

Contents

1 Introduction

- Course Goals 1-2
- Schedule 1-4
- Objectives 1-6
- Virtualization with Oracle VM Server for x86 1-7
- Oracle VM Server for x86 in the Classroom 1-8
- Working with Classroom Virtual Machines 1-9
- Classroom System Configuration 1-11
- Local Yum Repository 1-13
- Summary 1-14
- Practice 1: Overview 1-15

2 Network Addressing and Name Services

- Objectives 2-2
- Introduction to DHCP 2-3
- Configuring a DHCP Server 2-4
- Additional DHCP Server Declarations 2-6
- Configuring a DHCP Client 2-8
- Introduction to DNS 2-10
- Nameserver Types 2-11
- BIND 2-12
- DNS Cache-Only Nameserver 2-13
- Starting a DNS Cache-Only Nameserver 2-16
- Zone Files 2-17
- Reverse Name Resolution 2-19
- rndc Utility 2-21
- host and dig Utilities 2-23
- Quiz 2-24
- Summary 2-25
- Practice 2: Overview 2-26

3 Authentication and Directory Services

- Objectives 3-2
- Authentication Options 3-3
- Authentication Configuration Tool 3-4

- NIS Authentication 3-5
- NIS Maps 3-6
- NIS Server Configuration 3-8
- NIS Client Configuration 3-10
- Implementing NIS Authentication 3-11
- Complete NIS Practices 3-13
- Lightweight Directory Access Protocol (LDAP) 3-14
- OpenLDAP 3-16
- OpenLDAP Configuration Database 3-18
- OpenLDAP Server Utilities 3-20
- OpenLDAP Client Utilities 3-21
- OpenLDAP Server Configuration 3-22
- Populating an OpenLDAP Directory 3-24
- Configuring LDAP Authentication 3-26
- Configuring User Authentication from an OpenLDAP Client 3-28
- Configuring Winbind Authentication 3-30
- Winbind Security Model Options 3-32
- Configuring Kerberos Authentication 3-34
- Configuring Advanced Options 3-35
- System Security Services Daemon 3-37
- Configuring SSSD Services 3-38
- Configuring SSSD Domains 3-40
- Quiz 3-42
- Summary 3-43
- Practice 3: Overview 3-44

4 Web and Email Services

- Objectives 4-2
- Apache HTTP Server 4-3
- Configuring Apache 4-4
- Testing Apache 4-6
- Apache Containers 4-7
- Apache Virtual Hosts 4-9
- Quiz 4-11
- Email Program Classifications 4-12
- Email Protocols 4-13
- Postfix SMTP Server 4-15
- Sendmail SMTP Server 4-16
- Configuring Sendmail on a Client 4-18
- Quiz 4-19
- Summary 4-20
- Practice 4: Overview 4-21

5 Installing Oracle Linux by Using Kickstart

- Objectives 5-2
- Kickstart Installation Method 5-3
- Kickstart File 5-4
- Kickstart Configurator 5-6
- Beginning a Kickstart Installation 5-7
- Rescue Mode 5-8
- Quiz 5-9
- Summary 5-10
- Practice 5: Overview 5-11

6 Samba Services

- Objectives 6-2
- Introduction to Samba 6-3
- Samba Daemons and Services 6-4
- Samba Server Configuration 6-5
- Samba Server 6-7
- Samba Server Types 6-8
- Accessing Linux Shares from Windows 6-10
- Accessing Windows Shares from Linux 6-12
- Samba Utilities 6-13
- Quiz 6-15
- Summary 6-16
- Practice 6: Overview 6-17

7 Advanced Software Package Management

- Objectives 7-2
- Software Management with RPM and Yum 7-3
- RPM Packages 7-5
- The Binary RPM Build Process 7-6
- BUILD Directory Structure 7-7
- spec File to Build a Binary RPM Package 7-8
- spec File: Example 7-10
- Managing RPM-Based Software with Yum 7-11
- Yum Cache 7-12
- Yum History 7-14
- Extending Yum Functionality with Plug-Ins 7-16
- Popular Yum Plug-Ins 7-18
- Using the Yum Security Plug-In 7-20
- Important Resources for Errata Information 7-22
- PackageKit Software Package Manager GUI 7-23

- Using PackageKit Software Update 7-24
- Using PackageKit Add/Remove Software 7-25
- PackageKit Commands: Summary 7-26
- Disabling PackageKit Software Updates 7-28
- Quiz 7-29
- Summary 7-31
- Practice 7: Overview 7-32

8 Advanced Storage Administration

- Objectives 8-2
- Access Control Lists (ACLs) 8-3
- getfacl and setfacl Utilities 8-4
- Disk Quotas 8-6
- Enabling Disk Quotas 8-7
- Summary of Quota Commands 8-9
- Encrypted Block Devices 8-12
- cryptsetup Utility 8-13
- Making an Encrypted Device Usable 8-15
- kpartx Utility 8-16
- Udev: Introduction 8-19
- Udev Rule Files and Directories 8-20
- Sample Udev Rules 8-21
- udevadm Utility 8-23
- Changing /dev/sdb to /dev/my_disk: Example 8-25
- Quiz 8-26
- Summary 8-28
- Practice 8: Overview 8-29

9 OCFS2 and Oracle Clusterware

- Objectives 9-2
- OCFS2: Introduction 9-3
- OCFS2 Features 9-5
- Using OCFS2 9-7
- Preparing for OCFS2 9-8
- OCFS2 Software 9-10
- Kernel Configuration 9-12
- Configuring Cluster Layout 9-13
- o2cb Utility 9-15
- OCFS2 Heartbeat 9-17
- O2CB Cluster Timeouts 9-19
- o2cb Initialization Script 9-20

- mkfs.ocfs2 Utility 9-22
- Mounting OCFS2 Volumes 9-25
- OCFS2 Tuning and Debugging 9-27
- Quiz 9-30
- Introduction to Oracle Clusterware 9-34
- Oracle Clusterware Hardware Requirements 9-35
- Oracle Clusterware Files 9-36
- Summary 9-37
- Practice 9: Overview 9-38

10 iSCSI and Multipathing

- Objectives 10-2
- Introduction to iSCSI 10-3
- iSCSI Target Files 10-4
- iSCSI Target Configuration File 10-5
- tgtadm Utility 10-7
- tgt-admin Script 10-10
- tgt-setup-lun Script 10-11
- iSCSI Initiators 10-12
- iSCSI Initiator Files 10-13
- iscsiadm Utility 10-14
- iSCSI Discovery 10-15
- iSCSI Initiator Sessions 10-17
- iSCSI Block Devices 10-19
- Quiz 10-21
- Complete iSCSI Practices 10-24
- Device Mapper Multipathing 10-25
- DM-Multipath Files 10-26
- DM-Multipath Configuration File 10-27
- defaults Attributes in /etc/multipath.conf 10-29
- blacklist Section in /etc/multipath.conf 10-31
- multipaths Section in /etc/multipath.conf 10-32
- devices Section in /etc/multipath.conf 10-33
- Multipath Identifiers 10-34
- mpathconf Utility 10-35
- multipath Utility 10-37
- multipathd Daemon 10-39
- iSCSI Multipathing 10-41
- Quiz 10-43
- Summary 10-45
- Practice 10: Overview 10-46

11 XFS File System

- Objectives 11-2
- XFS File System 11-3
- Creating an XFS File System 11-4
- xfs_growfs Utility 11-6
- xfs_admin Utility 11-7
- Enabling Disk Quotas on an XFS File System 11-8
- xfs_quota Utility 11-10
- Setting Project Quotas 11-12
- Backing up and Restoring XFS File Systems 11-14
- XFS File System Maintenance 11-16
- Quiz 11-17
- Summary 11-20
- Practice 11: Overview 11-21

12 Btrfs File System

- Objectives 12-2
- Btrfs: Introduction 12-3
- Creating a Btrfs File System 12-5
- btrfs Utility 12-7
- Btrfs Subvolumes 12-8
- btrfs subvolume Utilities 12-10
- Btrfs Snapshots 12-11
- Taking a Snapshot of a File 12-12
- Mounting a Subvolume or Snapshot 12-13
- btrfs filesystem Utilities 12-15
- btrfs filesystem df Utility 12-16
- btrfs filesystem show|sync Utilities 12-18
- btrfs filesystem defragment Utility 12-19
- btrfs filesystem resize Utility 12-20
- btrfs device Utilities 12-21
- btrfs device Utility: Examples 12-22
- btrfs scrub Utilities 12-24
- btrfs scrub Utility: Examples 12-25
- Converting Ext File Systems to Btrfs 12-27
- UEK Boot ISO 12-28
- Quiz 12-29
- Summary 12-32
- Practice 12: Overview 12-33

13 Control Groups (Cgroups)

- Objectives 13-2
- Control Groups: Introduction 13-3
- Cgroup Subsystems (Resource Controllers) 13-5
- Cgroup Subsystem Parameters 13-6
- Cgroup Hierarchy 13-7
- Cgroup Configuration Rules and Constraints 13-8
- Cgroup Configuration 13-9
- /etc/cgconfig.conf “mount” Section 13-10
- Issubsys Utility 13-12
- Sample “mount” Implementation 13-13
- /etc/cgconfig.conf “group” Section 13-15
- View of the New Cgroup Hierarchy 13-17
- cgcreate and cgdelete Utilities 13-18
- cgset Utility 13-19
- Assigning Processes to a Cgroup 13-20
- Cgroup Rules Configuration File 13-22
- Enabling PAM to Use Cgroup Rules 13-23
- Getting Information About Cgroups 13-24
- cgget Utility 13-26
- Quiz 13-27
- Summary 13-30
- Practice 13: Overview 13-31

14 Virtualization with Linux

- Objectives 14-2
- What Is Virtualization? 14-3
- Virtualization Concepts 14-4
- Virtualization Modes 14-5
- Linux and Xen Integration 14-7
- Running Linux in a Virtual Machine 14-8
- Oracle VM Server for X86 14-9
- Oracle VM Server for x86 Components 14-10
- Linux as a Guest OS with Oracle VM Server for X86 14-12
- Linux as a Guest OS with Oracle VM VirtualBox 14-13
- VMware vSphere 14-14
- Linux as a Guest OS with VMware vSphere 14-16
- Microsoft Hyper-V and Windows Azure 14-18
- Linux as a Guest OS with Microsoft Hyper-V and Windows Azure 14-20
- Linux as a Virtualization Provider 14-22
- libvirt 14-23

- Installing KVM and libvirt 14-24
- Getting Started with virt-manager: Connections 14-26
- Virtual Networks 14-28
- Working with Storage 14-30
- Creating Virtual Machines 14-32
- Managing the Life Cycle of a Virtual Machine 14-33
- Quiz 14-34
- Summary 14-35
- Practice 14: Overview 14-36

15 Linux Containers (LXC)

- Objectives 15-2
- Linux Containers: Introduction 15-3
- Linux Container Resource Isolation 15-4
- Linux Container Configuration File 15-6
- Required Linux Container Packages 15-8
- Linux Container Template Scripts 15-9
- lxc-create Utility 15-11
- lxc-oracle Container Template 15-13
- Starting and Stopping a Container 15-15
- lxc-start Utility 15-16
- lxc-execute Utility 15-17
- lxc-ls and lxc-info Utilities 15-19
- lxc-console Utility 15-20
- lxc-freeze and lxc-unfreeze Utilities 15-21
- lxc-cgroup Utility 15-22
- Additional Linux Container Utilities 15-23
- Using Oracle VM Template as a Base Environment 15-24
- Quiz 15-26
- Summary 15-28
- Practice 15: Overview 15-29

16 Security Enhanced Linux (SELinux)

- Objectives 16-2
- Introduction to SELinux 16-3
- SELinux Packages 16-4
- SELinux Administration GUI 16-6
- SELinux Modes 16-7
- Setting a Mode 16-8
- SELinux Policies 16-9
- SELinux Booleans 16-11

- SELinux File Labeling 16-13
- SELinux Context 16-14
- Changing the Context File Type 16-16
- Confined SELinux Users 16-18
- SELinux Utilities: Summary 16-20
- Quiz 16-22
- Summary 16-23
- Practice 16: Overview 16-24

17 Core Dump Analysis

- Objectives 17-2
- System Core Collection: Kexec and Kdump 17-3
- Kdump Configuration File 17-5
- Kdump Setup Configuration GUI 17-7
- netdump Utility 17-9
- Kernel Tuning Parameters 17-11
- Magic SysRq Keys 17-13
- crash Utility 17-14
- Downloading kernel-debuginfo RPM Packages 17-15
- Initial crash Output 17-17
- Using the crash Utility 17-18
- Symbolic Display crash Commands 17-19
- System State crash Commands 17-21
- Utility crash Commands 17-27
- Session Control crash Commands 17-28
- General Guidelines for Using crash 17-29
- Quiz 17-30
- Summary 17-33
- Practice 17: Overview 17-34

18 Dynamic Tracing with DTrace

- Objectives 18-2
- DTrace: Introduction 18-3
- Reasons to Use DTrace on Linux 18-4
- DTrace 0.4 in UEK R3 18-6
- DTrace-Enabled Applications 18-8
- ULN Channels for DTrace 0.4 18-9
- Enabling DTrace 18-10
- DTrace Probes 18-12
- DTrace Providers 18-13
- dtrace Provider 18-15

- profile Provider 18-16
- syscall Provider 18-17
- sdt Provider 18-18
- proc Provider 18-19
- sched Provider 18-20
- io Provider 18-21
- Enabling Probes 18-22
- DTrace Actions 18-24
- Built-In D Variables 18-26
- trace() Built-in Function 18-27
- DTrace: Examples 18-28
- D Scripts 18-32
- Using Predicates in a D Script 18-34
- D Script: Example 18-36
- Quiz 18-40
- Summary 18-44
- Practice 18: Overview 18-45

A Cgroup Subsystem Parameters

- cpuset Subsystem Parameters A-2
- cpu Subsystem Parameters A-4
- cpuacct Subsystem Parameters A-6
- memory Subsystem Parameters A-7
- devices Subsystem Parameters A-10
- freezer Subsystem Parameters A-11
- net_cls Subsystem Parameters A-12
- blkio Subsystem Parameters A-13
