

# **Oracle Database 11g: Administration Workshop II**

**Volume I • Student Guide**

D50079GC12

Edition 1.2

April 2009

D59862

**ORACLE®**

## **Authors**

James Womack  
Tom Best  
Donna Keesling  
James Spiller  
Maria Billings  
Gwen Lazenby

## **Technical Contributors and Reviewers**

Sharath Bhujani  
Timothy Chien  
Al Flournoy  
Andy Fortunak  
Gerlinde Frenzen  
Joel Goodman  
Magnus Isaksson  
Pete Jones  
Pierre Labrousse  
Jerry Lee  
Hakan Lindfors  
Isabelle Marchand  
Srinivas Putrevu  
Andreas Reinhardt  
Ira Singer

## **Editors**

Arijit Ghosh  
Vijayalakshmi Narasimhan  
Amitha Narayan  
Atanu Raychaudhuri  
Richard Wallis

## **Graphic Designer**

Rajiv Chandrabhanu

## **Publishers**

Pavithran S Adka  
Nita Brozowski  
Jobi Varghese  
Giri Venugopal

# Contents

## 1 Database Architecture and ASM

- Objectives 1-2
- The Oracle Database 1-3
- Oracle Database Architecture: Overview 1-4
- Connecting to the Database 1-5
- Oracle Database Server Structures 1-6
- Oracle Memory Architecture 1-7
- Process Architecture 1-9
- Process Structures 1-10
- Database Storage Architecture 1-12
- Logical and Physical Database Structures 1-14
- Tablespaces and Data Files 1-16
- SYSTEM and SYSAUX Tablespaces 1-17
- Segments, Extents, and Blocks 1-18
- Database Architecture: Summary of Structural Components 1-19
- Automatic Storage Management: Review 1-20
- ASM: General Architecture 1-22
- Creating an ASM Instance 1-23
- ASM Instance Initialization Parameters 1-24
- Starting Up an ASM Instance 1-25
- SYSASM Role 1-26
- Accessing an ASM Instance 1-27
- Using Enterprise Manager to Manage ASM Users 1-28
- Shutting Down an ASM Instance 1-29
- ASM Storage: Concepts 1-30
- ASM Disk Group 1-31
- Failure Group 1-33
- Disk Group Mirroring 1-34
- Disk Group Dynamic Rebalancing 1-35
- Managing Disk Groups 1-36
- Creating and Dropping Disk Groups 1-37
- Adding Disks to Disk Groups 1-38
- ASM Disk Group Compatibility 1-39
- ASM Disk Group Attributes 1-41
- Using Enterprise Manager to Edit Disk Group Attributes 1-42

ASM Fast Mirror Resync Overview 1-43  
Using EM to Perform Fast Mirror Resync 1-44  
Miscellaneous ALTER Commands 1-45  
ASMCMD Utility 1-46  
ASM Scalability and Performance 1-48  
Summary 1-50  
Practice 1 Overview: Database Architecture and ASM 1-51

## **2 Configuring for Recoverability**

Objectives 2-2  
Purpose of Backup and Recovery Functionality 2-3  
Typical Backup and Recovery Tasks 2-4  
Oracle Backup and Recovery Solutions 2-6  
Using Recovery Manager 2-7  
Types of RMAN Commands 2-8  
Job Commands: Example 2-9  
Configuring Your Database for Backup and Recovery Operations 2-10  
ARCHIVELOG Mode 2-11  
Configuring ARCHIVELOG Mode 2-12  
Configuring Archive Log Destinations 2-14  
Guaranteeing Archive Log Success 2-15  
Specifying a Backup Destination 2-17  
Specifying a Retention Policy 2-18  
A Recovery Window Retention Policy: Example 2-20  
Using a Flash Recovery Area 2-21  
Defining a Flash Recovery Area 2-23  
Defining a Flash Recovery Area Using Enterprise Manager 2-24  
Flash Recovery Area Space Management 2-25  
Flash Recovery Area Space Usage 2-27  
Monitoring the Flash Recovery Area 2-29  
Benefits of Using a Flash Recovery Area 2-30  
Summary 2-31  
Practice 2 Overview: Configuring for Recoverability 2-32

## **3 Using the RMAN Recovery Catalog**

Objectives 3-2  
RMAN Repository Data Storage: Comparison of Options 3-3  
Storing Information in the Recovery Catalog 3-4  
Reasons to Use a Recovery Catalog 3-5  
Creating the Recovery Catalog: Three Steps 3-6

Configuring the Recovery Catalog Database	3-7
Creating the Recovery Catalog Owner	3-8
Creating the Recovery Catalog	3-9
Managing Target Database Records in the Recovery Catalog	3-10
Registering a Database in the Recovery Catalog	3-11
Using Enterprise Manager to Register a Database	3-12
Registering a Duplicated Database	3-15
Changing the DBID of a Database	3-16
Unregistering a Target Database from the Recovery Catalog	3-17
Cataloging Additional Backup Files	3-18
Recovery Catalog Resynchronization: Concepts	3-20
Manually Resynchronizing the Recovery Catalog	3-21
Using RMAN Stored Scripts	3-22
Creating RMAN Stored Scripts	3-23
Executing RMAN Stored Scripts	3-24
Displaying RMAN Stored Script Information	3-25
Updating and Deleting RMAN Stored Scripts	3-26
Backing Up the Recovery Catalog	3-27
Re-Creating an Unrecoverable Recovery Catalog	3-28
Exporting and Importing the Recovery Catalog	3-29
Upgrading the Recovery Catalog	3-30
Dropping the Recovery Catalog	3-31
Using a Virtual Private Catalog	3-32
Creating an RMAN Virtual Private Catalog	3-34
Summary	3-36
Practice 3 Overview: Using the RMAN Recovery Catalog	3-37

#### **4 Configuring Backup Specifications**

Objectives	4-2
Using RMAN to Create Backups	4-3
Backup Destinations	4-4
Configuring Persistent Settings for RMAN	4-5
Using Enterprise Manager to Configure RMAN Settings	4-6
Control File Autobackups	4-7
Managing Persistent Settings	4-9
Configuring Devices for Backup	4-10
Configuring and Allocating Channels for Use in Backups	4-12
Configuring Backup Optimization	4-13
Summary	4-15
Practice 4 Overview: Configuring Backup Specifications	4-16

## **5 Using RMAN to Create Backups**

- Objectives 5-2
- Creating Backup Sets 5-3
- Creating Image Copies 5-4
- Creating a Whole Database Backup 5-6
- Saving Backup Space with Unused Block Compression 5-8
- RMAN Backup Types 5-9
- Fast Incremental Backup 5-11
- Enabling Fast Incremental Backup 5-12
- Monitoring Block Change Tracking 5-13
- Creating Duplexed Backup Sets 5-14
- Creating Duplexed Backup Sets Using `CONFIGURE BACKUP COPIES` 5-15
- Creating Duplexed Backup Sets Using `BACKUP COPIES` 5-16
- Creating Backups of Backup Sets 5-17
- Backing Up Read-Only Tablespaces 5-18
- Archival Backups: Concepts 5-19
- Creating Archival Backups with EM 5-21
- Creating Archival Backups with RMAN 5-22
- Managing Archival Database Backups 5-23
- Multisection Backups: Overview 5-24
- Creating RMAN Multisection Backups 5-25
- Compressing Backups 5-26
- Encrypting Backups 5-27
- Backing Up Recovery Files 5-29
- Using a Media Manager 5-30
- Performing Proxy Copies 5-32
- Creating an Oracle-Suggested Backup 5-33
- Managing Backups: Reporting 5-34
- Managing Backups: Dynamic Performance Views 5-36
- Using Enterprise Manager to View Backup Reports 5-37
- Managing Backups: Cross-Checking and Deleting 5-38
- Summary 5-39
- Practice 5 Overview: Creating Backups 5-40

## **6 Performing User-Managed Backup and Recovery**

- Objectives 6-2
- Restoring and Recovering 6-3
- Causes of File Loss 6-4
- Critical Versus Noncritical 6-5
- Losing a Tempfile 6-6
- Recovering from a Tempfile Loss 6-7

Log Group Status: Review 6-8  
Recovering from the Loss of a Redo Log Group 6-9  
Clearing a Log File 6-10  
Re-Creating Indexes 6-11  
Recovering from a Lost Index Tablespace 6-13  
Authentication Methods for Database Administrators 6-14  
Re-creating a Password Authentication File 6-15  
Comparing Complete and Incomplete Recovery 6-17  
Complete Recovery Process 6-18  
Incomplete Recovery Process 6-19  
Types of Backup and Recovery Practices 6-21  
Performing a User-Managed Backup of the Database 6-22  
The Need for Backup Mode 6-23  
Identifying Files to Manually Backup 6-24  
Manually Backing Up a NOARCHIVELOG Database 6-25  
Manually Backing Up an ARCHIVELOG Database 6-26  
Backing Up the Control File 6-27  
Performing User-Managed Complete Database Recovery: Overview 6-28  
Performing Complete Closed Database Recovery: Overview 6-29  
Identifying Recovery-Related Files 6-30  
Restoring Recovery-Related Files 6-31  
Applying Redo Data 6-33  
Performing Complete Open Database Recovery 6-34  
Performing User-Managed Incomplete Recovery: Overview 6-36  
Choosing an Incomplete Recovery Method 6-37  
Performing User-Managed Incomplete Recovery 6-38  
Performing User-Managed Incomplete Recovery: Steps 6-40  
User-Managed Time-Based Recovery: Example 6-41  
User-Managed Cancel-Based Recovery: Example 6-43  
Recovering a Read-Only Tablespace 6-45  
Recovering NOLOGGING Database Objects 6-46  
Recovering from the Loss of All Control File Copies: Overview 6-47  
Recovering the Control File to the Default Location 6-48  
Summary 6-49  
Practice 6 Overview: Performing User-Managed Recovery 6-50

## **7 Using RMAN to Perform Recovery**

Objectives 7-2  
Using RMAN RESTORE and RECOVER Commands 7-3  
Performing Recovery Using Enterprise Manager 7-4

Performing Complete Recovery: Loss of a Noncritical Data File in ARCHIVELOG Mode 7-5

Performing Complete Recovery: Loss of a System-Critical Data File in ARCHIVELOG Mode 7-6

Recovering Image Copies 7-7

Recovering Image Copies: Example 7-8

Performing a Fast Switch to Image Copies 7-10

Using SET NEWNAME for Switching Files 7-11

Performing Restore and Recovery of a Database in NOARCHIVELOG Mode 7-12

Creating Restore Points 7-13

Performing Incomplete Recovery 7-14

Performing Recovery with a Backup Control File 7-16

Restoring the Server Parameter File from the Control File Autobackup 7-17

Restoring the Control File from Autobackup 7-18

Using Incremental Backups to Recover a Database in NOARCHIVELOG Mode 7-20

Restoring and Recovering the Database on a New Host 7-21

Preparing to Restore the Database to a New Host 7-22

Restoring the Database to a New Host 7-23

Performing Disaster Recovery 7-27

Summary 7-29

Practice 7 Overview: Using RMAN to Perform Recovery 7-30

## **8 Using RMAN to Duplicate a Database**

Objectives 8-2

Using RMAN to Create a Duplicate Database 8-3

Using a Duplicate Database 8-4

Creating a Duplicate Database 8-5

Creating an Initialization Parameter File for the Auxiliary Instance 8-6

Specifying Parameters for Control File Naming 8-7

Starting the Instance in NOMOUNT Mode 8-9

Ensuring That Backups and Archived Redo Log Files Are Available 8-10

Allocating Auxiliary Channels 8-11

Using the RMAN DUPLICATE Command 8-12

Understanding the RMAN Duplication Operation 8-13

Specifying Options for the DUPLICATE Command 8-14

Using EM to Clone a Database 8-15

Cloning a Running Database 8-16

Cloning a Database from a Backup 8-20

Summary 8-21

Practice 8 Overview: Using RMAN to Duplicate a Database 8-22

## **9 Performing Tablespace Point-in-Time Recovery**

Objectives 9-2

Tablespace Point-in-Time Recovery (TSPITR): Concepts 9-3

Tablespace Point-in-Time Recovery (TSPITR): Terminology 9-4

Tablespace Point-in-Time Recovery: Architecture 9-5

When to Use TSPITR 9-7

Preparing for TSPITR 9-8

Determining the Correct Target Time 9-9

Determining the Tablespaces for the Recovery Set 9-10

Identifying Objects That Will Be Lost 9-11

Performing Basic RMAN TSPITR 9-12

Performing Fully Automated TSPITR 9-13

Using Enterprise Manager to Perform TSPITR 9-14

RMAN TSPITR Processing 9-15

Performing RMAN TSPITR with an RMAN-Managed Auxiliary Instance 9-17

Performing RMAN TSPITR Using Your Own Auxiliary Instance 9-18

Troubleshooting RMAN TSPITR 9-19

Summary 9-20

Practice 9 Overview: Performing TSPITR 9-21

## **10 Monitoring and Tuning RMAN**

Objectives 10-2

Parallelization of Backup Sets 10-3

Monitoring RMAN Sessions 10-5

Monitoring RMAN Job Progress 10-7

Interpreting RMAN Message Output 10-9

Using the `DEBUG` Option 10-10

Interpreting RMAN Error Stacks 10-11

Tuning RMAN 10-12

RMAN Multiplexing 10-14

Allocating Disk Buffers: Example 10-15

Allocating Tape Buffers 10-16

Comparing Synchronous and Asynchronous I/O 10-18

Monitoring RMAN Job Performance 10-20

Asynchronous I/O Bottlenecks 10-21

Synchronous I/O Bottlenecks 10-22

Tape Backup Speed 10-23

Tape Subsystem Performance Rules 10-24

Controlling Tape Buffer Size with <code>BLKSIZE</code>	10-25
Channel Tuning	10-26
Tuning the <code>BACKUP</code> Command	10-28
Tuning RMAN Backup Performance	10-30
Setting <code>LARGE_POOL_SIZE</code>	10-31
Tuning RMAN Tape Streaming Performance Bottlenecks	10-32
Summary	10-34
Practice 10 Overview: Monitoring and Tuning RMAN	10-35

## **11 Using Flashback Technology**

Objectives	11-2
Flashback Technology	11-3
Flashback Drop and the Recycle Bin	11-4
Recycle Bin	11-5
Restoring Tables from the Recycle Bin	11-7
Recycle Bin: Automatic Space Reclamation	11-8
Recycle Bin: Manual Space Reclamation	11-9
Bypassing the Recycle Bin	11-10
Querying the Recycle Bin	11-11
Transactions and Undo	11-12
Guaranteeing Undo Retention	11-13
Preparing Your Database for Flashback	11-14
Using Flashback Technology to Query Data	11-16
Flashback Query	11-17
Flashback Query: Example	11-18
Flashback Version Query	11-19
Using Enterprise Manager to Perform Flashback Version Query	11-20
Flashback Version Query: Considerations	11-21
Flashback Transaction Query	11-22
Using Enterprise Manager to Perform Flashback Transaction Query	11-23
Flashback Transaction Query: Considerations	11-24
Flashback Transaction	11-25
Prerequisites	11-26
Flashing Back a Transaction	11-27
Possible Workflow	11-28
Viewing Data	11-29
Flashback Transaction Wizard	11-30
Choosing Other Back-out Options	11-34
Final Steps Without EM	11-36

Summary 11-37  
Practice 11 Overview: Performing Flashback Database 11-38

## **12 Additional Flashback Operations**

Objectives 12-2  
Flashback Table: Overview 12-3  
Flashback Table 12-4  
Enabling Row Movement on a Table 12-5  
Performing Flashback Table 12-6  
Flashback Table: Considerations 12-7  
Flashback Database 12-8  
Flashback Database Architecture 12-9  
Configuring Flashback Database 12-10  
Configuring Flashback Database Using EM 12-11  
Flashback Database: Examples 12-13  
Performing Flashback Database Using EM 12-14  
Flashback Database Considerations 12-17  
Monitoring Flashback Database 12-18  
Monitoring Flashback Database with EM 12-20  
Guaranteed Restore Points 12-21  
Flashback Database and Guaranteed Restore Points 12-22  
Flashback Data Archive 12-24  
Flashback Data Archive Process 12-25  
Flashback Data Archive Scenario 12-26  
Viewing Flashback Data Archives 12-28  
Flashback Data Archive DDL Restrictions 12-29  
Summary 12-30  
Practice 12 Overview: Working with Flashback Database 12-31

## **13 Diagnosing the Database**

Objectives 13-2  
Automatic Diagnostic Workflow 13-3  
Automatic Diagnostic Repository 13-4  
The ADR Command-Line Tool, *ADRCI* 13-5  
The `V$DIAG_INFO` View 13-6  
Location for Diagnostic Traces 13-7  
Viewing the Alert Log Using Enterprise Manager 13-8  
EM Support Workbench: Overview 13-9  
Support Workbench and Oracle Configuration Manager 13-10  
EM Support Workbench Roadmap 13-11  
Problems and Incidents 13-12

Viewing Critical Error Alerts in Enterprise Manager	13-14
Viewing Problem Details	13-15
Viewing Incident Details	13-16
Creating a Service Request	13-18
Packaging and Uploading Diagnostic Data to Oracle Support	13-19
Tracking the SR	13-20
Implementing Repairs	13-21
Closing Incidents and Problems	13-22
Incident Packaging Configuration	13-23
Custom Packaging: Creating a New Package	13-24
Custom Packaging: Manipulating an Incident Package	13-25
Custom Packaging: Finalizing an Incident Package	13-26
Custom Packaging: Generating a Package	13-27
Custom Packaging: Uploading a Package	13-28
Viewing and Modifying Incident Packages	13-29
Health Monitor: Overview	13-30
Running Health Checks Manually: EM Example	13-31
Running Health Checks Manually: PL/SQL Example	13-32
Viewing HM Reports Using the ADRCI Utility	13-33
SQL Repair Advisor Overview	13-34
Using SQL Repair Advisor from PL/SQL	13-35
What Is Block Corruption?	13-36
Block Corruption Symptoms: ORA-01578	13-37
How to Handle Corruption	13-38
Verifying Block Integrity in Real Time: DB_BLOCK_CHECKING	13-39
Block Media Recovery	13-40
Prerequisites for Block Media Recovery	13-41
The RECOVER...BLOCK Command	13-42
Data Recovery Advisor	13-43
Data Recovery Advisor: RMAN Command-Line Interface	13-44
Listing of Data Failures	13-45
Advising on Repair	13-47
Executing Repairs	13-48
Classifying (and Closing) Failures	13-49
Data Recovery Advisor Views	13-50
Summary	13-51
Practice 13 Overview: Diagnosing the Database	13-52

## **14 Managing Memory**

Objectives	14-2
Memory Management: Overview	14-3

Oracle Memory Structures	14-4
Buffer Cache	14-6
Using Multiple Buffer Pools	14-8
Shared Pool	14-10
Large Pool	14-11
Java Pool	14-12
Redo Log Buffer	14-13
Automatic Shared Memory Management: Overview	14-14
How ASMM Works	14-15
Enabling Automatic Shared Memory Management	14-16
Behavior of Autotuned SGA Parameters	14-17
Behavior of Manually Tuned SGA Parameters	14-18
Using the V\$PARAMETER View	14-19
Modifying the SGA_TARGET Parameter	14-20
Disabling ASMM	14-21
Manually Resizing Dynamic SGA Parameters	14-22
Using the Memory Advisor to Size the SGA	14-23
Program Global Area (PGA)	14-24
Automatic PGA Memory Management	14-26
PGA Management Resources	14-27
Using the Memory Advisor to Size the PGA	14-28
Automatic Memory Management: Overview	14-29
Oracle Database Memory Parameters	14-30
Automatic Memory Parameter Dependency	14-31
Enabling Automatic Memory Management with EM	14-33
Monitor Automatic Memory Management	14-34
Monitoring Automatic Memory Management	14-35
Efficient Memory Usage: Guidelines	14-36
Memory Tuning Guidelines for the Library Cache	14-38
Summary	14-40
Practice 14 Overview: Using AMM to Correct a Memory Allocation Problem	14-41

## **15 Managing Database Performance**

Objectives	15-2
Tuning Activities	15-3
Performance Planning	15-4
Instance Tuning	15-6
Performance Tuning Methodology	15-7
Performance Monitoring	15-8
Performance Tuning Data	15-9
Optimizer Statistics Collection	15-10

- Oracle Wait Events 15-12
- Instance Statistics 15-13
- Monitoring Session Performance 15-15
- Displaying Session-Related Statistics 15-16
- Displaying Service-Related Statistics 15-17
- Troubleshooting and Tuning Views 15-18
- Dictionary Views 15-19
- Automatic Workload Repository 15-20
- SQL Tuning 15-22
- SQL Advisors 15-23
- Automatic SQL Tuning Results 15-24
- Implement Automatic Tuning Recommendations 15-25
- SQL Tuning Advisor: Overview 15-26
- Using the SQL Tuning Advisor 15-27
- SQL Tuning Advisor Options 15-28
- SQL Tuning Advisor Recommendations 15-29
- Using the SQL Tuning Advisor: Example 15-30
- Duplicate SQL 15-31
- SQL Access Advisor: Overview 15-32
- Typical SQL Access Advisor Session 15-33
- Workload Source 15-34
- Recommendation Options 15-35
- Reviewing Recommendations 15-37
- Database Replay 15-38
- System Architecture: Capture 15-39
- System Architecture: Processing the Workload 15-40
- System Architecture: Replay 15-41
- The Big Picture 15-42
- Workloads Supported 15-43
- Using Enterprise Manager for Workload Capture 15-44
- Using Enterprise Manager for Workload Replay 15-45
- Summary 15-46
- Practice 15 Overview: Monitor Instance Performance 15-47

## **16 Space Management**

- Objectives 16-2
- Space Management: Overview 16-3
- Free Space Management Within Segments 16-4
- Types of Segments 16-5
- Allocating Extents 16-6
- Block Space Management 16-7

Row Chaining and Migration 16-8  
Proactive Tablespace Monitoring 16-9  
Thresholds and Resolving Space Problems 16-10  
Monitoring Tablespace Space Usage 16-11  
Shrinking Segments 16-12  
Results of Shrink Operation 16-13  
Reclaiming Space Within ASSM Segments 16-14  
Segment Advisor: Overview 16-15  
Segment Advisor 16-16  
Implementing Recommendations 16-17  
Automatic Segment Advisor 16-18  
Manual Segment Shrink Using EM 16-19  
Shrinking Segments Using SQL 16-20  
Managing Resumable Space Allocation 16-21  
Using Resumable Space Allocation 16-22  
Resuming Suspended Statements 16-24  
What Operations Are Resumable? 16-26  
Transporting Tablespaces 16-27  
Concept: Minimum Compatibility Level 16-28  
Minimum Compatibility Level 16-29  
Transportable Tablespace Procedure 16-30  
Determining the Endian Format of a Platform 16-31  
Transportable Tablespaces with Enterprise Manager 16-33  
Transporting Databases 16-36  
Database Transportation Procedure: Source System Conversion 16-37  
Database Transportation Procedure: Target System Conversion 16-38  
Database Transportation: Considerations 16-39  
Summary 16-40  
Practice 16 Overview: Managing Storage 16-41

## **17 Managing Resources**

Objectives 17-2  
Database Resource Manager: Overview 17-3  
Database Resource Manager: Concepts 17-4  
Why Use Resource Manager 17-5  
Accessing Resource Plans 17-7  
Default Maintenance Resource Manager Plan 17-8  
Example: DEFAULT\_PLAN 17-9  
Creating a New Resource Plan 17-10  
Creating Consumer Groups 17-11  
Assigning Users to Consumer Groups 17-12

Specifying Resource Plan Directives 17-13  
Resource Allocation Methods for Resource Plans 17-14  
Comparison of EMPHASIS and RATIO 17-15  
Active Session Pool Mechanism 17-17  
Setting the Active Session Pool 17-18  
Specifying Thresholds: Execution Time Limit 17-20  
Setting Idle Timeouts 17-21  
Resource Consumer Group Mapping 17-22  
Activating a Resource Plan 17-24  
Database Resource Manager Information 17-25  
Monitoring the Resource Manager 17-26  
Summary 17-29  
Practice 17 Overview: Using the Resource Manager 17-30

## **18 Automating Tasks with the Scheduler**

Objectives 18-2  
Simplifying Management Tasks 18-3  
A Simple Job 18-4  
Key Components and Steps 18-5  
1. Creating a Program 18-6  
2. Creating and Using Schedules 18-7  
3. Creating and Running a Job 18-8  
4. Monitoring a Job 18-9  
Using a Time-Based or Event-Based Schedule 18-10  
Creating a Time-Based Job 18-11  
Persistent Lightweight Jobs 18-13  
Choosing the Right Job 18-14  
Creating a Single Lightweight Job 18-16  
Creating an Event-Based Schedule 18-17  
Creating Event-Based Schedules with Enterprise Manager 18-18  
Creating an Event-Based Job 18-19  
Event-Based Scheduling 18-20  
Creating Complex Schedules 18-22  
Creating Job Chains 18-23  
Example of a Chain 18-25  
1. Creating a Chain Object 18-26  
2. Defining Chain Steps 18-27  
3. Defining Chain Rules 18-28  
4. Starting the Chain 18-29  
Monitoring Job Chains 18-30

Summary 18-31

Practice 18 Overview: Automating Tasks with the Scheduler 18-32

## **19 Administering the Scheduler**

Objectives 19-2

Advanced Scheduler Features 19-3

Job Classes 19-4

Creating a Job Class 19-6

Windows 19-7

Creating a Window 19-8

Prioritizing Jobs Within a Window 19-10

Creating an Array of Lightweight Jobs 19-11

Creating Lightweight Jobs 19-12

Viewing Lightweight Jobs in Dictionary 19-14

PL/SQL APIs 19-15

Generic Scheduler Data Dictionary Views 19-16

Summary 19-18

## **20 Globalization**

Objectives 20-2

Globalization Support Features 20-3

What Every DBA Needs to Know 20-4
