecture	10-12
Oracle Database Memory Advisors	10-13
Enabling Memory Management	10-15
Monitoring Automatic Memory Management	10-16
DBCA and Automatic Shared Memory Management	10-18
Using Shared Pool Advisory Statistics	10-19
Using the Enterprise Manager Memory Advisors	10-21
Dynamically Resizing the Large Pool	10-22

Tuning `PGA_AGGREGATE_TARGET` 10-23
 Using the Memory Advisor for PGA Aggregate Target 10-24
 Summary 10-25
 Practice 10 Overview: Using Automatic Memory Management 10-26

11 Managing Database Storage Structures

Objectives 11-2
`SYSAUX` Tablespace: Overview 11-3
 Creating `SYSAUX` with DBCA 11-4
 Creating and Altering the `SYSAUX` Tablespace 11-5
 Using EM to View `SYSAUX` Occupants 11-6
 Relocating `SYSAUX` Occupants with EM 11-7
 Default Permanent Tablespace: Overview 11-8
 Specifying a Default Permanent Tablespace 11-9
 Bigfile Tablespaces: Overview 11-10
 Bigfile Tablespace: Benefits 11-12
 Using Bigfile Tablespaces 11-13
 Creating Bigfile Tablespaces 11-14
 SQL Statement Changes and Additions 11-15
 Specifying Bigfile Tablespaces in SQL Commands 11-16
 Viewing Information About Bigfile Tablespaces 11-17
 Using `DBVERIFY` with Bigfile Tablespaces 11-18
 Migrating Objects to Bigfile Tablespaces 11-19
 Extended `ROWID` Format and Bigfile Tablespaces 11-20
`DBMS_ROWID` Package Changes 11-22
 Default Temporary Tablespace: Overview 11-23
 Obtaining Information About the Default Temporary Tablespace 11-24
 Creating and Altering Default Temporary Tablespace 11-25
 Managing Default Temporary Tablespace Restrictions 11-26
 Temporary Tablespace Group: Overview 11-27
 Temporary Tablespace Group: Benefits 11-28
 Using Temporary Tablespace Groups 11-29
 Using SQL to Create a Temporary Tablespace Group 11-30
 Using SQL to Manage Temporary Tablespace Groups 11-31
 Renaming Tablespaces: Considerations 11-32
 Renaming Tablespaces 11-33
 Renaming Tablespaces: Best Practices 11-34
 Proactive Tablespace Monitoring: Overview 11-35
 Space Usage Monitoring of Tablespaces 11-36
 Edit Thresholds of Tablespace Space Usage 11-37
 Using the Redo Logfile Size Advisor 11-38

Invoking the Redo Logfile Size Advisor 11-39
 Viewing the Optimal Redo Log File Size 11-40
 Using DML Error Logging 11-41
 DML Error Logging: Example 11-42
 Oracle SecureFiles 11-43
 Enabling SecureFiles Storage 11-44
 SecureFiles: Advanced Features 11-45
 Summary 11-46
 Practice 11 Overview: Monitoring Storage Structures 11-47

12 Implementing Automatic Storage Management (ASM)

Objectives 12-2
 Automatic Storage Management: Overview 12-3
 ASM: General Architecture 12-5
 Creating an ASM Instance 12-6
 ASM Instance Initialization Parameters 12-7
 Starting Up an ASM Instance 12-8
 SYSASM Role 12-9
 Accessing an ASM Instance 12-10
 Using Enterprise Manager to Manage ASM Users 12-11
 Shutting Down an ASM Instance 12-12
 ASM Storage: Concepts 12-13
 ASM Disk Group 12-14
 Failure Group 12-16
 Disk Group Mirroring 12-17
 Disk Group Dynamic Rebalancing 12-18
 ASM Fast Mirror Resync: Overview 12-19
 Setting Up ASM Fast Mirror Resync 12-20
 ASM-Preferred Mirror Read: Overview 12-21
 ASM-Preferred Mirror Read: Setup 12-22
 ASM-Preferred Mirror Read: Best Practice 12-23
 ASM Disk Group Compatibility 12-24
 ASM Disk Group Attributes 12-26
 ASM Scalability and Performance 12-27
 Managing Disk Groups 12-28
 Creating and Dropping Disk Groups 12-29
 Adding Disks to Disk Groups 12-30
 Using Enterprise Manager to Edit Disk Group Attributes 12-31
 Miscellaneous ALTER Commands 12-32
 ASMCMD Utility 12-33
 ASMCMD Extensions 12-34

ASMCMD Extension: Examples 12-35
 Migrate Database To ASM Wizard 12-36
 Summary 12-37
 Practice 12: Implementing Automatic Storage Management 12-38

13 Managing Database Space

Objectives 13-2
 Configuring Automatic Undo Management 13-3
 Retaining Undo Information 13-4
 Automatic Undo Retention Tuning 13-5
 Undo Management Page: General 13-6
 Undo Management Page: System Activity 13-7
 Proactive Undo Tablespace Monitoring 13-8
 Fast Start Up 13-9
 Specifying Guaranteed Undo Retention 13-10
 Oracle Partitioning 13-11
 Partitioning Enhancements 13-12
 Interval Partitioning 13-13
 Interval Partitioning: Example 13-14
 Moving the Transition Point 13-15
 System Partitioning 13-16
 System Partitioning: Guidelines 13-17
 System Partitioning: Example 13-18
 Composite Partitioning Enhancements 13-19
 Composite Range-Range Partitioning: Example 13-20
 Virtual Column-Based Partitioning 13-21
 Virtual Column-Based Partitioning: Example 13-22
 Reference Partitioning 13-23
 Reference Partitioning: Example 13-24
 Summary 13-26
 Practice 13 Overview: Managing Database Space 13-27

14 Administering Users and Database Security

Objectives 14-2
 Fine-Grained Auditing Concepts 14-3
 Security Enhancements 14-5
 Secure Default Configuration 14-6
 Enabling the Built-in Password Complexity Checker 14-7
 Adjusting Security Settings 14-8
 Setting Security Parameters 14-9
 Setting Database Administrator Authentication 14-10

Transparent Data Encryption: Using Tablespace Encryption 14-11
 Transparent Data Encryption: Encryption for LOB Columns 14-12
 Enterprise Manager Security Management 14-13
 Uniform Audit Trails 14-14
 Managing Default Audits 14-15
 Privileges Audited by Default 14-16
 Enhanced Enterprise User Auditing 14-17
 Oracle Audit Vault 14-18
 Setting Up Directory Authentication for Administrative Users 14-19
 Summary 14-20
 Practice 14 Overview: Managing Database Security 14-21

15 Managing Schema Objects

Objectives 15-2
 Using Automatic Segment Space Management 15-3
 Online Table Redefinition: Overview 15-4
 Support for Data Types and Tables 15-5
 Reorganize Objects Using Enterprise Manager Wizard 15-7
 Resumable Space Allocation: Overview 15-8
 Table Compression: Overview 15-9
 Table Compression Concepts 15-10
 Using Table Compression 15-11
 Shrinking Segments: Overview 15-12
 Shrinking Segments: Benefits 15-13
 Shrinking Segments: Candidate Segments 15-14
 Shrinking Segments: Dependency Maintenance 15-15
 How to Shrink Segments 15-16
 Online Segment Shrink: How It Works 15-17
 Using EM to Shrink Segments 15-19
 Segment Advisor 15-20
 Automatic Segment Advisor 15-21
 Automatic Segment Advisor Views 15-22
 Growth Trend Report 15-23
 Migrating to the Cost-Based Optimizer 15-24
 Optimizer Statistics Collection: Overview 15-25
 Automatically Collecting Statistics 15-26
 GATHER_STATS_JOB 15-27
 Changing the GATHER_STATS_JOB Schedule 15-28
 Locking Statistics 15-29
 Using the DBMS_STATS Package 15-30
 Automatic Statistics Collection: Considerations 15-31

- Life Cycle of Optimizer Statistics 15-32
- Managing Historical Optimizer Statistics 15-33
- Statistic Preferences: Overview 15-35
- Partitioned Tables and Incremental Statistics: Overview 15-36
- Partitioned Tables and Incremental Statistics in Oracle Database 11g 15-37
- Hash-Based Sampling for Column Statistics 15-38
- Multicolumn Statistics: Overview 15-39
- Deferred Statistics Publishing: Overview 15-40
- Deferred Statistics Publishing: Example 15-42
- Summary 15-43
- Practice 15 Overview: Managing Schema Objects 15-44

16 Accessing and Loading Data

- Objectives 16-2
- Data Pump: Overview 16-3
- Data Pump Export and Import: Overview 16-4
- Data Pump Export and Import: Benefits 16-5
- Data Pump Access Methods 16-6
- Data Pump Direct Path Considerations 16-7
- Data Pump File Locations 16-8
- Data Pump File Naming and Size 16-9
- Data Pump Utility: Interfaces and Modes 16-10
- Data Pump and Filtering 16-11
- Data Pump Import Transformations 16-12
- Data Pump Job Monitoring Views 16-13
- Database Control and Data Pump 16-14
- Parallel Full Export and Import: Example 16-15
- Limited Schema Export: Example 16-16
- External Table Population: Overview 16-17
- External Table Population Operation 16-19
- External Table Parallel Populate Operation 16-21
- External Table Population: Example 16-22
- Cross-Platform Transportable Tablespaces 16-23
- Minimum Compatibility Level 16-24
- Transportable Tablespace Procedure 16-25
- Determining the Endian Format of a Platform 16-26
- Data File Conversion: Examples 16-27
- CLOB Exception 16-28
- Dynamic Performance View Changes 16-29
- Summary 16-30
- Practice 16 Overview: Using Data Pump 16-31

17 Performing Backup and Recovery Operations

- Objectives 17-2
- Limiting Instance Recovery Time 17-3
- Automatic Checkpoint Tuning 17-4
- Overview of RMAN Changes 17-5
- Persistent Configuration Parameters 17-6
- Using RMAN to Back Up the SPFILE 17-7
- Block Media Recovery 17-8
- Reducing MTTR by Using Block Media Recovery 17-9
- Using the RMAN Interface for Block Media Recovery 17-10
- Creating Change-Aware Incremental Backups 17-12
- Enabling Fast Incremental Backup Using Database Control 17-13
- Monitoring Block Change Tracking 17-14
- Recovering with Incrementally Updated Backups 17-15
- Oracle-Suggested Strategy 17-16
- Simplified Recovery Through RESETLOGS 17-17
- Recovery Through RESETLOGS: Changes 17-18
- Using RMAN: Automatic File Creation During Recovery 17-19
- Working Through a Stuck Recovery 17-20
- Allowing Corruptions of Data Blocks 17-21
- Performing a Trial Recovery 17-22
- Flash Recovery Area 17-24
- Defining the Flash Recovery Area by Using Database Control 17-25
- Defining the Flash Recovery Area by Using SQL 17-26
- Flash Recovery Area Space Management 17-27
- Backing Up Data Files to a Flash Recovery Area 17-28
- Modifying the Disk Backup Location 17-29
- Backing Up the Flash Recovery Area 17-30
- New Flash Recovery Area View 17-31
- Best Practices for the Database and Flash Recovery Area 17-32
- Flashback Database: Overview 17-33
- Flashback Database Eliminates Restore Time 17-34
- Flashback Database Architecture 17-35
- Configuring Flashback Database with EM 17-36
- Manually Configuring Flashback Database 17-37
- Flashback Database: Examples 17-38
- Monitoring Flashback Database 17-39
- Excluding Tablespace from Flashback Database 17-40
- Flashback Database Considerations 17-41
- Data Recovery Advisor: Overview 17-42
- Listing Data Failures 17-44

- Setting Corruption-Detection Parameters 17-45
- Summary 17-46
- Practice 17 Overview: Performing Backup and Recovery Operations 17-47

18 Recovering from User Errors

- Objectives 18-2
- Flashback Features: Overview 18-3
- Configuring UNDO_RETENTION for Flashback Features 18-4
- Flashback Versions Query: Overview 18-5
- Granting Privileges for Flashback Versions Query 18-6
- Flashback Versions Query: Syntax 18-7
- Flashback Versions Query: Example 18-8
- Flashback Versions Query: Considerations 18-9
- Flashback Transaction Query: Overview 18-10
- Enabling Supplemental Logging 18-11
- Granting Privileges for Flashback Transaction Query 18-12
- Querying FLASHBACK_TRANSACTION_QUERY 18-13
- Using Flashback Versions Query and Flashback Transaction Query 18-14
- Flashback Transaction Query: Considerations 18-15
- Flashback Table: Overview 18-16
- Granting Privileges for Flashback Table 18-17
- Flashback Table: Example 18-18
- Rolling Back a Flashback Table Operation 18-19
- Flashback Table: Considerations 18-20
- Flashback Drop: Overview 18-21
- Changes in the DROP TABLE Operation 18-22
- Recycle Bin 18-23
- Querying the Recycle Bin 18-24
- Restoring Tables from the Recycle Bin 18-25
- Recycle Bin Automatic Space Reclamation 18-26
- Recycle Bin Manual Space Reclamation 18-28
- Bypassing the Recycle Bin 18-29
- Querying Dropped Tables 18-30
- Flashback Drop Considerations 18-31
- Using Oracle Database 10g LogMiner Enhancements 18-32
- Summary 18-33
- Practice 18 Overview: Using Flashback Features 18-34

19 Managing Performance

- Objectives 19-2
- SQL Tuning Advisor: Overview 19-3

Stale or Missing Object Statistics	19-4
SQL Statement Profiling	19-5
Plan Tuning Flow and SQL Profile Creation	19-6
SQL Tuning Loop	19-7
Access Path Analysis	19-8
SQL Structure Analysis	19-9
Using SQL Tuning Advisor	19-10
Database Control and SQL Tuning Advisor	19-11
SQL Access Advisor: Overview	19-12
SQL Access Advisor: Usage Model	19-13
Possible Recommendations	19-14
Typical SQL Access Advisor Session	19-15
Automatic SQL Tuning	19-16
Automatic Tuning Process	19-17
SQL Plan Management: Overview	19-19
SQL Plan Baseline Architecture	19-20
Loading SQL Plan Baselines	19-21
Possible SQL Plan Manageability Scenarios	19-23
SQL Management Base: Purging Policy	19-24
End-to-End Tracing	19-25
The <code>trcsess</code> Utility	19-26
Invoking the <code>trcsess</code> Utility	19-27
New Statistics Aggregation Dimensions	19-28
Enabling Statistics Aggregation	19-29
Generalized Trace Enabling	19-30
Enabling and Viewing SQL Tracing	19-31
Summary	19-32
Practice 19 Overview: Using SQL Advisors	19-33

20 Diagnosing Problems

Objectives	20-2
Oracle Database 11g Fault Management	20-3
Ease Diagnosis: Automatic Diagnostic Workflow	20-4
Automatic Diagnostic Repository	20-5
ADRCI: ADR Command-Line Tool	20-7
V\$DIAG_INFO	20-8
Location for Diagnostic Traces	20-9
Using ADRCI to View the Alert Log	20-10
Problems Versus Incidents	20-11
Incident Packaging Service (IPS)	20-13
Incident Packages	20-14

EM Support Workbench: Overview	20-15
Oracle Configuration Manager	20-16
EM Support Workbench: Roadmap	20-17
Viewing Critical Error Alerts in Enterprise Manager	20-18
Creating a Service Request	20-19
Health Monitor: Overview	20-20
Running Health Checks Manually: EM Example	20-21
Viewing HM Reports Using the <code>ADRDI</code> Utility	20-22
SQL Repair Advisor: Overview	20-23
Using EM to Access SQL Repair Advisor	20-24
Viewing, Disabling, and Removing a SQL Patch	20-25
Summary	20-26
Practice 20 Overview: Diagnosing Problems	20-27

21 Using Additional New Features

Objectives	21-2
Minimizing Dependent Recompilations	21-3
Locking Enhancements	21-4
Invisible Index: Overview	21-5
Invisible Indexes: Examples	21-6
Query Result Cache	21-7
Setting Up the Query Result Cache	21-8
Using the <code>RESULT_CACHE</code> Hint	21-9
Managing the Query Result Cache	21-10
Using the <code>DBMS_RESULT_CACHE</code> Package	21-11
Viewing Information About the Query Result Cache	21-12
Adaptive Cursor Sharing: Overview	21-13
Adaptive Cursor Sharing: Architecture	21-14
Adaptive Cursor Sharing Views	21-16
Skipping Unusable Indexes	21-17
<code>MAXTRANS</code> and Maximum Concurrency	21-18
Summary	21-19
Practice 21: Overview	21-20
