Contents

1 Java Platform, Enterprise Edition

- Course Goals 1-2
- Course Objectives 1-3
- Audience 1-4
- Topics Not Covered 1-5
- How Prepared Are You? 1-7
- Class Introductions 1-8
- Course Environment 1-9
- Java Technology Product Groups 1-10
- Requirements of Enterprise Applications 1-11
- Enterprise Application Infrastructure Technologies 1-12
- Separation of Business Logic from Platform Services 1-13
- Java EE Profiles 1-14
- Java EE 6 Web Profile 1-15
- Full Java EE 6 Requirements 1-17
- Java EE Technology Specifications 1-18
- Java EE Services and APIs 1-19
- Java EE Component Containers 1-20
- Java EE Service Infrastructure 1-21
- Java EE Platform Tiers and Architecture 1-23
- N-Tier Architectural Model 1-24
- Java EE–Tiered Architecture 1-25
- Additional Resources 1-26
- Quiz 1-27
- Summary 1-30
- Practice 1: Overview 1-32

2 Enterprise Development Tools and Application Servers

- Objectives 2-2
- Java Application Servers 2-3
- Java EE Implementations 2-4
- Selecting an Application Server 2-5
- Oracle WebLogic 12c 2-6
- WebLogic 12c Zip Distribution 2-7
- Development Tools 2-8

- Java EE Development Tools 2-9
- Configuring NetBeans and WebLogic Server 2-10
- Starting WebLogic Server with NetBeans 2-12
- Steps for Developing a Java EE Application 2-13
- Java EE Application Development Process 2-15
- Java EE Containers 2-16
- Java EE Component Characteristics 2-17
- Component State and Properties 2-18
- Encapsulated Components 2-19
- Component Proxies 2-20
- Configuring and Packaging Java EE Applications 2-21
- Web Application Elements 2-23
- Web Archive File Creation 2-24
- Java Archive Files 2-25
- Enterprise Archive Files 2-26
- Deployment Descriptors 2-27
- Vendor-Specific Deployment Descriptors 2-28
- Quiz 2-29
- Additional Resources 2-36
- Summary 2-37
- Practice 2: Overview 2-38

3 JavaBeans, Annotations, and Logging

- Objectives 3-2
- Java SE Features Common in EE Applications 3-3
- JavaBeans 3-4
- What Are Suitable JavaBeans? 3-5
- Features and Benefits of JavaBeans 3-6
- Creating a JavaBean 3-7
- Bean Properties 3-8
- A Basic JavaBeans Component 3-9
- Persistence 3-10
- Tool Support 3-11
- Quiz 3-12
- Java Logging 3-13
- Logging Frameworks 3-14
- java.util.logging.Logger Class 3-15
- Log Levels 3-16
- Logging Method Categories 3-17
- Logging Method Usage 3-18
- Where Log Records Go 3-19

- Guarded Logging 3-20
- Logging Handlers and Formatters 3-21
- Logger Hierarchy 3-22
- Logging Configuration 3-23
- Application Servers and Logging 3-24
- WebLogic Server Logging Bridge Handler 3-25
- WebLogic Log Files 3-26
- WebLogic Log File Format 3-27
- WebLogic Logging Service Configuration 3-28
- Quiz 3-29
- Annotations 3-30
- XML Based Deployment Data 3-31
- Compiler Supported Annotations 3-32
- Lifecycle Annotations 3-33
- Custom Annotations 3-34
- Annotation Elements 3-35
- Annotation Placement 3-36
- Annotation Retention 3-37
- Annotations in Java EE 3-38
- Quiz 3-39
- Additional Resources 3-40
- Summary 3-41
- Practice 3-1 Overview: Adding a Logger to an application 3-42
- Practice 3-2 Overview: Adding a JavaBeans Persistence Mechanism to the JavaFXMediaViewer Application 3-43
- Practice 3-3 Overview: Logging to the WebLogic Server Log File 3-44

4 Web Component Model

- Objectives 4-2
- Why Create Web Applications 4-3
- Web Application Overview 4-4
- Role of Web Components in a Java EE Application 4-5
- MVC Architecture 4-6
- MVC in a Java EE Web Application 4-7
- HTTP Request-Response Model 4-8
- GET and POST Requests 4-10
- Content Type and the Response Header 4-11
- Overview of Web Components 4-12
- Comparison of Servlets and JSP Components 4-13
- Servlet Example 4-14
- JSP Component Example 4-16

Servlet and JSP Component Collaboration	4-17
Runtime Behavior of Servlets and JSP Components	4-18
JSF Facelet Example	4-19
JSP Expression Language (EL)	4-20
Web Context Root and Alias Mapping	4-21
Data Scopes	4-22
Cascading Style Sheets	4-23
Web Development Tools	4-24
Additional Resources	4-25
Quiz	4-26
Summary	4-30
Practice 4: Overview	4-31

5 Developing with JavaServer Faces Technology

Objectives	5-2
JavaServer Faces (JSF)	5-3
JavaServer Faces: Benefits	5-4
Inversion of Control	5-5
JavaServer Faces 2.0: New Features	5-6
JSF Application Elements	5-7
JSF Hello World	5-8
JSF Forms	5-9
JSF Page Tags	5-10
JSF Tag Libraries	5-11
Tag Library Documentation	5-12
Managed Beans	5-13
Managed Bean Configuration	5-14
Managed Beans and Forms	5-15
An Example JSF Application	5-16
JSF Page: index.xhtml	5-17
GuessBean Managed Bean	5-18
JSF Deployment Descriptor	5-20
JSF Application Life Cycle Phases	5-21
An Initial JSF Page Request	5-22
JSF Postback Requests	5-23
JSF Conversion and Validation	5-24
Text and HTML Within Facelet Pages	5-25
Creating HyperLinks	5-26
Managed Bean Life Cycle and Scope	5-27
Managed Bean Dependency Injection	5-29
Unified Expression Language	5-30

Using the Unified EL to Reference Managed Beans 5-31
JSF Page Navigation 5-32
ui:repeat Tag 5-33
<ui:repeat>: Example 5-34
Additional Resources 5-35
Quiz 5-36
Summary 5-40
Practice 5-1: Overview Creating a JSF Application 5-41
Practice 5-2: Overview Adding a media View Page 5-42
Practice 5-3: Overview Adding a settings View Page 5-43

6 Using AJAX and Composite Components with JSF

Objectives 6-2
JSF 2.0 and AJAX 6-3
Using the <f:ajax> Tag 6-4
JSF Life Cycle and AJAX 6-5
Simple AJAX Example 6-6
JSF AJAX Attributes 6-7
execute and render Special Keywords 6-9
Where Do You Put the <f:ajax> Tag? 6-10
AJAX Field Validation 6-11
Using the JavaScript API for JSF 2.0 6-12
Using the JavaScript API 6-13
Composite Components 6-14
Composite Component Usage Contract 6-15
Composite Component Implementation 6-16
Using the Composite Component 6-17
Composite Components Are Flexible 6-18
Essential Composite Tags 6-19
Additional Resources 6-20
Quiz 6-21
Summary 6-24
Practice 6-1 Overview: Creating a JSF Composite Component 6-25
Practice 6-2 Overview: Adding AJAX to the settings View Page 6-26

7 Apache Trinidad JSF Component Library and Mobile Development

Objectives 7-2
User-Agent Detection 7-3
HTML5 Video Support 7-4
<video> Tag 7-5
JSF Component Libraries 7-6

- Apache Trinidad 7-7
- Configuring Trinidad 7-8
- Creating a Facelet with Trinidad 7-9
- Creating Forms with Trinidad 7-10
- Form Layout 7-11
- Using <tr:panelTabbed> 7-12
- Trinidad Skinning 7-13
- Available Skins 7-14
- Creating Custom Skins 7-15
- Mobile Web Development 7-16
- Trinidad Mobile Support 7-17
- Mobile Web Design 7-18
- Mobile Viewports 7-19
- Quiz 7-20
- Summary 7-21
- Practice 7-1 Overview: (Optional) Implementing HTML5 Video 7-22
- Practice 7-2 Overview: Using the Trinidad Component Library 7-23
- Practice 7-3 Overview: Creating Mobile Web Applications 7-24

8 Dependency Injection With CDI

- Objectives 8-2
- Before Dependency Injection 8-3
- Dependency Injection in Java EE 5 8-4
- Other Forms of Dependency Injection 8-5
- Contexts and Dependency Injection (CDI) 8-6
- Enabling CDI 8-7
- Using CDI 8-8
- Bean Scopes 8-9
- Qualifiers 8-10
- @Named Qualifier 8-13
- Injecting Classes Without a no-arg Constructor 8-14
- Producers 8-15
- Alternatives 8-17
- Enabling @Alternative Classes 8-18
- @Alternative Producers 8-19
- Additional CDI 8-20
- Additional Resources 8-21
- Quiz 8-22
- Summary 8-23
- Practice 8 Overview: Contexts and Dependency Injection 8-24

9 Using JSF and Bean Validation

- Objectives 9-2
- JSF Process Validation Details 9-3
- Input Conversion 9-4
- Validation 9-5
- Validation and Conversion 9-7
- Validation and Conversion Errors 9-8
- Error Messages 9-11
- Updated GuessNumberExample 9-12
- Bean Validation 9-13
- Bean Validation: Example 9-14
- Bean Validation Messages 9-15
- Default Bean Validations Constraints 9-16
- Custom Bean Validation 9-18
- Constraint Annotation 9-19
- Constraint Implementation 9-20
- Applying the ValidLicenseKey Annotation 9-22
- Additional Resources 9-23
- Quiz 9-24
- Summary 9-28
- Practice 9-1 Overview: Apply Built-in JSF and Bean Validation 9-29
- Practice 9-2 Overview: Create a Custom Bean Validation Constraint 9-30

10 Developing Servlets

- Objectives 10-2
- Basics of the Servlet API 10-3
- Basic Servlet 10-4
- Basic Servlet Result 10-6
- Servlet Configuration 10-7
- Deployment Descriptors 10-8
- Deployment Descriptor: Example 10-9
- Setting Response Headers 10-10
- Creating the Response Body 10-11
- Uploading Files 10-12
- Server-side File Processing 10-13
- The RequestDispatcher Interface 10-16
- The RequestDispatcher Target and the Context Root 10-18
- The forward and include Methods 10-19
- Using the Session Management API 10-20
- Session Binding 10-21

Retrieving a Session Object 10-22
Additional Resources 10-23
Quiz 10-24
Summary 10-28
Practice 10-1: Overview Create a servlet to download media items 10-29
Practice 10-2: Overview Create a servlet to upload media items 10-30

11 Developing With JavaServer Pages Technology

Objectives 11-2
JSP Technology as a Presentation Mechanism 11-3
Presentation Using JSP Pages Compared to Servlets 11-5
Worker Beans, JSTL, and Custom Tags 11-7
JSP Page Translation Procedure 11-8
Java Code Embedded in JSP Pages 11-9
Syntactic Forms of JSP Tags 11-10
JSP Technology Directives 11-11
JSP Directives 11-12
Declarations, Expressions, and Scriptlets 11-13
Declaration Scripting Elements 11-14
Expression Scripting Elements 11-15
Scriptlet Scripting Elements 11-16
JavaServer Pages Scopes 11-18
Using EL to Access Scoped Beans 11-19
Request-Scope Beans and Collecting Data from Servlets 11-20
The taglib Directive 11-21
The Expression Language (EL) 11-22
The JSTL Core Tag Library 11-23
JSTL Examples 11-24
Additional Resources 11-25
Quiz 11-26
Summary 11-29
Practice 11-1: Developing JSPs 11-30
Practice 11-2: Implementing JSP Footers and Dynamic Styling 11-31

12 EJB Component Model

Objectives 12-2
EJB Component Types 12-3
Enterprise Application Tiers 12-4
Benefits of EJBs 12-5
Analysis of the Session EJB Component Model 12-6
EJB Lite 12-7

Embedded EJB Container 12-8
EJB Objects and Proxies 12-9
Local and Distributed Client Views 12-10
Using Annotations to Obtain an EJB Reference in a Managed Component 12-11
Comparison of Stateless and Stateful Behavior 12-12
Stateless Session Bean Cardinality 12-13
Stateful Session Bean Cardinality 12-14
Singleton Session Bean Characteristics 12-15
Creating Session Beans 12-16
Declaring a Local Session Bean 12-17
Declaring a Remote Session Bean 12-18
Requirements for a Session Bean Class 12-19
Life Cycle of a Stateless Session Bean 12-20
Life Cycle of a Stateful Session Bean 12-21
The SessionContext Object 12-22
Standard JNDI Names 12-23
Stand-alone Java SE Clients 12-24
Additional Resources 12-25
Quiz 12-26
Summary 12-29
Practice 12-1 Overview: Creating a Singleton Bean 12-30

13 The Java Persistence API

Objectives 13-2
The Java Persistence API 13-3
Object-Relational Mapping 13-4
Normalized Data Mapping 13-5
Use of an Entity Component Across a Set of Database Tables 13-6
Entity Class Requirements 13-7
Creating an Entity 13-8
Entity Mapping 13-9
Primary Keys 13-10
Entity Component Primary Key Association 13-11
Changing Default Mapping 13-12
Persistent Fields Versus Persistent Properties 13-13
Persistence Data Types 13-15
Applying Bean Validation to Entities 13-16
Persistence Units 13-17
The persistence.xml file 13-18
The Persistence Context 13-19
The Entity Manager 13-20

Entity Instance Management	13-21
Entity Instance Life Cycle and Entity Manager Methods	13-23
Entity Bean States	13-24
Entity Manager Methods	13-25
Managed Entities	13-26
JPA Queries	13-27
A Native Query: Example	13-28
Additional Resources	13-29
Quiz	13-30
Summary	13-33
Practice 13-1: Overview Implementing a JPA Application	13-34
Practice 13-2: Overview Creating a dynamic JPQL query	13-35

14 Implementing a Transaction Policy

Objectives	14-2
Transaction Semantics	14-3
Atomicity	14-4
Locking and Isolation	14-6
Transaction Models	14-7
Comparison of Programmatic and Declarative Transactions	14-9
Programmatic Scoping as Opposed to Reusability	14-10
Using JTA to Scope Transactions Programmatically	14-11
Getting a Reference to the UserTransaction Interface	14-12
Using the begin,commit, and rollback Methods	14-13
Implementing a Container-Managed Transaction Policy	14-14
Container Interactions with the Transaction Management Infrastructure	14-15
How to Control the Container's Behavior Using Transaction Attributes	14-17
Predicting the Effect of Transaction Scope on Application Performance	14-18
Transaction Scope and Entity Synchronization	14-19
Optimistic Locking and Versioning	14-20
Implementing Versioning	14-21
Pessimistic Locking	14-22
Effect of Exceptions on Transaction State	14-23
Using the EJBContext Object to Check and Control Transaction State	14-24
Additional Resources	14-25
Quiz	14-26
Summary	14-30
Practice 14-1: Overview Implement Optimistic Locking	14-31

15 Web Service and Integration Technology Survey

- Objectives 15-2
- N-Tier Architectural Model 15-3
- Business and Resource Layers 15-4
- The Integration Layer 15-5
- The DAO Pattern 15-6
- The Java Persistence API 15-7
- The Java Messaging Service (JMS) API & MDBs 15-8
- The JavaMail API 15-9
- JNDI 15-10
- Java EE Connector Architecture 15-11
- Web Services 15-12
- Web Services APIs 15-13
- Transactions and Resources 15-15
- Additional Resources 15-16
- Summary 15-17

16 Implementing a Security Policy

- Objectives 16-2
- Exploiting Container-Managed Security 16-3
- Security Concepts 16-4
- End-to-End Security Model 16-5
- Container-Managed Security 16-6
- Container-Managed Authentication 16-7
- Authentication in the Web Tier 16-8
- Web-Tier Authentication Challenge Methods 16-9
- Basic Authentication Dialog Box 16-10
- Authentication from the Web Tier to the EJB Tier 16-11
- Authentication of Non-Web Clients 16-12
- Interaction With the Security Infrastructure 16-13
- User Roles and Responsibilities 16-14
- Role-Based Java EE Security Model 16-15
- Creating a Role-Based Security Policy 16-16
- Role Mapping 16-17
- Role-Based Authorization in the Web Tier 16-19
- web.xml Security Constraints 16-20
- Role-Based Authorization in the EJB Tier 16-21
- EJB Tier Security Annotations 16-22
- Using the Security API 16-23
- Web-Tier Security API 16-24
- EJB-Tier Security API 16-25

- CDI Security API 16-26
- Configuring Authentication in the Web Tier 16-27
- Selecting Basic Authentication 16-28
- HTTP Error Pages 16-29
- Selecting Form Authentication 16-30
- Creating an HTML Login Page for Form-Based Authentication 16-31
- Programmatic Logins 16-32
- Security Exceptions 16-33
- Additional Resources 16-34
- Quiz 16-35
- Summary 16-41
- Practice 16-1 Overview: Using Declarative Security 16-42

A Developing Java EE Applications Using Messaging

- Objectives A-2
- Messaging System Participants A-3
- Administered Objects A-4
- Messaging Clients A-5
- Messages A-6
- Point-to-Point Messaging Architecture A-7
- Publish/Subscribe Messaging Architecture A-8
- Creating a Queue Message Producer A-9
- Example Code for Message Producer A-12
- Queue Message Browser A-15
- Example Code for Queue Message Browser A-16
- Evaluating the Capabilities and Limitations of EJB Components as
 - Messaging Clients A-19
- Additional Resources A-20
- Summary A-21
- Quiz A-22
- Practice A: Overview A-25

B Developing Message-Driven Beans

- Objectives B-2
- Introducing Message-Driven Beans B-3
- Java EE Technology Client View of Message-Driven Beans B-4
- Life Cycle of a Message-Driven Bean B-5
- Types of Message-Driven Beans B-6
- Creating a JMS Message-Driven Bean B-7
- Message-Driven Bean: Example B-9

Callback Methods in a Bean Class B-10

Additional Resources B-12

Summary B-13

Quiz B-14

Practice B: Overview B-16
