Preface

Course Objectives	iii
Course Structure	iv
Course Materials	iv
Student Guide	iv
Activity Guide	iv
Conventions	iv
Additional Resources	v
Related Courses	vi

Lesson 1: Product Orientation

Oracle's Enterprise Performance Management System	1-2
Information Delivery Layer	1-2
EPM and BI Applications Layer	1-3
BI Foundation	1-3
FDM	1-4
Benefits of FDM	1-6
Features of FDM	1-7
ERP Integrator	1-8
Processing Data Overview	1-10
Source Data Import	1-11
Validation of Dimension Mappings	1-12
Mapping Errors	1-13
Target System Data Loads	1-14
Validation Rules	1-15

Lesson 2: Navigating FDM

Accessing FDM	2-2
Accessing Workbench	2-2
Workbench Interface	2-4
Accessing the FDM Web Client	2-5
FDM Web Client Desktop	2-7
Working with the POV	2-8

Rules That Determine the Default POV	2-9
Changing the POV Mode	2-10
Changing the POV	2-12
Searching for POV Members	2-14
Locking Out Users for Maintenance	2-15
Running Reports	2-17
Process Monitor Reports	2-19
Changing Report and Group Descriptions	2-20
Viewing Graphical Timelines	2-22
Viewing Events	2-24
Changing the Timeline Viewer Display	2-26

Lesson 3: Creating FDM Applications

About FDM Applications	3-2
Data Requirements	3-3
Application-Building Process	3-5
Creating Applications	3-7
Database Settings	3-10
Directory Structure of Applications	3-12
Managing Applications	3-14
Modifying Applications	3-15
Removing Applications	3-15
Adding Applications	3-15

Lesson 4: Integrating Applications

Integration Overview	4-2
Importing Adapters	4-4
Adapter Components	4-5
Source System Adapters	4-7
Target System Adapters	4-10
Modifying Dimension Properties	4-15
Registering Adapters	4-17
Configuring Financial Management Adapters	4-19
Adding Machine Profiles	4-21
Configuring Application Settings	4-23
Configuring Integration Settings	4-25
Application Name Option	4-26
Logon Method Option	4-26

Global Logon Information Option	4-26
Integrating Hyperion Enterprise Applications	4-27
Associating Dimensions Between Applications	4-29
Testing Integrations	4-31
Setting Up Standard Reports and Templates	4-32
Setting Up Standard Reports	4-32
Setting Up Standard Templates	4-33

Lesson 5: Setting Up Control Tables and Locations

Viewing Control Tables	5-2
Managing Control Tables	5-4
Categories	5-7
Periods	5-9
Managing Control Tables with Excel Worksheets	5-11
Viewing Locations	5-16
Managing Locations	5-18
Setting Location Attributes	5-21
Setting General Attributes	5-22
Setting Workflow Behaviors Attributes	5-24
Setting Financial Controls Attributes	5-26
Setting Integration Options Attributes	5-27
Searching Control Trees	5-28

Lesson 6: Setting Up Mapping Tables

Mapping Dimension Members	6-2
Activating Map Dimensions	6-3
Assigning Dimension Labels	6-5
Opening Maps	6-7
Building Maps	6-9
Map Types	6-11
Explicit Mapping	6-12
Rules-Based Mapping	6-13
Wildcard Mapping	6-18
Processing Order	6-20
Processing Order in Multiple Mapping Types	6-21
Processing Order in the Same Mapping Type	6-21
Building Maps Externally	6-22
Building Maps with MapLoader Files	6-23

Importing Maps	6-25
Importing Maps from Hyperion LedgerLink Files	6-26
Importing Maps from Hyperion Enterprise Files.	6-29
Copying Maps	6-31
Sharing Dimension Maps.	6-32
Setting Up Conditional Mapping	6-33
VarValues Variables	6-34
Conditional Mapping Script Example	6-35
Conditional Mapping Performance Considerations	6-36

Lesson 7: Building Import Formats

About Import Formats	7-2
Creating Import Groups	7-3
Creating Import Formats	7-5
Creating Import Formats with Import Format Builder.	7-7
Fixed Import Formats.	7-10
Delimited Import Formats.	7-12
Building Import Formats for ERP Integrator.	7-14
Skipping Lines in Import Files	7-16
Concatenating Fields.	7-17
Assigning Import Formats	7-18
Adding Import Expressions	7-19
Sign Expressions	7-21
DRCRSplit Expressions	7-22
Fill and Fill=EuroToUS Expressions.	7-24
Fill and Fill=EuroToUS Expressions: Example.	7-25
FillL Expressions	7-26
Factor Expressions	7-27
NZP Expressions	7-28
Expression Stacking and Processing Order.	7-29

Lesson 8: Loading Data

About Loading Data	8-2
Importing Source Data.	8-3
Working with Records	8-5
Sorting Records	8-5
Finding Records.	8-7
Filtering Records	8-9

Deleting Records	8-11
Validating Dimension Mappings	8-12
Validation Errors	8-14
Fixing Validation Errors	8-15
Intersection Validation Reports	8-17
Loading Data to Target Systems	8-18
Drilling Up on Values	8-20
Displaying Attributes	8-21
Displaying Conversion Rules	8-22
Displaying Archive Information	8-24
Displaying Source Documents	8-25
Displaying Source Systems	8-26
Displaying Processing Logs	8-27
Restoring Source Documents	8-28
Drilling Down on Values	8-29
Drilling Up on a Drilldown	8-30
Drilling Through to FDM from Target Systems	8-31
Drilling Through from Financial Management	8-32
Drilling Through from Essbase	8-33
Drilling Through from Planning	8-35
Drilling Through from Strategic Finance	8-36

Lesson 9: Building Validation Rules

About Validation Rules and Reports	9-2
Creating Validation Rule Groups	9-4
Creating Validation Rules	9-6
Selecting Display Values	9-8
Defining Rule Attributes	9-10
Adding Rule Logic	9-12
Creating Validation Rules in Validation Editor	9-17
Adding Rules and Display Values	9-17
Looking Up Members	9-20
Testing Rules and Display Values	9-22
Assigning Validation Rules to Locations	9-24
Checking Validation Rules	9-25

Lesson 10: Setting Up Validation Entities

About Validation Entities	10-2
-------------------------------------	------

Creating Validation Entity Groups	10-3
Creating Validation Entities	10-5
Assigning Validation Entity Groups to Locations	10-8
Verifying Consolidations.	10-9

Lesson 11: Processing Batch Files

About Batch Processing.	11-2
Enabling Batch Processing	11-4
Setting Up Batch-Load Files	11-5
Processing Batch-Load Files	11-7
Batch Controls	11-8
Batch Results.	11-9
Creating Batch Scripts	11-10
Scheduling Batch Scripts in Task Manager	11-12

Lesson 12: Creating Logic Accounts

About Logic Accounts	12-2
Creating Logic Groups.	12-4
Creating Simple Logic Accounts	12-6
Selecting Source Accounts for Calculations	12-9
Grouping Accounts by Source Locations.	12-11
Selecting Operators and Values	12-13
Retrieving Source Account Values.	12-15
Assigning Function Return Values.	12-17
Simple Logic Function Examples.	12-19
Creating Logic Expressions	12-21
Creating Complex Logic Accounts.	12-22
Applying Criteria Values.	12-24
Complex Logic Example 1	12-26
Complex Logic Example 2	12-28
Assigning Logic Groups to Locations.	12-29

Lesson 13: Loading FDM Journals

About FDM Journals	13-2
Creating Journal Templates	13-4
Adding Metadata Tags	13-6
Load Method Tags	13-7

Dimension Tags	13-8
Loading Journal Templates	13-9
Checking In Journals	13-11
Posting Journals	13-12

Lesson 14: Loading Data with Multiload Files

About Multiload Files	14-2
Creating Multiload Excel Templates	14-4
Adding Metadata Tags	14-6
Adding Load Control Tags	14-7
Adding Dimension Tags	14-13
Creating Multiload Text Files	14-15
Loading Multiload Files	14-17
Checking In Multiload Files	14-19
Executing Workflow Tasks for Multiload Files	14-20
Viewing Errors	14-21

Lesson 15: Setting Up Security

About FDM Security	15-2
Security Levels	15-3
About Object Security	15-5
Setting Up Object Security	15-6
About User Security	15-8
Setting Up User Security	15-9
Adding Authentication Providers for FDM	15-10
Provisioning Users in Shared Services	15-12
Adding Users to FDM Applications	15-14
Modifying User Rights	15-16
Deleting Users	15-17
Locking and Unlocking the Local POV Mode	15-18
Setting Up Report Group Security	15-19

Lesson 16: Working with Financial Controls

About Financial Controls in FDM	16-2
Creating Controls Groups	16-3
Adding Sections	16-4
Adding Questions	16-5

Setting an Effective Date	16-7
Creating Question Profiles	16-8
Importing Questions from Excel	16-10
Deleting Controls Groups, Sections, or Questions	16-12
Restoring Controls Groups, Sections, or Questions	16-14
Assigning Reviewer, Submitter, and Proxy Rights	16-16
Assigning Reviewers and Proxies	16-17
Assigning Submitters and Proxies	16-19
Assigning Risk Levels to Locations	16-20
Accessing Financial Controls	16-22
Adding Memos and Attaching Documentation	16-23
Reviewing and Submitting Questions	16-28
Selecting Application Settings for Financial Controls	16-30

Lesson 17: Working with Import Scripts

About Scripting in FDM	17-2
Working with Scripting Components	17-3
Accessing Script Editor in the FDM Web Client	17-4
Accessing Script Editor in Workbench	17-5
Accessing Accelerators	17-7
Creating Import Scripts	17-8
Import Script Parameters	17-8
Creating Import Scripts in Workbench	17-10
Creating Import Scripts: Example	17-11
Assigning Import Scripts to Import Formats	17-12
Applying Scripting Functions to Import Scripts	17-14
Applying the Left Function	17-15
Applying the Right Function	17-16
Applying the Mid Function	17-17
Applying the fParseString Function	17-18
Applying the RES.PblnSkip Function	17-19
Applying the RES.PblnSkip Function: Example	17-20
Working with Temporary Variables	17-21
Assigning Temporary Variables	17-22
Importing Files	17-25
Manually Executing Custom Web Scripts	17-26

Lesson 18: Working with Import Integration Scripts

About Import Integration Scripts	18-2
Import Integration Script Parameters	18-3
Population of FDM Table Fields	18-4
Creating Import Integration Scripts in Workbench	18-6
Creating Import Integration Scripts: Example	18-8
Creating Import Integration Scripts: Example (cont.)	18-9
Assigning Import Integration Scripts to Import Formats	18-10

Lesson 19: Working with Event Scripts

About Event Scripts	19-2
Types of Event Scripts	19-3
ImportAction Subevents	19-4
Event Script Parameters	19-6
Creating Event Scripts	19-7
Changing Import Formats Dynamically	19-8
Changing Import Formats Dynamically: Example	19-9
Changing Other Location Attributes Dynamically	19-10

Appendix A: Setting Up Multilanguage Support

About Multilanguage Support	A-2
Changing Language Settings in FDM	A-4
Changing Browser Language Settings	A-6
Setting Decimal Formatting Options	A-8
Creating Reports for Multiple Languages	A-10
Translating Reports	A-12
Selecting Validation Reports	A-14

Appendix B: ERP Integrator

About ERP Integrator	B-2
Supported Systems	B-3
ERP Integrator Process	B-5
ERP Integrator Architecture: Loading Metadata and Data	B-6
ERP Integrator Architecture: Drilling Through and Writing Back Budget Data	B-8
Security in ERP Integrator	B-10
ERP Integrator User Interface Elements	B-12

Accessing ERP Integrator	B-14
Extracting GL Metadata and Data: Configuring ERP Integrator	B-16
Registering ERP Source Systems	B-18
Enabling FDM Applications	B-21
Registering EPM Target Applications.	B-22
Selecting Source Accounting Entities	B-24
Extracting GL Metadata and Data: Setting Up ERP Integrator	B-26
Creating Import Formats	B-27
Defining Locations	B-29
Defining Metadata Rules	B-31
Defining Period Mappings	B-35
Defining Category Mappings	B-37
Defining Data Rules	B-39
Drilling Through to View Source Data	B-44
Drilling Through from Financial Management	B-46
Drilling Through from Planning	B-47
Drilling Through from Smart View	B-48
Drilling Through from Financial Reporting	B-49
Drilling Through from the ERP Integrator Landing Page	B-50
Drilling Through from the E-Business Suite Landing Page	B-51
Drilling Through from the PeopleSoft Landing Page	B-52
Writing Back Budget Data from EPM Applications	B-53
Configuring and Setting Up ERP Integrator.	B-54
Creating Write-Back Mappings	B-54
Creating Data Write-Back Rules	B-55
Executing Data Write-Back Rules	B-56
Loading Data into the ERP Systems	B-57
Managing Data Write-Back Rules	B-58
Extracting HR Metadata and Data from PeopleSoft HCM	B-59
Configuring and Setting Up ERP Integrator.	B-60
Creating HR Data Rules	B-60
Executing HR Data Rules	B-63
Managing HR Data Rules	B-65
