Contents

1 Introduction

- Course Objectives 1-2
- Course Units 1-6
- Unit 1: Product Overview 1-7
- Unit 2: Installing, Configuring, and Launching Oracle Identity Manager 1-8
- Unit 3: Managing Users, User Entities, and Resources 1-9
- Unit 4: Handling Reconciliation Workflows 1-11
- Unit 5: Constructing Reports 1-12
- Unit 6: Using Attestation 1-13
- Unit 7: Modifying Oracle Identity Manager 1-14
- Unit 8: Deploying Resources 1-15
- Summary 1-16

2 Identity Management: Overview

- Objectives 2-2
- Defining Identity Management 2-3
- Benefits of Identity Management 2-5
- Identity Management Terminology 2-7
- Identity Management Functions 2-10
- Access Management 2-11
- Audit and Compliance 2-13
- Directory Services 2-15
- Identity Administration 2-16
- Suite Management 2-18
- Summary 2-19

3 Understanding Oracle Identity Manager

- Objectives 3-2
- Oracle Identity and Access Management Products 3-4
- Oracle Identity Manager 3-6
- Solving Business Challenges 3-10
- Oracle Identity Manager Architecture 3-12
- Oracle Identity Manager Architecture: Advantages 3-13
- Oracle Identity Manager Architecture: Tiers 3-17
- Tier 1: Presentation Tier 3-18
- Tier 2: Business Logic Tier 3-20

- Tier 3: Data Access Tier 3-24
- Reconciliation and Provisioning: Overview 3-28
- Reconciliation: Types 3-29
- Reconciliation: Events 3-31
- Provisioning: Actions 3-34
- Trusted Source Reconciliation: Conceptual Diagram 3-37
- Target Resource Reconciliation: Conceptual Diagram 3-38
- Oracle Identity Manager Connector: Overview 3-39
- Oracle Identity Manager Connector: Components 3-40
- Constructing an Oracle Identity Manager Connector: Step 1 3-43
- Constructing an Oracle Identity Manager Connector: Step 2 3-45
- Constructing an Oracle Identity Manager Connector: Step 3 3-47
- Constructing an Oracle Identity Manager Connector: Step 4 3-49
- Constructing an Oracle Identity Manager Connector: Step 5 3-51
- Constructing an Oracle Identity Manager Connector: Step 6 3-53
- Constructing an Oracle Identity Manager Connector: Step 7 3-55
- Constructing an Oracle Identity Manager Connector: Step 8 3-57
- Summary 3-59

4 Configuring Oracle Application Server

- Objectives 4-2
- Setting Oracle Application Server Environment Variables 4-3
- Specifying an RMI Port for Oracle Identity Manager 4-6
- Starting and Stopping Application Server–Specific Processes 4-8
- Summary 4-10
- Practice 4 Overview: Configuring Oracle Application Server 4-11

5 Installing and Configuring Oracle Identity Manager

- Objectives 5-2
- Preparing a Database for Oracle Identity Manager 5-4
- Oracle Identity Manager Diagnostic Dashboard (Preinstallation) 5-7
- Launching the Oracle Identity Manager Diagnostic Dashboard 5-10
- Using the Oracle Identity Manager Diagnostic Dashboard (Preinstallation) 5-11
- Installing Oracle Identity Manager Server 5-13
- Installing Oracle Identity Manager Server: Steps 1–6 5-14
- Installing Oracle Identity Manager Server: Steps 7–9 5-15
- Installing Oracle Identity Manager Server: Step 10 5-16
- Installing Oracle Identity Manager Server: Step 11 5-17
- Installing Oracle Identity Manager Server: Step 12 5-18
- Installing Oracle Identity Manager Server: Steps 13–14 5-19
- Installing Oracle Identity Manager Server: Step 15 5-20

Installing Oracle Identity Manager Server: Steps 16–19 5-21
Installing the Oracle Identity Manager Design Console 5-22
Installing the Oracle Identity Manager Design Console: Steps 1–5 5-23
Installing the Oracle Identity Manager Design Console: Steps 6–7 5-24
Installing the Oracle Identity Manager Design Console: Step 8 5-25
Installing the Oracle Identity Manager Design Console: Step 9 5-26
Installing the Oracle Identity Manager Design Console: Steps 10–13 5-27
Performing Postinstallation Tasks for Oracle Identity Manager 5-29
Making the Oracle Identity Manager Design Console Functional 5-30
Oracle Identity Manager Diagnostic Dashboard (Postinstallation) 5-32
Diagnostic Dashboard: Postinstallation Checks 5-33
Diagnostic Dashboard: Reports 5-36
Using the Oracle Identity Manager Diagnostic Dashboard (Postinstallation) 5-37
Summary 5-38
Practice 5 Overview: Installing and Configuring Oracle Identity Manager 5-40

6 Starting and Understanding Oracle Identity Manager Consoles

Objectives 6-2
Launching Oracle Identity Manager Server 6-3
Launching the Oracle Identity Manager Administrative and User Console 6-4
Launching the Oracle Identity Manager Design Console 6-6
Oracle Identity Manager Consoles 6-7
Design Console: User Management Folder 6-9
Design Console: Resource Management Folder 6-11
Design Console: Process Management Folder 6-13
Design Console: Administration Folder 6-14
Design Console: Development Tools Folder 6-16
Administrative and User Console: My Account Folder 6-18
Administrative and User Console: My Resources Folder 6-19
Administrative and User Console: Requests Folder 6-20
Administrative and User Console: To-Do List Folder 6-22
Administrative and User Console: Users Folder 6-24
Administrative and User Console: Organizations Folder 6-25
Administrative and User Console: User Groups Folder 6-26
Administrative and User Console: Access Policies Folder 6-28
Administrative and User Console: Resource Management Folder 6-29
Administrative and User Console: Deployment Management Folder 6-30
Administrative and User Console: Reports Folder 6-31
Administrative and User Console: Generic Technology Connector Folder 6-32
Administrative and User Console: Attestation Folder 6-33
Administrative and User Console: Help Folder 6-34

Summary 6-35

Practice 6 Overview: Starting and Understanding Oracle Identity Manager Consoles 6-36

7 Managing Users and User Entities

Objectives 7-2

Oracle Identity Manager Users: Three Types 7-4

Oracle Identity Manager User Entities: Two Types 7-6

Users and User Entities: Relationships 7-7

Creating Users and User Entities 7-8

Creating an Organization 7-9

Creating a User 7-11

Creating User Groups 7-13

Assigning a User to a User Group 7-14

Resetting Your Password and Viewing Your Profile: Steps 1–5 7-16

Resetting Your Password and Viewing Your Profile: Step 6 7-17

Modifying Your Profile 7-18

Changing Your Challenge Questions and Answers 7-19

Proxies: Overview 7-21

Assigning a Proxy 7-22

Modifying a Proxy 7-23

Removing a Proxy 7-24

Viewing Your Resources 7-25

Viewing Your Requests 7-26

Summary 7-27

Practice 7 Overview: Managing Users and User Entities 7-28

8 Using Predefined Connectors

Objectives 8-2

Oracle Identity Manager Connectors: Overview 8-4

Transferring Oracle Identity Manager Connectors: Ways 8-5

Transferring Oracle Identity Manager Connectors: Advantages 8-7

Transferring Oracle Identity Manager Connectors: Best Practices 8-8

Types of Oracle Identity Manager Connectors 8-11

Deployment Manager: Overview 8-14

Using Oracle Identity Manager Connectors: Setup 8-17

Using Oracle Identity Manager Connectors: Run Time 8-21

Step 1: Verifying Installation and Deployment Requirements 8-22

Step 2: Configuring the External Resource 8-23

Step 3: Copying Connector and External Code Files 8-24

Copying Connector Files: Sun Java System Directory Server 8-26

Step 4: Configuring Oracle Identity Manager Server 8-31

Configuring Oracle Identity Manager Server: Clearing the Server Cache	8-32
Configuring Oracle Identity Manager Server: Enabling Logging	8-33
Step 5: Importing an Oracle Identity Manager Connector	8-35
Step 6: Recompiling Adapters	8-37
Step 7: Defining an IT Resource	8-39
Step 8: Configuring Reconciliation Workflows	8-41
Step 9: Configuring Provisioning Workflows	8-46
Step 10: Assigning the Connector to a User	8-48
Step 11: Completing the Custom Process Form	8-50
Step 12: Accessing the Resource	8-51
Summary	8-52
Practice 8 Overview: Using Predefined Connectors	8-53

9 Assigning Oracle Identity Manager Connectors to Users

Objectives	9-2
Resources	9-3
Types of Resources	9-4
Oracle Identity Manager Connectors	9-6
Differences Between Connectors and Resources	9-7
Assigning Connectors to Users: Overview	9-8
Assigning Connectors to Users: Criteria	9-9
Assigning Connectors to Users: Request	9-10
Assigning Connectors to Users: Direct Provisioning	9-11
Using Criteria to Assign a Connector to a User	9-12
Step 1: Creating an Autogroup Membership Rule	9-13
Step 2: Assigning an Autogroup Membership Rule to a User Group	9-15
Step 3: Building an Access Policy	9-16
Using a Request to Assign a Connector to a User	9-18
Direct Provisioning a Connector to a User	9-20
Summary	9-22
Practice 9 Overview: Assigning Oracle Identity Manager Connectors to Users	9-23

10 Provisioning User Resources Manually

Objectives	10-2
Workflow Renderer: Overview	10-3
Viewing a Graphical Representation of a Provisioning Workflow	10-4
Workflow Renderer: High-Level Information	10-6
Workflow Renderer: Features	10-7
Workflow Renderer: Legend	10-9
Workflow Renderer: Tabs	10-11
Workflow Renderer: Provisioning Tab	10-12

Workflow Renderer: Reconciliation Tab 10-13
Workflow Renderer: Service Account Tab 10-14
Workflow Renderer: User Event and Org Event Tabs 10-15
Workflow Renderer: Resource Event Tab 10-16
Workflow Renderer: Form Event Tab 10-17
Oracle Identity Manager Connector: Components 10-18
Building an Oracle Identity Manager Connector 10-20
Step 1: Creating an IT Resource Type 10-21
Step 2: Defining an IT Resource 10-23
Step 3: Creating a Custom Process Form 10-25
Step 4: Building the Process Task Adapter 10-30
Building the Process Task Adapter: Top-Level Information 10-31
Building the Process Task Adapter: Adapter Variables 10-32
Building the Process Task Adapter: Adapter Tasks 10-34
Building the Process Task Adapter: Compiling the Adapter 10-36
Step 5: Defining a Resource Object 10-37
Step 6: Creating a Provisioning Process 10-38
Step 7: Creating a Process Task 10-41
Step 8: Attaching an Adapter to a Process Task 10-43
Using an Oracle Identity Manager Connector 10-44
Step 1: Assigning a Connector to a User 10-45
Step 2: Completing a Custom Process Form 10-47
Step 3: Accessing the Resource 10-49
Summary 10-50
Practice 10 Overview: Provisioning User Resources Manually 10-51

11 Provisioning User Resources Automatically

Objectives 11-2
Types of Provisioning 11-3
Manual Provisioning 11-4
Autoprovisioning 11-5
Modifying an Oracle Identity Manager Connector 11-6
Step 1: Modifying the Provisioning Process 11-8
Step 2: Building the Prepopulate Adapter 11-11
Building the Prepopulate Adapter: Top-Level Information 11-12
Building the Prepopulate Adapter: Adapter Variables 11-13
Building the Prepopulate Adapter: Adapter Tasks 11-14
Building the Prepopulate Adapter: Compiling the Adapter 11-15
Step 3: Creating a Prepopulate Rule 11-16
Step 4: Assigning the Prepopulate Adapter and Rule to Process Form Fields 11-18
Using an Oracle Identity Manager Connector 11-21

Step 1: Assigning a Connector to a User 11-22
Step 2: Accessing the Resource 11-24
Summary 11-25
Practice 11 Overview: Provisioning User Resources Automatically 11-26

12 Expanding the Provisioning Workflow

Objectives 12-2
Deleting a User's Account: Overview 12-4
Step 1: Building the Process Task Adapter 12-5
Building the Process Task Adapter: Top-Level Information 12-6
Building the Process Task Adapter: Adapter Variables 12-7
Building the Process Task Adapter: Adapter Tasks 12-9
Building the Process Task Adapter: Compiling the Adapter 12-11
Step 2: Creating a Process Task 12-12
Step 3: Attaching an Adapter to a Process Task 12-15
Step 4: Deleting a User's Account 12-16
Step 5: Accessing the Resource 12-18
Summary 12-19
Practice 12 Overview: Expanding the Provisioning Workflow 12-20

13 Approving the Provisioning Workflow

Objectives 13-2
Approval Processes 13-3
Expanding the Functionality of a Connector 13-6
Step 1: Modifying a Connector's Access Policy 13-8
Step 2: Creating an Approval Process and Task 13-10
Step 3: Creating Organization and User Records 13-13
Step 4: Creating a Request 13-14
Step 5: Completing the Approval Process 13-16
Step 6: Accessing the Resource 13-18
Summary 13-19
Practice 13 Overview: Approving the Provisioning Workflow 13-20

14 Understanding Reconciliation

Objectives 14-2
Reconciliation and Provisioning 14-4
Reconciliation: Types 14-5
Reconciliation: Events 14-8
Trusted Source Reconciliation: Conceptual Diagram 14-11
Target Resource Reconciliation: Conceptual Diagram 14-12
Building a Reconciliation Workflow: Overview 14-13

Building a Reconciliation Workflow: Step 1	14-17
Building a Reconciliation Workflow: Step 2	14-20
Building a Reconciliation Workflow: Step 3	14-23
Building a Reconciliation Workflow: Step 4	14-25
Building a Reconciliation Workflow: Step 5	14-28
Building a Reconciliation Workflow: Step 6	14-31
Building a Reconciliation Workflow: Step 7	14-34
Building a Reconciliation Workflow: Step 8	14-37
Summary	14-39

15 Performing Reconciliation

Objectives	15-2
Using the Microsoft Active Directory Connector: Overview	15-4
Using the Microsoft Active Directory Connector: Verifying Requirements	15-6
Using the Microsoft Active Directory Connector: Configuring the External Resource	15-7
Using the Microsoft Active Directory Connector: Copying Files	15-8
Copying Connector Files: Microsoft Active Directory	15-10
Copying External Code Files: Microsoft Active Directory	15-16
Using the Microsoft Active Directory Connector: Configuring Oracle Identity Manager Server	15-17
Configuring Oracle Identity Manager Server: Clearing the Server Cache	15-18
Configuring Oracle Identity Manager Server: Enabling Logging	15-19
Importing the Microsoft Active Directory Connector	15-20
Using the Microsoft Active Directory Connector: Recompiling Adapters	15-22
Building a Reconciliation Workflow	15-24
Step 1: Creating an IT Resource Type	15-28
Step 2: Defining an IT Resource	15-30
Step 3: Importing a Reconciliation Class	15-33
Step 4: Modifying a Resource Object	15-34
Step 5: Defining a Scheduled Task	15-36
Step 6: Defining Reconciliation Rules	15-38
Step 7: Modifying a Provisioning Process	15-41
Reconciling with a Trusted Source	15-45
Summary	15-48
Practice 15 Overview: Performing Reconciliation	15-49

16 Creating Reports

Objectives	16-2
Operational, Historical, and Exception Reports: Overview	16-3
Accessing Operational, Historical, and Exception Reports	16-4
Operational Reports	16-5

Historical Reports 16-8
Exception Reports 16-10
Other Reports: Types 16-11
Creating a User Resource Access Operational Report 16-13
Creating a Resource Access List Operational Report 16-14
Creating a User Resource Access History Historical Report 16-15
Creating a Resource Access List History Historical Report 16-16
Configuring Oracle Identity Manager to Display Exception Reports 16-17
Creating a Rogue Accounts By Resource Exception Report 16-18
Summary 16-19

17 Understanding and Using Attestation Processes

Objectives 17-2
Attestation 17-4
Attestation Processes 17-5
Attestation Process: Users 17-6
Attestation Process: Data 17-8
Attestation Process: Schedule 17-9
Attestation Process: Workflow 17-11
Configuring an Attestation Process 17-13
Installing Oracle Identity Manager Server 17-16
Configuring the Process Form 17-17
Assigning a Manager to a User 17-18
Assigning Menu Items to User Groups 17-19
Assigning Administrative Privileges and Permissions for User Groups 17-22
Creating an Attestation Process 17-24
Stage 1: Defining High-Level Information 17-26
Stage 2: Defining User Scope 17-27
Stage 3: Defining Resource Scope 17-28
Stage 4: Defining Administrative Details 17-29
Stage 5: Verifying Information 17-31
Stage 6: Assigning Groups 17-32
Reviewer Actions for an Attestation Process 17-33
Reviewing an Attestation Process 17-34
Process Owner Actions for an Attestation Process 17-36
Viewing an Attestation Process 17-37
Summary 17-39
Practice 17 Overview: Understanding and Using Attestation Processes 17-41

18 Customizing the Oracle Identity Manager Administrative and User Console

- Objectives 18-2
- Levels of Customization 18-3
- Configuring Oracle Identity Manager 18-4
- Modifying the `global-web-application.xml` File 18-6
- Modifying the `orion-web.xml` File 18-7
- Modifying the `server.xml` File 18-8
- Copying the `_oracle_jsp_xlWebApp.jar` File 18-9
- Clearing the Web Browser Cache 18-10
- Branding the Console 18-11
- Changing Console Functionality 18-12
- Customizing the Overall Layout of a Web Page 18-13
- Adding Logos 18-15
- Modifying Text and Labels 18-16
- Customizing Colors, Font, and Alignment of Text 18-19
- Customizing the Self-Registration Process 18-21
- Customizing Form Field Behavior 18-23
- Customizing Menu Items for User Groups 18-25
- Customizing Search Pages 18-28
- Summary 18-30
- Practice 18 Overview: Customizing the Oracle Identity Manager Administrative and User Console 18-31

19 Customizing Oracle Identity Manager by Using Java APIs

- Objectives 19-2
- Application Programming Interfaces (APIs) 19-4
- Using the Oracle Identity Manager APIs: Advantages 19-5
- Utility Classes 19-6
- Utility Classes: Examples 19-7
- Factory Class 19-8
- Factory Class: Advantages 19-9
- Factory Class: Scenarios 19-10
- Result Set Interface 19-11
- Result Set Interface: Methods 19-12
- Expanding the Functionality of a Connector 19-14
- Task Assignment Adapters 19-16
- Step 1: Building the Task Assignment Adapter 19-20
- Building the Task Assignment Adapter: Top-Level Information 19-21
- Building the Task Assignment Adapter: Adapter Variables 19-22
- Building the Task Assignment Adapter: Adapter Tasks 19-24
- Building the Task Assignment Adapter: Compiling the Adapter 19-26

Step 2: Creating the Lookup Definition	19-27
Step 3: Creating the User-Defined Field	19-29
Step 4: Attaching the Adapter to the Process Task	19-31
Step 5: Creating User Groups	19-33
Step 6: Creating Users	19-34
Step 7: Creating a Request	19-36
Step 8: Completing the Approval Process	19-38
Step 9: Accessing the Resource	19-40
Summary	19-41
Practice 19 Overview: Customizing Oracle Identity Manager by Using Java APIs	19-43

20 Transferring Oracle Identity Manager Connectors

Objectives	20-2
Deployment Manager: Overview	20-3
Transferring Oracle Identity Manager Connectors: Ways	20-6
Transferring Oracle Identity Manager Connectors: Advantages	20-8
Transferring Oracle Identity Manager Connectors: Best Practices	20-9
Exporting Oracle Identity Manager Connectors	20-13
Summary	20-15
Practice 20 Overview: Transferring Oracle Identity Manager Connectors	20-16

Appendix A: Practices and Solutions

Appendix B: Oracle Identity and Access Management Products: Overview
