Table of Contents

Preface

Course Objectives	xiii
Course Structure	xiii
Course Materials	xiii
Student Guide	xiv
Activity Guide	xiv
Conventions	xiv
Additional Resources	xv

Lesson 1: Introduction to Financial Management

About Financial Management	1-2
Additional Financial Management Components	1-3
Product Integration	1-4
Financial Management Architecture	1-6
Client Tier	1-7
Middle Tier	1-8
Data Tier	1-9
External Services	1-10
Financial Management Business Process	1-11
Step 1—Entering Data	1-12
Step 2—Calculating Data	1-13
Step 3—Adjusting Data	1-14
Step 4—Translating and Consolidating Data	1-15
Step 5—Reviewing and Approving Data	1-16
Step 6—Running and Publishing Financial Reports	1-17

Lesson 2: Preparing the Installation Environment

Installation Overview	2-2
EPM System Installation Workflow	2-3
Installation Checklist	2-4
Preparing the Work Area	2-5
Obtaining Licenses	2-5
Planning the Deployment Architecture	2-7

Single-Server Deployment	2-7
Distributed Deployment	2-8
Sample Deployment Scenarios	2-10
Financial Management Deployment for 100/500 Users	2-12
Financial Management Deployment for 1000 Users	2-16
Virtual Installation Deployment	2-20
Preparing Server Disk Space and RAM	2-22
Preparing Client Disk Space and RAM	2-25
Preparing the Security Infrastructure	2-27
User Authentication	2-28
Security API	2-28
Configuring SSL	2-29
Full SSL Deployment	2-30
SSL Termination at the Web Server	2-32
SSL Deployment with an Offloader	2-33
Two-Way SSL Deployment	2-35
Preparing Web Application Servers	2-37
Preparing Web Servers	2-39
Oracle HTTP Server	2-40
Microsoft IIS	2-40
Enabling Existing .NET 2.0 Framework (Windows 2003)	2-41
Preparing Web Browsers	2-42
Default Ports	2-44
ABC Corporation Overview	2-46
Business Scenario	2-46
Classroom Architecture Overview	2-48

Lesson 3: Preparing the Software Requirements

Selecting a Supported Platform	3-2
Windows-Only Components	3-2
Unix Components	3-3
Client Operating Systems	3-3
Selecting a Supported Database	3-5
Supported Databases	3-6
Classroom Database Definition	3-9
Accessing Oracle Software and Documentation	3-11
Preparing the Required Software	3-12
Release Compatibility	3-14
EPM System Certification Matrix	3-15

Upgrading to the Current Release	3-15
Applying Maintenance Releases	3-15
EPM System Software Dependencies	3-16
Preparing Third-Party Software	3-18

Lesson 4: Installing Product Components

EPM System Installer Overview	4-2
Installation Prerequisites	4-3
Oracle HTTP Server Prerequisites	4-3
Installing EPM System Products	4-4
Reviewing System Prerequisites	4-6
Specifying the Middleware Home Directory	4-8
Selecting an Installation Type	4-10
Selecting the Products to Install	4-12
Confirming Your Selections	4-14
Reviewing the Summary Report	4-15
Performing Silent Installations	4-16
Recording Response Files	4-16
Modifying Response Files	4-17
Executing Response Files	4-18
Installing Foundation Services	4-19
Shared Services Overview	4-20
Workspace Overview	4-20
Performance Management Architect Overview	4-21
Calculation Manager Overview	4-22
Installing Financial Management	4-23
Selecting Financial Management Components	4-24
Installing Microsoft IIS	4-24
Installing Financial Close Management and Disclosure Management	4-25
Installing Reporting and Analysis Framework	4-26
Framework Services	4-27
Financial Reporting	4-27
Web Analysis	4-27
Installing Reporting Studio and Financial Reporting Print Server	4-28
Reporting and Analysis Architecture	4-29
Installing FDM and ERP Integrator	4-32
FDM Overview	4-32
ERP Integrator Overview	4-33
Selecting FDM Components	4-33

Working with Oracle Server	4-34
Working with SQL Server	4-34
Installing Smart View	4-36

Lesson 5: Understanding Configurations

Launching EPM System Configurator	5-2
Configuration Prerequisites	5-3
Configuration Tasks	5-4
Configuration Sequence	5-6
Product Configurations on a Single Machine	5-7
Product Configurations in a Distributed Environment	5-7
Reporting and Analysis Configurations in a Distributed Environment	5-8
Product Configurations in an SSL-Enabled Environment	5-9
Configuring Products in a Clustered Environment	5-10
Clustering Web Applications	5-10
Clustering Financial Management Servers	5-11
Load-Balancing Financial Management or FDM Web Applications in IIS	5-12
Performing Silent Configurations	5-13
Recording Response Files	5-13
Modifying Response Files	5-15
Executing Response Files	5-15

Lesson 6: Configuring Shared Services

Running EPM System Configurator for Shared Services	6-2
Configure Logical Addresses for Web Applications	6-3
Setup Connection to Oracle BI and Publisher	6-3
Import Data from Earlier Releases	6-3
Configuring the EPM Oracle Instance	6-4
Setting Up the Shared Services and Registry Database Connection	6-6
Configuring EPM System Common Settings	6-10
Deploying Shared Services to the Application Server	6-13
Registering with Oracle Configuration Manager	6-16
Setting the Shared Services Admin User Password	6-18
Configuring the Foundation Services Web Server	6-19
Launching Shared Services Console	6-20
Configuring Single Sign-On	6-22
Configuring Native Directory	6-23
Configuring MSAD or LDAP User Directories	6-26

User Configuration	6-30
Group Configuration	6-33
Testing User Directory Connections	6-36
Managing the User Directory Search Order	6-36
Provisioning Users and Groups	6-38
Provisioning Sequence	6-39
Available Roles	6-39
Deprovisioning Users and Groups	6-41
Generating Provisioning Reports	6-43
Creating Application Groups	6-45

Lesson 7: Configuring Financial Management and Performance Management Architect

Configuring Financial Management	7-2
Configuring the Financial Management Database	7-3
Deploying Financial Management to the Application Server	7-5
Configuring DCOM	7-8
Configuring the Financial Management Application Server	7-11
Configuring Financial Management Servers and Clusters	7-13
Registering Financial Management Servers and Clusters	7-15
Configuring the Financial Management Web Server	7-16
Configuring Performance Management Architect	7-19
Configuring the Performance Management Architect Database	7-20
Deploying Performance Management Architect to the Application Server	7-22
Creating an Interface Data Source	7-25
Configuring Calculation Manager	7-27
Configuring the Calculation Manager Database	7-28
Deploying Calculation Manager to the Application Server	7-30

Lesson 8: Configuring Reporting and Analysis Framework and Workspace

Configuring Financial Reporting and Web Analysis	8-2
Configuring the Reporting and Analysis Database	8-4
Configuring Reporting and Analysis Framework Services	8-6
Deploying Reporting and Analysis to the Application Server	8-7
Configuring Workspace	8-10

Lesson 9: Troubleshooting the EPM System Installation

Troubleshooting Basics	9-2
----------------------------------	-----

Reviewing Hardware and Software Requirements	9-3
Checking Release Compatibility	9-5
Identifying Port Conflicts	9-6
Starting and Stopping EPM System Services	9-7
Running EPM System Diagnostics	9-8
Foundation Services Diagnostics.	9-9
Workspace Diagnostics	9-9
Performance Management Architect Diagnostics	9-10
Financial Management Diagnostics.	9-10
Calculation Manager Diagnostics	9-11
Reporting and Analysis Framework Diagnostics	9-11
Reporting and Analysis Diagnostics	9-12
Viewing and Analyzing Log Files	9-13
EPM System Installer Logs	9-13
EPM System Configurator Logs.	9-14
Other Configuration Logs.	9-14
Troubleshooting Product-Specific Issues.	9-16
Troubleshooting Shared Services	9-16
Troubleshooting Workspace	9-17
Troubleshooting Financial Management	9-17
Troubleshooting Performance Management Architect.	9-18
Contacting Oracle Support.	9-20

Lesson 10: Verifying the Financial Management Installation

Testing Process	10-2
Creating Import Profiles	10-3
Importing Dimensions	10-5
Creating Applications.	10-6
Selecting Dimensions	10-8
Configuring the Application Settings	10-11
Deploying Applications to Application Servers.	10-13
Validating Applications.	10-14
Deploying Applications.	10-15
Viewing Job Status.	10-17
Loading Data	10-18

Lesson 11: Verifying the Reporting Tools Installation

Installing Reporting Studio and Financial Reporting Print Server	11-2
--	------

Creating a Financial Reporting Report	11-5
Testing Web Analysis	11-8
Testing Related Content	11-11

Lesson 12: Transforming Classic Applications to Performance Management Architect

Application Transformation Overview	12-2
Accessing Application Upgrade Wizard in Workspace	12-3
Step 1: Reviewing the Welcome Page	12-4
Step 2: Reviewing the Application Summary	12-5
Step 3: Selecting Applications	12-6
Step 4: Reviewing the Transformation Summary	12-7
Step 5: Viewing Job Console	12-8
Step 6: Viewing Application Library	12-9
Step 7: Accessing the Application	12-10

Lesson 13: Performing System Maintenance

Backup and Recovery Overview	13-2
Assumed Knowledge	13-2
Common Backup Tasks	13-3
Backup Prerequisites	13-3
Backing Up Databases and File Systems	13-4
Database Backup Types	13-5
File System Backup Types	13-6
Recovery Sequence	13-7
Backing Up Windows Registry Settings	13-8
Backing Up and Restoring EPM System Products	13-10
Backing Up and Restoring Workspace and Shared Services	13-10
Backing Up and Restoring Performance Management Architect	13-12
Backing Up and Restoring Financial Management	13-13
Backing Up Calculation Manager	13-14
Backing Up and Restoring Smart View	13-15
Backing Up and Restoring FDM	13-15
Backing Up ERP Integrator	13-15
Managing EPM System Log Files	13-16
Configuration Files	13-17
Modifying Configuration Files	13-19
Log Files	13-19

Lesson 14: Upgrading System Components

Upgrading Overview	14-2
Supported Upgrade Paths	14-4
Upgrade Checklist	14-6
EPM System Upgrade Tasks	14-6
Product-Specific Upgrade Tasks	14-8
Performing Upgrade Installation Prerequisites	14-10
Backing Up Earlier Releases	14-10
Performing Product-Specific Prerequisites	14-11
Downloading and Preparing Files for Installation	14-11
Preparing Data for Upgrade	14-12
Uninstalling Earlier Releases of EPM System Products	14-18
Installing EPM System Products for an Upgrade	14-19
Configuring EPM System Products for an Upgrade	14-21
General Upgrade Considerations	14-21
Required Configuration Tasks for an Upgrade	14-22
Performing Additional Product-Specific Upgrade Tasks	14-28
Performance Management Architect Upgrade Tasks	14-28
Essbase Upgrade Tasks	14-29
Essbase Studio Upgrade Tasks	14-29
Reporting and Analysis Upgrade Tasks	14-29
Financial Management Upgrade Tasks	14-30
ERP Integrator Upgrade Tasks	14-31
Upgrading from Multiple Releases	14-32
Upgrading from an Environment with a Single Instance of Shared Services	14-32
Upgrading from an Environment with Two Instances of Shared Services	14-33

Lesson 15: Performing Migrations with Lifecycle Management

Lifecycle Management Overview	15-2
Migrating on Connected and Disconnected Environments	15-4
Lifecycle Management Requirements	15-5
Lifecycle Management Security	15-7
About Artifacts	15-8
Financial Management Artifacts	15-9
Performance Management Architect Artifacts	15-11
Calculation Manager Artifacts	15-12
Foundation Services Artifacts	15-13
Viewing and Searching for Artifacts	15-15

Application and Artifact Migration Process	15-17
Selecting Migration Scenarios	15-18
Migration Guidelines	15-19
Migrating Directly from One Application to Another	15-21
Migrating Applications to a File System	15-23
Migrating Applications from the File System to a Destination Application	15-25
Exporting and Importing Individual Artifacts for Editing	15-27
Automating Migration Tasks	15-29
Running the Lifecycle Management Utility	15-30
Accessing and Viewing Migration Status Reports	15-32
Viewing Audit Reports	15-33

Appendix A: Configuring FDM and ERP Integrator

Financial Data Quality Management Overview	A-2
ERP Integrator Overview	A-3
Configuring FDM Components	A-5
Configuring Web Server Components	A-7
Configuring the Task Manager and Application Server Components	A-9
Configuring Load Balance Manager	A-11
Configuring Workbench	A-13
Creating FDM Applications	A-15
Installing Standard Reports and Templates	A-17
Installing Financial Management Adapters	A-19
Connecting to Financial Management Applications	A-21
Configuring ERP Integrator	A-23
Configuring the ERP Integrator Database	A-23
Deploying ERP Integrator to the Application Server	A-24

Appendix B: Configuring Oracle Data Integrator for ERP Integrator

Oracle Data Integrator for ERP Integrator Configuration Process	B-2
Creating Database Schemas for the Master and Work Repositories	B-4
Creating a Master Repository	B-6
Configuring Oracle Data Integrator with Topology Manager	B-8
Configuring ERP Integrator Work Repositories	B-9
Creating Logical Schemas	B-11
Creating Data Servers and Physical Schemas	B-13
Creating Contexts	B-17
Creating Physical Agents	B-19

Importing ERP Integrator Scenarios into Execution Repositories B-21
Updating the snpsagent.config File B-23
Updating the Windows Environment Variable B-24

Appendix C: Working with Performance Management Architect File
Generator

Performance Management Architect File Generator Overview C-2
Creating an Import File from Financial Management Files C-4
Creating an Import File from Financial Management Applications C-6
Creating an Import File from Performance Management Architect Applications C-8
Creating an Import File from Microsoft Excel Files C-10
 Financial Management Dimension Associations C-12
 Deleting Dimensions C-13
