Contents

I Introduction

- Overview 1-2
- Oracle Database Innovation 1-3
- Enterprise Grid Computing 1-4
- Oracle Database 11g: Focus Areas 1-5
- Management Automation 1-7
- Self-Managing Database: The Next Generation 1-8
- Suggested Additional Courses 1-9
- Further Information 1-10
- Suggested Schedule 1-11

1 Oracle Grid Infrastructure

- Objectives 1-2
- Oracle Grid Infrastructure 1-3
- Automatic Storage Management Technology Stack 1-4
- Oracle Grid Infrastructure and Oracle Database Installation: System Requirements 1-5
- Preparing the Operating System 1-6
- Setting Environment Variables 1-7
- Checking the System Requirements 1-8
- Defining Ownership of OS Devices for ASM 1-9
- Installation Scenario 1-10
- Part One: Installing the Oracle Grid Infrastructure for Stand-Alone Server 1-11
- Selecting Product Languages 1-12
- Creating an ASM Disk Group 1-13
- Defining ASM Passwords 1-14
- Defining Privileged Operating System Groups 1-15
- Specifying Installation Location 1-16
- Creating Inventory 1-17
- Performing Prerequisite Checks 1-18
- Verifying Installation Summary Data 1-19
- Monitoring Installation Progress 1-20
- Executing `root` Configuration Scripts 1-21
- Executing Configuration Assistants 1-22
- Finishing the Installation 1-23

Configuring the FRA Disk Group	1-24
Oracle Local Registry	1-25
Quiz	1-27
Practice 1-1: Overview	1-28
ASM Files and Volumes	1-29
ASM Dynamic Volume Manager (ADVM) Concepts	1-30
ASM Dynamic Volume Striping	1-31
ADVM Restrictions	1-32
Creating an ASM Dynamic Volume	1-33
Managing ASM Dynamic Volumes	1-35
Using SQL to Manage ASM Dynamic Volumes	1-36
Extending ASM CMD for ASM Dynamic Volumes	1-38
ASM Cluster File System (ACFS)	1-39
ACFS Architecture	1-40
Using Enterprise Manager to Manage ACFS	1-41
Linux/UNIX File System APIs	1-42
Linux/UNIX Extensions	1-43
Windows File System APIs	1-44
Windows Extensions	1-45
ACFS Platform-Independent Commands	1-46
ASM Cluster File System Limitations	1-47
Creating an ASM Cluster File System	1-48
ACFS Snapshots	1-49
Administering Oracle ACFS Snapshots	1-50
Quiz	1-51
Summary	1-52
Practice 1-2: Overview	1-53

2 Installation Enhancements

Objectives	2-2
Oracle Database 11g Installation: Changes	2-3
Part Two: Installing the Oracle Database Software	2-6
Choosing the Type of Installation	2-7
Choosing Grid Installation Options	2-8
Choosing Language Settings	2-9
Choosing the Database Edition	2-10
Specifying Installation Location	2-11
Choosing Operating System Groups	2-12
Performing Prerequisite Checks	2-13
Installation Summary Page	2-14
Install Product Page	2-15

Installation Finish Page 2-16
Quiz 2-17
Practice 2-1: Overview 2-18
Oracle Database 11g Release 2 Upgrade Paths 2-19
Deprecated Features in Oracle Database 11g Release 1 and Release 2 2-20
Initialization Parameter Information 2-21
Practice 2-2: Overview 2-23
Practice 2-3: Overview 2-24
Direct NFS Client: Overview 2-25
Direct NFS Configuration 2-27
Monitoring Direct NFS 2-29
Online Patching: Overview 2-30
Installing an Online Patch 2-31
Benefits of Online Patching 2-32
Conventional Patching and Online Patching 2-33
Online Patching Considerations 2-34
Quiz 2-36
Summary 2-37
Practice 2-4: Overview 2-38

3 Oracle Restart

Objectives 3-2
Oracle Restart 3-3
Oracle Restart Process Startup 3-5
Controlling Oracle Restart 3-6
Choosing the Correct SRVCTL Utility 3-8
Oracle Restart Configuration 3-9
Using the SRVCTL Utility 3-10
Obtaining Help for the SRVCTL Utility 3-11
Starting Components by Using the SRVCTL Utility 3-12
Stopping Components by Using the SRVCTL Utility 3-13
Viewing Component Status 3-14
Displaying the Oracle Restart Configuration for a Component 3-15
Manually Adding Components to the Oracle Restart Configuration 3-16
Quiz 3-17
Summary 3-18
Practice 3-1: Overview 3-19

4 ASM Enhancements

Objectives 4-2
Without ASM Fast Mirror Resync 4-3

ASM Fast Mirror Resync: Overview 4-4
Using Enterprise Manager to Perform Fast Mirror Resync 4-5
Setting Up ASM Fast Mirror Resync 4-7
ASM Preferred Mirror Read: Overview 4-9
ASM Preferred Mirror Read: Setup 4-10
Enterprise Manager ASM Configuration Page 4-11
ASM Preferred Mirror Read: Best Practice 4-12
Quiz 4-13
ASM Scalability and Performance Enhancements 4-14
ASM Scalability in Oracle Database 11g 4-16
SYSASM Privilege 4-17
Using Enterprise Manager to Manage ASM Users 4-18
ASM Disk Group Compatibility 4-19
ASM Disk Group Attributes 4-21
Using Enterprise Manager to Edit Disk Group Attributes 4-22
Enhanced Disk Group Checks 4-23
Restricted Mount Disk Group for Fast Rebalance 4-24
Mount Force Disk Group 4-25
Forcing Disk Group Drop 4-27
ASMCMD Extensions in Oracle Database 11g Release 1 4-28
ASMCMD Command Extensions 4-30
ASMCMD Extensions: Example 4-31
Quiz 4-32
ASM ACLs 4-33
ASM ACLs Prerequisites 4-34
Managing ASM ACLs by Using SQL Commands 4-36
Managing ASM ACLs by Using ASMCMD Commands 4-37
Managing ASM ACLs by Using Enterprise Manager 4-38
ASM Intelligent Data Placement 4-40
Managing ASM Intelligent Data Placement Examples 4-41
Managing ASM Intelligent Data Placement 4-42
ASM Intelligent Data Placement Best Practices 4-44
Viewing ASM Intelligent Data Placement Information 4-45
Quiz 4-47
Summary 4-48
Practice 4: Overview 4-49

5 Storage Enhancements

Objectives 5-2
Supporting 4 KB Sector Disks 5-3

Using 4 KB Sector Disks 5-4
Specifying the Disk Sector Size 5-5
Using the `SECTOR_SIZE` Clause 5-6
Creating a Database with 4 KB Sector Disks 5-7
Specifying `BLOCKSIZE` 5-8
Determining Your Log File Block Size 5-9
Performing an Offline Migration to 4 KB Disks 5-10
Quiz 5-12
Table Compression: Overview 5-13
Table Compression Concepts 5-14
Compressing Table Data 5-15
Using OLTP Compression 5-17
Using the Compression Advisor 5-18
Viewing Table Compression Information 5-19
SQL Access Advisor: Overview 5-20
SQL Access Advisor: Usage Model 5-21
Possible Recommendations 5-22
Using SQL Access Advisor 5-23
SQL Access Advisor: PL/SQL Procedure Flow 5-24
SQL Access Advisor: PL/SQL Example 5-25
Temporary Tablespace Shrink 5-26
`DBA_TEMP_FREE_SPACE` 5-27
Tablespace Option for Creating Temporary Table 5-28
Segment Creation on Demand 5-29
Creating Tables Without Segments 5-30
Controlling Deferred Segment Creation 5-31
Restrictions and Exceptions 5-32
Additional Automatic Functionality 5-33
Quiz 5-34
Summary 5-35
Practice 5: Overview 5-36

6 Data Warehouse and Partitioning Enhancements

Objectives 6-2
Preprocessing Data for `ORACLE_LOADER` Access Driver in External Tables 6-3
Windows Example 6-4
Example of Preprocessing 6-5
`EXECUTE` Privilege for Directory Objects 6-7
Security Implications 6-8
Securing the `ORACLE_LOADER` Access Driver 6-10

Considerations and Usage Notes	6-12
Quiz	6-13
Review: Degree of Parallelism (DOP)	6-14
Review: PARALLEL Clause	6-16
Goal: Simplifying Parallel Execution	6-17
Automatic Degree Of Parallelism Determination	6-18
Summary of Changes to Parameters	6-19
Using PARALLEL_MIN_TIME_THRESHOLD	6-20
Using PARALLEL_DEGREE_POLICY	6-21
Using PARALLEL_DEGREE_LIMIT	6-23
Using PARALLEL_FORCE_LOCAL	6-25
Changes to Existing Parameters	6-26
Parallel Hints Are Now at the Statement Level	6-27
Implication of Statement-Level Parallel Hints	6-28
EXPLAIN PLAN Enhancements	6-29
Enhanced Explain Plan Example	6-30
In-Memory Parallel Query	6-31
Quiz	6-32
Oracle Partitioning	6-33
Partitioning Enhancements	6-34
Interval Partitioning	6-35
Interval Partitioning: Example	6-36
Moving the Transition Point: Example	6-37
System Partitioning	6-39
System Partitioning: Example	6-40
System Partitioning: Guidelines	6-41
System-Managed Indexes for List Partitioning	6-42
Virtual Column–Based Partitioning	6-43
Virtual Column–Based Partitioning: Example	6-44
Reference Partitioning	6-45
Reference Partitioning: Benefit	6-46
Reference Partitioning: Example	6-47
Composite Partitioning Enhancements	6-48
Range-Range Partitioning: Example	6-49
Summary	6-50
Practice 6: Overview	6-51
7 Oracle SecureFiles	
Objectives	7-2
Managing Enterprise Information	7-3

- Issues with Existing LOB Implementation 7-4
- Oracle SecureFiles 7-5
- Enabling SecureFiles Storage 7-6
- SecureFiles: Storage Options 7-7
- SecureFiles: Advanced Features 7-8
- Creating SecureFiles 7-9
- Creating SecureFiles Using Enterprise Manager 7-10
- Shared I/O Pool 7-11
- Altering SecureFiles 7-12
- Quiz 7-13
- What Is SecureFile Compression? 7-14
- Compression Modes 7-15
- Creating a SecureFile LOB with LOW Compression 7-16
- Configuration Parameters 7-17
- Quiz 7-18
- Accessing SecureFiles Metadata 7-19
- Migrating to SecureFiles 7-20
- SecureFiles Migration: Example 7-21
- SecureFiles Monitoring 7-22
- Summary 7-23
- Practice 7: Overview 7-24

8 Security and Networking Enhancements

- Objectives 8-2
- Secure Password Support 8-3
- Automatic Secure Configuration 8-4
- Password Configuration 8-5
- Enable Built-in Password Complexity Checker 8-6
- Managing Default Audits 8-7
- Audited Privileges 8-8
- Setting Security Parameters 8-9
- Setting Database Administrator Authentication 8-11
- Quiz 8-12
- Transparent Data Encryption 8-13
- Hardware Security Module 8-14
- Using Tablespace Encryption 8-15
- Tablespace Encryption New Features 8-16
- Tablespace Master Key Re-Key 8-17
- Quiz 8-18
- Enterprise Manager Security Management 8-19
- Using RMAN Security Enhancements 8-20

Managing Fine-Grained Access to External Network Services	8-21
Supporting IPv6 Address Notification	8-23
Connecting to the Oracle Database	8-24
IPv6 Supported in Java Interfaces	8-25
Summary	8-26
Practice 8: Overview	8-27
9 SQL Performance Analyzer	
Objectives	9-2
Challenges Faced by DBAs When Performing Changes	9-3
Change Is the Only Constant	9-4
Change Management in Oracle Database 11g	9-5
Lifecycle of Change Management	9-6
SQL Performance Analyzer: Overview	9-8
SQL Performance Analyzer: Use Cases	9-9
Using SQL Performance Analyzer	9-10
Step 1: Capture SQL Workload	9-11
Step 2: Transport to a Test System	9-12
Step 3: Build Before Change Performance Data	9-13
Step 4: Implement Planned Change and Step 5: Build After-Change Performance Data	9-14
Step 6: Compare and Analyze Performance and Step 7: Tune Regressed SQL	9-15
Quiz	9-16
Accessing SQL Performance Analyzer	9-17
Using Enterprise Manager to Access SQL Performance Analyzer	9-18
SQL Performance Analyzer: PL/SQL Example	9-19
Tuning Regressed SQL Statements	9-21
Testing Database Upgrades: Oracle9i Database and Oracle Database 10g Release 1	9-22
Testing Database Upgrades: Oracle Database 10g Release 2 and Later Releases	9-25
SQL Performance Analyzer: Data Dictionary Views	9-28
Summary	9-29
Practice 9: Overview	9-30
10 SQL Plan Management	
Objectives	10-2
SQL Plan Management: Overview	10-3
SQL Plan Baseline: Architecture	10-4
Loading SQL Plan Baselines	10-6
Evolving SQL Plan Baselines	10-7

Viewing Important Baseline SQL Plan Attributes 10-8
Important Baseline SQL Plan Attributes 10-9
SQL Plan Selection 10-10
Quiz 10-12
Possible SQL Plan Manageability Scenarios 10-13
SQL Performance Analyzer and SQL Plan Baseline Scenario 10-14
Loading a SQL Plan Baseline Automatically 10-15
Purging SQL Management Base Policy 10-16
Enterprise Manager and SQL Plan Baselines 10-17
Using the `MIGRATE_STORED_OUTLINE` Functions 10-18
Summary 10-19
Practice 10: Overview 10-20

11 Database Replay

Objectives 11-2
Why Use Database Replay? 11-3
Using Database Replay 11-4
The Big Picture 11-5
System Architecture: Capture 11-6
System Architecture: Preprocessing the Workload 11-7
System Architecture: Replay 11-8
Prechange Production System 11-9
Supported Workloads 11-10
Capture Considerations 11-11
Replay Considerations 11-12
Replay Options 11-14
Workload Replay Filters 11-16
Replay Analysis 11-18
Quiz 11-20
Database Replay Workflow in Enterprise Manager 11-21
Accessing Database Replay 11-22
Packages and Procedures 11-23
Database Replay: PL/SQL Example 11-24
Data Dictionary Views: Database Replay 11-26
Calibrating Replay Clients 11-27
Summary 11-28
Practice 11: Overview 11-29

12 Automatic SQL Tuning

Objectives 12-2
SQL Tuning in Oracle Database 10g 12-3

Automatic SQL Tuning in Oracle Database 11g 12-4
Summary of Automation in Oracle Database 11g 12-5
Selecting Potential SQL Statements for Tuning 12-6
Maintenance Window Timeline 12-7
Automatic Tuning Process 12-8
Controlling the Automatic SQL Tuning Task 12-10
Example: Controlling the Automatic SQL Tuning Task 12-11
Automatic SQL Tuning Task 12-12
Configuring Automatic SQL Tuning 12-13
Automatic SQL Tuning Result Summary 12-14
Quiz 12-15
Automatic SQL Tuning: Fine Tune 12-16
Using the PL/SQL Interface to Generate Reports 12-18
Automatic SQL Tuning Considerations 12-19
Summary 12-20
Practice 12: Overview 12-21

13 Intelligent Infrastructure Enhancements

Objectives 13-2
Using New and Enhanced Automatic Workload Repository Views 13-3
Comparative Performance Analysis with AWR Baselines 13-4
Automatic Workload Repository Baselines 13-5
Moving Window Baseline 13-6
Baseline Display Options 13-7
Baseline Templates 13-8
Creating AWR Baselines 13-9
DBMS_WORKLOAD_REPOSITORY Package 13-10
Generate a Baseline Template for a Single Time Period 13-11
Creating a Repeating Baseline Template 13-12
Baseline Views 13-13
Quiz 13-14
Performance Monitoring and Baselines 13-15
Defining Alert Thresholds Using Static Baseline 13-17
Using Enterprise Manager to Quickly Configure Adaptive Thresholds 13-18
Practice 13-1: Overview 13-19
Maintenance Windows 13-20
Default Maintenance Plan 13-21
Automated Maintenance Task Priorities 13-22
Controlling Automatic Maintenance Tasks 13-23
Quiz 13-24
Important I/O Metrics for Oracle Databases 13-25

I/O Calibration and Enterprise Manager 13-27
I/O Calibration and the PL/SQL Interface 13-28
I/O Statistics: Overview 13-30
I/O Statistics and Enterprise Manager 13-32
Practices 13-2 and 13-3: Overview 13-34
Resource Manager Enhancements 13-35
Resource Manager Enhancements: Database Consolidation 13-36
Fixed Policy CPU Resource Management 13-37
Limiting CPU Utilization 13-38
Resource Manager Enhancements: Server Consolidation 13-39
Instance Caging 13-40
Instance Caging Examples 13-41
Enabling Instance Caging 13-42
Monitoring Instance Caging 13-43
Quiz 13-44
Resource Manager: Changes to `DBMS_RESOURCE_MANAGER` 13-45
Resource Manager: New Enterprise Manager Interface 13-46
Resource Plans Created by Default 13-47
Default Plan 13-48
I/O Resource Limit Thresholds 13-49
Resource Manager Statistics 13-50
Summary 13-51

14 Diagnosability Enhancements

Objectives 14-2
Oracle Database 11g Fault Management 14-3
Ease Diagnosis: Automatic Diagnostic Workflow 14-4
Automatic Diagnostic Repository 14-5
ADRCI: The ADR Command-Line Tool 14-7
`V$DIAG_INFO` 14-8
Location for Diagnostic Traces 14-9
Viewing the Alert Log Using Enterprise Manager 14-10
Viewing the Alert Log Using ADRCI 14-11
Quiz 14-13
Problems and Incidents 14-14
Incident Packaging Service (IPS) 14-17
Incident Packages 14-18
Enterprise Manager Support Workbench: Overview 14-20
Enterprise Manager Support Workbench Roadmap 14-21
View Critical Error Alerts in Enterprise Manager 14-22
Package and Upload Diagnostic Data to Oracle Support 14-23

- Track the SR and Implement Repairs 14-24
- Creating User-Reported Problems 14-25
- Enterprise Manager Support Workbench for ASM 14-26
- Invoking IPS Using `ADRCI` 14-27
- Quiz 14-29
- Health Monitor: Overview 14-30
- Running Health Checks Manually: Enterprise Manager Example 14-32
- Running Health Checks Manually: PL/SQL Example 14-33
- Viewing HM Reports Using the `ADRCI` Utility 14-34
- SQL Repair Advisor: Overview 14-35
- Accessing the SQL Repair Advisor Using Enterprise Manager 14-36
- Viewing, Disabling, or Removing a SQL Patch 14-37
- Using SQL Repair Advisor from PL/SQL: Example 14-38
- Using the SQL Test Case Builder 14-39
- Quiz 14-40
- Summary 14-41
- Practice 14: Overview 14-42

15 Real-Time SQL Monitoring

- Objectives 15-2
- SQL Monitoring 15-3
- SQL Monitoring in Oracle Database 11g Release 2 15-5
- SQL Monitoring with Enterprise Manager Database Control 15-6
- Monitored SQL Executions 15-7
- SQL Monitoring List 15-8
- Monitored SQL Execution Details 15-9
- SQL Execution Details for Parallel Queries 15-10
- Details for Parallel Execution 15-11
- Activity Details for Parallel Execution 15-12
- Viewing Session Details 15-13
- SQL Details 15-14
- Viewing the SQL Monitoring Report 15-15
- Quiz 15-16
- Summary 15-17
- Practice 15-1: Overview 15-18

16 Performance Enhancements

- Objectives 16-2
- Using the `DBMS_ADDM` Package 16-3
- Advisor Named Findings and Directives 16-6

Modified Advisor Views 16-7
New ADDM Views 16-8
Quiz 16-9
Review: Oracle Database 10g SGA Parameters 16-10
Review: Oracle Database 10g PGA Parameters 16-11
Oracle Database Memory Advisors 16-13
Automatic Memory Management: Overview 16-15
Oracle Database 11g Memory Parameters 16-17
Automatic Memory Parameter Dependency 16-18
Enabling Automatic Memory Management 16-20
Monitoring Automatic Memory Management 16-21
DBCA and Automatic Memory Management 16-23
Quiz 16-24
DB Smart Flash Cache Overview 16-25
Using DB Smart Flash Cache 16-26
DB Smart Flash Cache Architecture Overview 16-27
Configuring DB Smart Flash Cache 16-28
Sizing DB Smart Flash Cache 16-30
Specifying DB Smart Flash Cache for a Table 16-31
Statistic Preferences: Overview 16-32
Using New Statistic Preferences Features 16-33
Setting Global Preferences with Enterprise Manager 16-34
Partitioned Tables and Incremental Statistics: Overview 16-35
Hash-Based Sampling for Column Statistics 16-37
Multicolumn Statistics: Overview 16-39
Expression Statistics: Overview 16-41
Deferred Statistics Publishing: Overview 16-42
Deferred Statistics Publishing: Example 16-44
Quiz 16-45
Locking Enhancements 16-46
Identify Foreground and Background Process Events 16-47
Summary 16-48
Practice 16: Overview 16-49

17 Application Performance Enhancements

Objectives 17-2
Online Redefinition Enhancements 17-3
Fine-Grained Dependency Management 17-4
Minimizing Dependent Recompilations 17-5
More Precise Dependency Metadata 17-6
Managing Dependencies 17-7

- Usage Guidelines to Reduce Invalidation 17-9
- Invisible Index: Overview 17-10
- Invisible Indexes: Examples 17-11
- Adaptive Cursor Sharing: Overview 17-12
- Adaptive Cursor Sharing: Architecture 17-13
- Adaptive Cursor Sharing Views 17-15
- Interacting with Adaptive Cursor Sharing 17-16
- SQL Query Result Cache: Overview 17-17
- Setting Up SQL Query Result Cache 17-18
- Managing the SQL Query Result Cache 17-19
- Using the `RESULT_CACHE` Hint 17-20
- In-Line View: Example 17-21
- Using Table Annotation to Control Result Caching 17-22
- Using the `DBMS_RESULT_CACHE` Package 17-23
- Viewing SQL Result Cache Dictionary Information 17-24
- SQL Query Result Cache: Considerations 17-25
- Quiz 17-27
- OCI Client Query Cache 17-28
- Using Client-Side Query Cache 17-29
- PL/SQL Function Cache 17-30
- Using PL/SQL Function Cache 17-31
- PL/SQL Function Cache: Considerations 17-32
- PL/SQL and Java Native Compilation Enhancements 17-33
- Setting Up and Testing PL/SQL Native Compilation 17-34
- Recompiling the Entire Database for PL/SQL Native Compilation 17-35
- Summary 17-37
- Practice 17: Overview 17-38

18 Backup and Recovery Enhancements

- Objectives 18-2
- Using New `SET NEWNAME` Clauses 18-3
- Substitution Variables for `SET NEWNAME` 18-4
- Using `SET NEWNAME FOR DATABASE` 18-5
- Using `SET NEWNAME FOR TABLESPACE` 18-6
- Performance Enhancements 18-7
- Improved Block Corruption Detection 18-8
- Using New Settings for Binary Compression 18-9
- Using New Compression Algorithm Settings 18-10
- Optimized Backups 18-11

Parallel Backup and Restore for Very Large Files 18-13
Using RMAN Multisection Backups 18-14
Quiz 18-15
Duplicating a Database 18-16
Performing Active Database Duplication 18-17
The RMAN `DUPLICATE` Command 18-18
Creating a Standby Database with the `DUPLICATE` Command 18-19
Enhancements to Database Duplication 18-20
Targetless `DUPLICATE` 18-21
Using Targetless `DUPLICATE` 18-22
Using New `DUPLICATE` Command Options 18-23
`DUPLICATE ... [SKIP] TABLESPACE` Enhancements 18-24
Using RMAN to Create Archival Backups 18-25
Managing Archival Database Backups 18-26
Creating Archival Backups 18-27
Easier Recovery from Loss of Server Parameter File 18-28
TSPITR Enhancements and Modifications 18-29
Identifying Relationships that Span Recovery Set Boundaries 18-30
Using Image Copies for Faster TSPITR Performance 18-31
Quiz 18-32
Managing Recovery Catalogs 18-33
The `IMPORT CATALOG` Command 18-35
Creating and Using Virtual Private Catalogs 18-37
Using RMAN Virtual Private Catalogs 18-38
Quiz 18-40
Summary 18-41
Practice 18: Overview Using RMAN Enhancements 18-42

19 Flashback Technology, LogMiner, and Data Pump Enhancements

Objectives 19-2
Flashback Data Archive: Overview 19-3
Flashback Data Archive: Architecture 19-5
Preparing Your Database 19-6
Flashback Data Archive: Workflow 19-10
Using Flashback Data Archive 19-11
Configuring a Default Flashback Data Archive 19-12
Filling the Flashback Data Archive Space 19-13
Maintaining Flashback Data Archives 19-14
Flashback Data Archive: Examples 19-15
Flashback Data Archive: DDL Restrictions 19-16

Flashback Data Archive: Supporting Transparent Schema Evolution	19-17
Flashback Data Archive: Supporting Full Schema Evolution	19-18
Viewing Flashback Data Archives	19-19
Guidelines and Usage Tips	19-20
Quiz	19-21
Flashback Transaction Backout	19-22
Prerequisites	19-23
Flashing Back a Transaction	19-24
Using the Flashback Transaction Wizard	19-25
Using the <code>DBMS_FLASHBACK.TRANSACTION_BACKOUT</code> Procedure	19-26
Viewing a Dependency Report	19-27
Viewing Flashback Transaction Metadata	19-28
Quiz	19-29
Flashback Database Enhancements	19-30
Using LogMiner	19-31
Review: Data Pump Export and Import	19-32
Migration with Data Pump Legacy Mode	19-33
Data Pump Legacy Mode	19-34
Managing File Locations	19-36
Quiz	19-37
Summary	19-38
Practice 19: Overview Using Flashback Technology	19-39

20 Data Recovery Advisor

Objectives	20-2
Repairing Data Failures	20-3
Data Recovery Advisor	20-4
Assessing Data Failures	20-7
Data Failures	20-8
Data Failure: Examples	20-9
Data Recovery Advisor RMAN Command-Line Interface	20-10
Listing Data Failures	20-11
Advising on Repair	20-13
Executing Repairs	20-14
Classifying (and Closing) Failures	20-15
Quiz	20-16
Data Recovery Advisor Views	20-17
Best Practice: Proactive Checks	20-18
Setting Parameters to Detect Corruption	20-19
Summary	20-21
Practice 20: Overview Repairing Failures	20-22

Appendix A: Practices and Solutions

Appendix B: Scheduler Enhancements

- Objectives B-2
- Lightweight Jobs B-3
- Choosing the Right Job B-4
- Scheduler Email Notification: Overview B-5
- Using Scheduler Email Notification B-6
- Setting the `email_server` Attribute B-7
- Setting the `email_sender` Attribute B-8
- Using `ADD_JOB_EMAIL_NOTIFICATION` B-9
- Using `REMOVE_JOB_EMAIL_NOTIFICATION` B-11
- Email Notification: New Dictionary Views B-12
- Scheduler File Watcher: Overview B-13
- Creating a File Watcher and an Event-Based Job B-14
- Step 1: Creating a Scheduler Credential Object B-15
- Step 2: Creating a File Watcher B-16
- Using `DBMS_SCHEDULER.CREATE_FILE_WATCHER` B-17
- Step 3: Creating a Scheduler Program Object B-18
- Using the `SCHEDULER_FILEWATCHER_RESULT` Object Type B-20
- Using the `SCHEDULER_FILEWATCHER_REQUEST` Object Type B-21
- Step 4: Creating an Event-Based Job that References the File Watcher B-22
- Step 5: Enabling the Objects B-23
- Enabling File Arrival Events from Remote Systems B-24
- Using `DBMS_SCHEDULER.DROP_FILE_WATCHER` B-25
- File Watcher: Changes to Existing `DBMS_SCHEDULER` Procedures B-26
- File Watcher: Changes to Existing Attributes B-27
- File Watcher: New Dictionary Views B-28
- File Watcher: New Columns in Existing Views B-29
- Scheduler Remote Database Jobs: Overview B-30
- Using `CREATE_DATABASE_DESTINATION` B-31
- Using `DROP_DATABASE_DESTINATION` B-32
- Creating Remote Database Jobs: Configuration B-33
- Setting Up the Database for Remote Jobs B-34
- Creating Remote Database Jobs B-35
- Scheduler Multiple Destination Jobs: Overview B-36
- Scheduler Multiple Destination Jobs: Terminology B-37
- Scheduler Multiple Destination Job States B-38
- Creating Multiple Destination Jobs B-39

Using Destination Groups for Multiple Destination Jobs	B-40
Using CREATE_GROUP	B-41
Using ADD_GROUP_MEMBER	B-42
Using DROP_GROUP	B-43
Using REMOVE_GROUP_MEMBER	B-44
Modifications to Existing DBMS_SCHEDULER Procedures	B-45
Multiple Destination Jobs: New Dictionary Views	B-46
Multiple Destination Jobs: New Columns in Existing Dictionary Views	B-47
Summary	B-48

Appendix C: Oracle Secure Backup Cloud Module

Objectives	C-2
Oracle Database Backup in the Cloud	C-3
Introducing Oracle Secure Backup Cloud Module	C-4
Advantages of Backing Up to the Cloud	C-5
What Is Amazon Simple Storage Service (S3)?	C-6
Installing the Oracle Secure Backup Cloud Module	C-7
Summary	C-8
