Preface

I Introduction

- Objectives I-2
 - Course Objectives I-3
 - Agenda: Day 1 I-4
 - Agenda: Day 2 I-5
 - Agenda: Day 3 I-6
 - Agenda: Day 4 I-7
 - Agenda: Day 5 I-8
 - Summary I-9
-
- 1 Overview of Service-Oriented Architecture (SOA) and Service Component Architecture (SCA) Concepts**
 - Objectives 1-2
 - Service-Oriented Architecture (SOA) 1-3
 - Why Is an SOA Approach Required? 1-4
 - Ways to Implement Services 1-5
 - What Are Services? 1-6
 - Adopting Standards for an SOA Approach 1-7
 - Standards That Enable SOA 1-8
 - Designing with an SOA Approach 1-9
 - Creating Service Portfolios 1-10
 - Quiz 1-11
 - History of Implementing SOA Applications 1-12
 - Service Component Architecture (SCA) Applications 1-13
 - Service Component Architecture (SCA) 1-14
 - Elements of a Service Component Architecture (SCA) 1-15
 - Comparing SOA and SCA 1-16
 - Service Data Object (SDO) 1-17
 - Quiz 1-18
 - Event-Driven Network (EDN) and Event-Driven Architecture (EDA) 1-19
 - Managing Composite Application Life Cycle 1-20
 - Describing the Course Environment 1-21
 - Oracle JDeveloper 1-22

Creating a Database Connection 1-23
Creating an Application Server Connection 1-24
Creating a Web Services Inspection Language (WSIL) Connection 1-28
Setting JDeveloper Preferences 1-29
Summary 1-30
Practice 1 Overview: Configuring the Development Environment 1-31

2 Designing Composite Applications with Oracle SOA Suite 11g

Objectives 2-2
Getting Started with Oracle SOA Suite 11g 2-3
Oracle SOA Suite 11g Platform 2-4
Oracle WebLogic Server 2-5
WebLogic Server Domain 2-6
Course Software Configuration 2-7
Oracle SOA Suite 11g Architecture 2-8
Oracle Portability Layer 2-9
Event Delivery Network 2-11
Metadata Services (MDS) 2-12
Service Engines 2-13
Oracle SOA Suite 11g Components 2-14
Adapter Services 2-15
Routing and Filtering with Mediator Components 2-16
Orchestrating Services with BPEL Components 2-17
Implementing Business Rules Components 2-18
Implementing Workflow with Human Task Components 2-19
The Role of ADF Applications with SOA 2-20
Business Events 2-21
Securing Services in Oracle SOA Suite 11g 2-22
Monitoring Services with Oracle BAM 2-23
Oracle Service Bus 2-24
Summary of Oracle Service Bus, Mediator, and BPEL 2-25
Oracle Service Bus with Oracle SOA Suite 2-26
Comparing Oracle Service Bus and Mediator Components 2-27
Designing Composite Applications 2-28
Course Use-Case: Purchase Order Processing 2-29
Course Use-Case: Referenced Composite Applications 2-30
Course Use-Case: Event-Driven Composite Applications 2-31
SOA Application Design Approaches 2-32
Composite Application Design Guide 2-33
Basic Interaction Patterns 2-34
Quiz 2-35

Additional SOA and Web Service Resources 2-36
Summary 2-37
Practice 2 Overview: Examining Services in the Course Application 2-38

3 Creating a Composite Application

Objectives 3-2
Service Component Architecture (SCA): A Review 3-3
Composite Applications as Business Services 3-4
Composite Applications 3-5
SCA Components in Oracle SOA Suite 11g 3-6
Assembling a Composite Application 3-7
Examining the `composite.xml` Source 3-8
Designing a Composite Application 3-9
Creating an SOA Application in JDeveloper 3-11
Create SOA Application Wizard: Application Name 3-12
Create SOA Application Wizard: Project Name 3-13
Create SOA Application Wizard: Project SOA Settings 3-14
Describing the SOA Composite Editor 3-15
Initial Composite Project Structure 3-16
Creating Service Entry Points 3-17
Creating External References 3-18
Creating Adapter References 3-19
Creating a File Adapter Example 3-20
Quiz 3-21
Creating a File Adapter Example Importing a Schema 3-22
Creating Components 3-23
Example: Creating a Mediator Component 3-24
Adding Wires to Composite Application 3-25
Adding a Mediator Transformation 3-26
Mapping the Transformation Rules 3-27
Quiz 3-28
Deploying a Composite Application 3-29
Testing a Composite Application 3-30
Summary 3-31
Practice 3 Overview: Creating a Simple Composite Application 3-32

4 Managing and Monitoring a Composite Application

Objectives 4-2
Overview of Managing SOA Applications 4-3
Configuration with WebLogic Server 11g Administration Console 4-4
Overview of WebLogic Server Administration Console 4-5

Managing with Oracle Enterprise Manager 4-6
Describing the Fusion Middleware Control 4-7
Accessing the SOA Infrastructure Home Page 4-8
Accessing a Composite Application Home Page 4-9
Examining a Composite Application Home Page 4-10
Quiz 4-11
Deploying a Composite Application 4-12
Deploying with JDeveloper (Review) 4-13
Specifying Deployment Configuration Details 4-14
Creating a Deployment Profile 4-16
Deploying Multiple SOA Projects 4-17
Exploring the SOA Archive and SOA Bundle 4-18
Deploying with Oracle Enterprise Manager 4-19
Deploying a SOA Archive: Select Archive 4-20
Deploying a SOA Archive: Select Target and Confirmation 4-21
Undeploying with Enterprise Manager 4-22
Redeploying a Composite Application 4-23
SOA Composite Applications Versioning 4-24
Specifying WSDL URL for a Default Revision 4-25
Managing Composite Application State 4-26
Managing SOA Applications with JDeveloper 4-27
Managing SOA Applications with Ant Scripts 4-28
Testing a Composite Application 4-29
Initiating a Test in Enterprise Manager 4-30
Preparing the Request Data for a Test 4-31
Tracking Message Flow 4-32
Working with the Flow Trace 4-33
Working with a Component Audit Trail Page 4-34
Accessing Logs and Other Settings 4-35
Initiating a Test in JDeveloper 4-36
Viewing the Response in JDeveloper 4-37
Quiz 4-38
Managing the Life Cycle of a Composite Application 4-39
Overview of Configuration Plans 4-40
Creating a Configuration Plan 4-41
Modifying a Configuration Plan 4-42
Summary 4-43
Practice 4 Overview: Managing Composite Applications 4-44

5 Creating Adapter Services

- Objectives 5-2
- Overview of Adapter Services 5-3
- Describing Technology Adapters 5-4
- Packaged Application and Legacy Adapters 5-5
- Quiz 5-6
- File Adapter 5-7
- Working with a File Adapter 5-8
- Introducing the Database Adapter 5-9
- Configuring a Database Adapter 5-10
- Configuring a Master Detail Relationship Example 5-15
- Configuring a Database Adapter 5-16
- Configuring Database Adapter 5-17
- Configuring the Database Adapter Run-Time Connections 5-18
- Redeploying the Run-Time DbAdapter 5-19
- Employing a JMS Adapter 5-20
- Configuring a JMS Destination 5-21
- Configuring a JMS Connection Factory 5-22
- Creating the JMS Adapter Connection Pool 5-23
- Associate the JMS Connection Pool to a Connection Factory 5-24
- Creating a JMS Adapter 5-25
- Configuring the JMS Adapter Connection and Interface 5-26
- Configuring the JMS Adapter Resources and Payload 5-27
- Quiz 5-28
- Integrating with Oracle e-Business Suite 5-29
- Oracle Applications Adapter Architecture Overview 5-30
- Summary 5-31
- Practice 5 Overview: Validating Credit Cards with a Database Adapter 5-32

6 Working with Mediator Components

- Objectives 6-2
- Part 1: Core Mediator Functionality 6-3
- Introducing Mediator Components 6-4
- Describing Features of Mediator Components 6-5
- Routing Rules 6-6
- Synchronous and Asynchronous Interactions 6-7
- Content-Based and Header-Based Routing 6-8
- Transformations 6-9
- Validations 6-10
- Error Management 6-11
- Event Handling 6-12

- Quiz 6-13
- Service Virtualization 6-14
- Creating a Mediator Component 6-15
- Effects of Creating a Mediator Component 6-16
- Deleting a Mediator Component 6-17
- Mediating Services and Events 6-18
- Modifying a Mediator Component 6-19
- Editing a Mediator Component 6-20
- Types of Mediator Routing Rules 6-21
- Adding a Routing Rule for the Echo Option 6-22
- Adding a Routing Rule to Publish an Event 6-23
- Creating the Published Event 6-24
- Adding a Dynamic Routing Rule 6-25
- Configuring a Routing Rule 6-26
- Setting the Target Service 6-27
- Handling Synchronous and Asynchronous Responses and Faults 6-28
- Configuring Message Filters 6-29
- Configuring Validation 6-30
- Sequential and Parallel Routing Rules 6-31
- Part 2: XSL Transformations 6-32
- Configuring Transformations 6-33
- Editing with the XSLT Mapper 6-34
- Mapping Types and Tools 6-35
- Adding a Function to a Transformation 6-36
- Modifying Function Parameters 6-37
- Chaining (Nesting) Functions 6-38
- Mapping Nodes Automatically 6-39
- Adding a For-Each Mapping Rule 6-40
- Adding an If Mapping Rule 6-41
- Adding a choose Mapping Rule 6-42
- Adding a Dictionary for Auto Mapping 6-43
- Creating a Dictionary for Auto Mapping 6-44
- Quiz 6-45
- Testing Transformation Maps 6-46
- Initiating an XSL Transformation Test 6-47
- Viewing the Test Results 6-48
- Summary 6-49
- Practice 6 Overview: Implementing Mediator Components 6-50

7 Developing a Simple BPEL Component

- Objectives 7-2
- Business Process Execution Language (BPEL) 7-3
- Parts of a BPEL Process 7-4
- XML Structure of a BPEL Process 7-5
- Creating a BPEL Component 7-6
- Describing BPEL Process Templates 7-7
- Synchronous Process Concepts 7-8
- Asynchronous Process Concepts 7-9
- Describing the BPEL Design Editor 7-10
- Designing the BPEL Process 7-11
- Constructing a BPEL Process 7-12
- Classification of BPEL Activity Types 7-13
- Oracle BPEL Extension Activity Types 7-15
- Quiz 7-17
- Structuring a Process with a Scope Activity 7-18
- Adding Activities to a Scope 7-19
- Configuring a Scope Activity 7-20
- BPEL Variables 7-21
- Creating Variables and Importing Types 7-22
- Choosing Global or Local Variables 7-23
- Creating a Variables and Setting Types 7-24
- Communicating Data with a BPEL Process 7-25
- Assigning or Copying Data to Variables 7-26
- Creating an Assign Activity 7-28
- Examining the BPEL Process XML Source 7-29
- Configuring an Assign Activity 7-30
- Creating Copy Operations 7-31
- Creating Expressions with the XPath Expression Builder 7-32
- Working with the XPath Expression Resolver 7-33
- Adding XPath Functions to an Expression 7-34
- Transforming Data in a BPEL Process 7-35
- Creating and Configuring a Transform Activity 7-36
- Quiz 7-37
- Testing a Composite with a BPEL Process 7-38
- Accessing the BPEL Process Audit Trail 7-39
- Examining the BPEL Process Audit Trail 7-40
- Examining the BPEL Process Visual Flow 7-41
- Summary 7-42
- Practice 7 Overview: Creating a Simple BPEL Process 7-43

8 Orchestrating Services with BPEL

- Objectives 8-2
- Describing Process Orchestration 8-3
- Orchestrating Services from BPEL 8-4
- Partner Links and Service Invocation 8-5
- Partner Links, Partner Link Types, and Roles 8-6
- Creating a Partner Link 8-7
- Configuring a Partner Link 8-8
- Creating a WSIL Connection (Review) 8-9
- Accessing WSDL URLs with a WSIL Connection 8-10
- Exploring Results of Creating Partner Links 8-11
- Synchronous Services 8-12
- Invoking a Synchronous Service 8-13
- Auto-Generated BPEL Variables 8-14
- Exchanging Request and Response Data 8-15
- Synchronous Interaction Pattern 8-16
- Preparing and Obtaining Data 8-17
- Asynchronous Services 8-18
- Invoking an Asynchronous Service 8-19
- Receiving a Callback Response 8-20
- Asynchronous Interaction Pattern 8-21
- Describing WS-Addressing and Correlation 8-22
- Quiz 8-23
- Conditionally Branching with a Switch Activity 8-24
- Adding a Switch Activity 8-25
- Configuring Branches of a Switch Activity 8-26
- Summary 8-27
- Practice 8 Overview: Part 1: Invoke and Switch Activities in BPEL 8-28
- Practice 8 Overview: Part 2: Invoke and Switch Activities in BPEL 8-29
- Practice 8 Overview: Changes to the Composite Application 8-30

9 Implementing Coordination and Interaction Patterns

- Objectives 9-2
- Processing Activities in Parallel 9-3
- Adding a Flow Activity 9-4
- Blocking Invoke Problem with Flows 9-5
- Implementing Non-Blocking Invokes 9-6
- Executing a Branch Multiple Times with FlowN 9-7
- Creating and Configuring a FlowN Activity 9-8
- Indexing XML Arrays Dynamically 9-9
- Comparing Flow and FlowN 9-10

Quiz 9-11
Request-Response Patterns 9-12
One-Way Message Interaction 9-13
Synchronous Interaction 9-14
Asynchronous Interaction 9-15
One Request, Multiple Responses 9-16
One Request, a Mandatory Response, and an Optional Response 9-17
Asynchronous Interaction with Timeout Pattern 9-19
Implementing a Pick Activity 9-20
Asynchronous Interaction with a Notification Timer Pattern 9-21
One Request, One of Two Possible Responses 9-22
Multiple Requests, Multiple Responses 9-24
Multiple Requests, First Response 9-25
Looping with a While Activity 9-26
Suspending a Process with a Wait Activity 9-27
BPEL Deployment Descriptor Properties 9-28
Quiz 9-29
Summary 9-30
Practice 9 Overview: Part 1: Implementing Pick, While, and FlowN 9-31
Practice 9 Overview: Part 2: Coordinating with a Flow Activity 9-32

10 Handling Exceptions in Composite Applications

Objectives 10-2
Fault Handling Concepts 10-3
Types of Service Faults 10-4
Defining Business Faults 10-5
Managing Faults in Mediator 10-6
Configuring a Target Service for a Mediator Fault 10-7
Considering Faults with Asynchronous Mediator Components 10-8
Describing Faults in BPEL Processes 10-9
Creating BPEL Fault Handlers 10-10
Catch and CatchAll Handlers 10-11
Handling Faults with a Catch Branch 10-12
Handling Faults with a CatchAll Branch 10-13
Catching BPEL Run-Time Faults 10-14
Throwing Business Faults in BPEL 10-15
Returning Faults from a Synchronous Process 10-16
Returning Faults from an Asynchronous Process 10-17
Faults That Cannot Be Handled 10-18
Quiz 10-19
Overview of the Fault Management Framework 10-20

Introducing Policy-Driven Fault Handling 10-21
Fault Policy File Structure 10-22
Creating Fault Policies 10-23
Creating Fault Conditions and Actions 10-24
Configuring a Retry Action for a Fault Condition 10-25
Configuring a Java Action 10-27
Fault Bindings File Structure 10-28
Defining Fault Bindings 10-29
Quiz 10-30
Recovering Faults with Enterprise Manager Fusion Middleware Control 10-31
Accessing a Recoverable Fault 10-32
Recovering a Fault Condition 10-33
Summary 10-35
Practice 10 Overview: Part 1: Creating and Propagating a Fault 10-36
Practice 10 Overview: Part 2: Handling a Fault 10-37

11 Managing Transactions with Services

Objectives 11-2
Transactional Services 11-3
Transaction Boundaries with Services 11-4
Implementing Transactional Services 11-5
Introducing the Service Data Object (SDO) 11-6
Implementing an SDO with ADF 11-7
Deploying an ADF-BC Application 11-8
Accessing an SDO in a Composite Application 11-9
Creating an SDO Partner Link 11-10
BPEL Entity Variables 11-12
Executing SDO Operations with an Entity Variable 11-13
Querying Data with an Entity Variable 11-14
Configuring the BindEntity Activity 11-15
Updating Data with an Entity Variable 11-16
Inserting Data with an Entity Variable 11-17
Deleting Data with an Entity Variable 11-18
Transaction Concepts in BPEL 11-19
Quiz 11-20
BPEL Process Dehydration 11-21
Default Transactional Behavior in BPEL 11-23
Transaction Boundaries with Entity Variables 11-24
Transactional Adapters in a BPEL 11-25
Forcing a Rollback from a BPEL Flow 11-26
Global Transactions with Two Database Adapters 11-27

Invoking a Database Adapter (Review) 11-28
Compensation and Transactions 11-29
Compensating Transaction: Example 11-30
Implementing Compensation in BPEL 11-31
Quiz 11-32
Summary 11-33
Practice 11 Overview: Working with Entity Variables and SDOs 11-34

12 Implementing Human Task Services

Objectives 12-2
Human Tasks 12-3
Human Workflow Concepts 12-4
Human Workflow Services 12-5
Common Workflow Exchange Patterns 12-6
Workflow as a Service 12-7
Human Tasks in a Composite Application 12-8
Implementing Human Tasks in a Composite Application 12-9
Working with Human Workflow in BPEL 12-10
Adding a Human Task to a BPEL Process 12-11
Quiz 12-12
Configuring the Human Task 12-13
Configuring the Task Header and Outcomes 12-14
Adding Human Task Parameters 12-15
Setting the Task Parameter Values 12-16
Processing the Task Outcomes 12-17
Configuring Assignment and Routing Policies 12-18
Configuring Stages and Participants 12-19
Selecting a Participant 12-20
Selecting a User Participant 12-21
Configuring Expiration and Escalation Settings 12-22
Configuring Notification Settings 12-23
Configuring Workflow Notification Channels 12-24
Accessing the Worklist Application 12-25
Viewing and Acting on Task Information 12-26
Task Display Forms 12-27
Generating a Task Display Form 12-28
Deploying Task Display Forms 12-29
Working with Notification Services 12-30
Oracle User Messaging Service (UMS) 12-31
Oracle UMS Components and Architecture 12-32
Configuring Workflow Notification Properties 12-33

Configuring the User Messaging Email Driver 12-34
Viewing and Testing Email Notifications 12-35
Sending Email Notification from BPEL 12-36
Sending Notification to Users Preferred Channel 12-37
Quiz 12-38
Summary 12-39
Practice 12 Overview: Implementing Human Workflow and Notification 12-40
Practice 12 Overview: Changes to the POProcessing Composite 12-41

13 Developing Business Rules

Objectives 13-2
Introducing Business Rules 13-3
Declarative Rule Concepts 13-4
Rule Inference Concepts 13-5
Guidelines for Selecting Rules Use Cases 13-6
Basic Oracle Business Rule Concepts 13-7
Oracle Business Rule Components 13-8
Firing of Rules in a Rule Session 13-9
Overview of the Business Rules Component 13-10
Developing Business Rules for an Application 13-11
Facts, Bucketsets, Globals, RL Functions 13-13
Decision Service Architecture 13-14
Working with Decision Service 13-15
Creating a Business Rule Component in a Composite Application 13-16
Creating a Business Rule in a BPEL Process 13-17
Configuring a Business Rule in BPEL 13-18
Configuring Business Rule Input Facts 13-19
Configuring Business Rule Output Facts 13-20
Examining Business Rule Component Files 13-21
Opening the Business Rules Designer 13-22
Editing the Rule Dictionary 13-23
Creating XML Facts 13-24
Creating RL Functions 13-25
Creating Globals (Variables and Constants) 13-26
Working with Bucketsets 13-27
Creating a List of Ranges Bucketset 13-28
Creating Links to Other Dictionaries 13-29
Creating a Rule Set 13-30
Identifying the Structure of a Rule 13-31
Creating Business Rules 13-32
Creating a Rule Test 13-33

Creating the Rule Action	13-34
Quiz	13-35
Working with Decision Tables	13-36
Creating Decision Tables and Conditions	13-38
Creating Decision Tables Rules	13-39
Creating Decision Table Actions	13-40
Business Rules and Decision Functions	13-41
Creating and Editing Decision Functions	13-42
Invoking Rules in a Decision Function	13-43
Testing Business Rules at Design-Time	13-44
Testing Business Rules at Run-Time	13-45
Describing the Rules SDK	13-46
Quiz	13-47
Summary	13-48
Practice 13 Overview: Implementing Business Rule Components	13-49

14 Testing and Debugging Composite Applications

Objectives	14-2
Testing SOA Composite Applications	14-3
Introducing the Composite Test Framework	14-4
Overview of Test Suites	14-5
Overview of Test Cases	14-6
Creating a Test Suite	14-7
Creating a Test Case	14-8
Examining Test Suite and Test Case Files	14-9
Contents of a Test Case	14-10
Initiating Inbound Messages	14-11
Emulating Outbound Messages	14-12
Emulating Callback Messages	14-13
Emulating Fault Messages	14-14
Creating Variable or XML Assertions	14-15
Configuring Variable-Based Assertions	14-16
Configuring XML-Based Assertions	14-17
XML-Identical Assertion Example	14-18
XML-Similar Assertion Example	14-19
Quiz	14-20
Selecting the Test Cases to Run	14-21
Running the Test Cases	14-22
Examining Results of a Test Run	14-23
Viewing Assertion Information	14-24
Quiz	14-25

Debugging Composite Applications 14-26
Troubleshooting Guidelines 14-27
Summary 14-28
Practice 14 Overview: Creating and Running a Test Suite and Test Case 14-29

15 Securing Services and Composite Applications

Objectives 15-2
Introduction to Web Service Security 15-3
Securing End Point Examples 15-6
Quiz 15-7
Oracle Web Service Manager 15-8
Oracle Web Services Manager Policy Framework 15-9
Components of Oracle Web Services Manager Architecture 15-10
Introduction to Policies 15-11
Policy Interceptor Pipeline 15-12
Policy Assertions 15-13
Types of Security Tokens 15-14
Security Assertion Markup Language (SAML) 15-15
Introduction to Security Policies 15-16
Quiz 15-17
Securing SOA and Identity Propagation 15-18
Attaching a Policy to an Inbound Request 15-19
Attaching a Policy to an Inbound Request by Using Oracle JDeveloper 11g 15-20
Attaching a Policy to an Outbound Request 15-21
Attaching a Policy to an Outbound Request by Using Oracle JDeveloper 11g 15-22
Managing SOA Composite Application Policies 15-23
Summary 15-25
Practice 15 Overview: Attaching Security Policies 15-26

16 Designing and Managing Business Events

Objectives 16-2
Introduction to Business Events 16-3
Event Delivery Network (EDN) Concepts 16-4
Event Delivery Network and Business Events 16-5
Event Definition Language (EDL) 16-6
Aligning SOA and EDA through EDN 16-7
EDN Support in Oracle SOA Suite 11g 16-8
Creating a Business Event 16-9
Subscribing to Events in Mediator Components 16-10
Setting Event Delivery Consistency 16-11
Publishing an Event from a Mediator Component 16-12

Initiating a Composite with ADF-BC Events 16-13
Publishing an ADF-BC CRUD Event 16-14
Summary of ADF-BC CRUD Events 16-15
Emulating Events in a Test Case 16-16
Quiz 16-17
Managing EDN in Enterprise Manager 16-18
Viewing Events in Enterprise Manager 16-19
Testing Events with Enterprise Manager 16-20
Subscribing to Database Events 16-21
Viewing Event Subscriptions 16-22
Viewing Event Faults 16-23
Quiz 16-24
Summary 16-25
Practice 16 Overview: Publishing and Subscribing to an Event 16-26

17 Monitoring Composite Applications with Sensors and Oracle BAM

Objectives 17-2
What Are Sensors? 17-3
Creating BPEL Sensors 17-4
Configuring BPEL Sensors 17-5
Sensor Files 17-6
Composite Sensors 17-7
Creating a Composite Sensor 17-8
Quiz 17-10
Overview of Business Activity Monitoring 17-11
Introduction to Monitoring with Oracle BAM 17-12
Interfacing with Oracle BAM 17-13
Oracle BAM Tools and Roles 17-14
BAM Architect 17-15
BAM Active Studio 17-16
BAM Active Viewer 17-17
BAM Administrator 17-18
Preparing an Oracle BAM Dashboard 17-19
ICommand Utility 17-20
Importing and Exporting with ICommand 17-21
Integrating Oracle BAM with the BAM Adapter 17-23
Creating a BAM Connection 17-24
Creating and Configuring the BAM Adapter 17-25
Configuring the Run-Time OracleBamAdapter 17-27
Using a Mediator Component with a BAM Adapter 17-29
Creating a BAM Sensor Action in a BPEL Process 17-30

Configuring a BAM Sensor Action 17-31
Introduction to Complex Event Processing 17-32
Monitoring CEP with SOA Suite and BAM 17-33
Basic Oracle CEP Integration with Oracle BAM 17-34
Quiz 17-35
Summary 17-36
Practice 17 Overview: Creating Sensors and Monitoring in Oracle BAM 17-37

Appendix A: Performing Common Tasks in JDeveloper

Objectives A-2
Creating a Database Connection A-3
Creating an Application Server Connection A-4
Creating an Application A-6
Creating an Empty Project A-8
Creating an SOA Project A-9
Creating a Project from Existing Sources A-10
Creating a Project from Existing Sources: Finish A-12
Deploying an SOA Composite Application A-13
Creating an ADF Business Component Project A-15
Creating Business Components from Tables A-16
Selecting the Table for an ADF-BC Application A-17
Creating the ADF-BC View Objects A-18
Creating the ADF-BC Application Module A-19
Creating the ADF-BC Service Interface A-20
Configuring the ADF-BC Service Interface A-21
Verifying the ADF-BC Service Interface A-22
Setting the ADF-BC Deployment Configuration A-23
Creating the ADF-BC Service Deployment Profile A-24
Summary A-25

Appendix B: Overview of the Oracle Applications Adapter

Objectives B-2
Integrating with Oracle E-Business Suite B-3
Adapter for Oracle Applications B-4
Adapter for Oracle Applications Architecture B-5
Applications Context Concepts B-7
Establishing Applications Context B-8
Setting Applications Context in BPEL B-9
Invoking an Oracle Applications Operation B-10
Adapter Design-time and Run-time Connections B-11
Configuring the Adapter Run-Time Connections B-12

- Completing Adapter Configuration B-13
- Configuring an Adapter Design-time Connection B-14
- Creating an Oracle Applications Adapter Service B-15
- Oracle Applications Module Browser B-16
- Summary B-17

Appendix C: Working with Domain-Value Maps and Cross References

- Objectives C-2
- Introducing Domain-Value Maps (DVM) C-3
- Creating a Domain-Value Map C-4
- Populating a Domain-Value Map C-5
- Using a Domain-Value Map in Transformations C-7
- Introducing Cross References C-8
- Working with Cross References C-9
- Creating a Cross Reference Table C-10
- Defining the Cross Reference Table Structure C-11
- Populating Cross Reference Tables C-12
- Looking Up Cross Reference Tables C-13
- Deleting Cross Reference Entries C-14
- Summary C-15

Appendix D: Coordinating Master-Detail BPEL Processes

- Objectives D-2
- Introducing Master-Detail Processes D-3
- Coordinating a Master-Detail Process Example D-4
- Creating a Master Process D-5
- Creating a Detail Process D-6
- Coordinating the Master-Detail with an Invoke Activity D-7
- Summary D-9

Appendix E: Integrating Services with Oracle Service Bus

- Objectives E-2
- Introduction to Oracle Service Bus E-3
- Role of Oracle Service Bus E-4
- Oracle Service Bus Core Features E-5
- Oracle Service Bus Functional Layers E-6
- Oracle Service Bus Architecture E-7
- Projects and Resources E-8
- Introduction to Proxy Services E-9

Introduction to Business Service E-11
Message Flow Definitions E-12
Oracle Service Bus Console E-13
Quiz E-14
Comparing Oracle Service Bus and Mediator Components E-15
Quiz E-16
Summary E-17

Glossary
