Table of Contents

About This Course	Preface-xiii
Course Goals.....	Preface-xiii
Topics Not Covered.....	Preface-xv
How Prepared Are You?.....	Preface-xvi
Introductions	Preface-xvii
How to Use Course Materials	Preface-xviii
Conventions.....	Preface-xix
Typographical Conventions.....	Preface-xx
Additional Conventions.....	Preface-xxi
Introducing Fundamental Architectural Concepts.....	1-1
Objectives.....	1-1
Relevance.....	1-2
Additional Resources	1-3
Challenges of Enterprise Applications	1-4
What Is Software Architecture?	1-5
Justifying the Need for Software Architecture	1-6
An Architect's Roles, Responsibilities, and Deliverables.....	1-10
The Architect's Involvement	1-10
The Architect's Responsibilities.....	1-11
Deliverables of the Architect	1-13
Architect and Other Team Members.....	1-17
Architecture Modeling Using UML	1-20
Class Diagrams.....	1-20
Interaction Diagrams.....	1-21
Component Diagrams	1-22
Deployment Diagram.....	1-23
Package Diagrams.....	1-24
Architecture and Design	1-25
Differences Between Architecture and Design.....	1-25
Common Principles Between Architecture and Design....	1-26
Architectural Patterns.....	1-27
The SunTone Architecture Methodology	1-29
The SunTone AM Cube.....	1-29
Characteristics of the SunTone AM.....	1-32

Understanding Systemic Qualities.....	2-1
Objectives	2-1
Relevance.....	2-2
Additional Resources	2-3
Examining Systemic Qualities.....	2-4
Systemic Quality Categories.....	2-4
Impact of Dimensions on Systemic Qualities	2-6
Common Practices for Improving Qualities	2-10
Introducing Redundancy to the System Architecture	2-10
Evaluating Replication Strategies and Selection Criteria	2-14
Improving Performance and Throughput.....	2-16
Improving Availability.....	2-18
Improving Extensibility and Flexibility	2-19
Improving Security	2-19
Improving Scalability	2-22
Prioritizing Quality-of-Service Requirements	2-23
System Design Considerations	2-23
Rank QoS Requirements Based on the Business Domain	2-24
Rank QoS Requirements Based on Customer Expectation.....	2-25
Review Quality Estimates With Stakeholders	2-27
Revise QoS Values	2-28
Inspecting QoS Requirements for Trade-Off Opportunities	2-29
Identifying Invariant Requirements.....	2-29
Comparing Remaining Requirements for Trades-Offs	2-29
Student Work Aids	2-30
Examining System Architecture Development Heuristics and Guidelines.....	3-1
Objectives	3-1
Relevance.....	3-2
Additional Resources	3-3
Identifying Key Risk Factors	3-4
System Flexibility	3-4
Network Communication and Layout.....	3-4
Transaction Model	3-5
Security Model.....	3-5
System Sizing and Planning	3-6
Designing a Flexible Object Model.....	3-7
Describing the Architecture with Abstractions	3-7
Applying Object-Oriented Principles	3-8
Applying Patterns.....	3-11
Using Reliable Frameworks	3-17
Using a Service-Based Architecture	3-18

Describing Network Communication Guidelines	3-21
Definition of Terms.....	3-21
Network Performance Guidelines.....	3-21
Distributed Computing Fallacies That Impact	
Quality-of-Service Requirements.....	3-22
Creating a Network Model.....	3-23
Constructing Efficient Data Models	3-26
Justifying the Use of Transactions	3-29
When Are Transactions Required?.....	3-29
Why Are Transaction Models Difficult to Derive?	3-30
Types of Transactions.....	3-31
What Is the Impact of Transactions on Latency and Request	
Frequency?	3-31
Guidelines for Creating the Transaction Model.....	3-36
Planning System Capacity	3-42
Estimating Transaction Load	3-43
Estimating Transaction Rate.....	3-43
Estimating Client Load.....	3-44
Sizing a System.....	3-45
Planning Scalability	3-46
Developing an Architecture for the Client Tier	4-1
Objectives	4-1
Additional Resources	4-3
Overview of the Client Tier	4-4
Client Tier Development Roles.....	4-5
Graphic Artist.....	4-5
Interface Designer	4-5
Information Architect.....	4-6
Information Architecture Client Tier Concerns.....	4-7
User Analysis.....	4-7
Usage Analysis	4-7
User Interface Design	4-9
Usability, User Acceptance, and Prototyping.....	4-10
Data Density	4-11
Accessibility	4-11
Selecting User Interface Devices	4-13
Resource Limitations	4-13
Human Input Devices	4-13
Selecting User Interface Technologies	4-16
Desktop Graphical User Interface Technologies	4-16
Desktop Web Browser Technologies	4-17
Mobile Graphical User Interface Technologies	4-19
Client Side Adaptation.....	4-24
Multiserving.....	4-25
Web Browser Technology Best Practices.....	4-26

Discovering Reusability in the Client Tier	4-33
User Interface Design Patterns.....	4-33
Third-Party Web Service APIs	4-33
Deployment Strategies for the User Interface.....	4-35
Installation Utilities.....	4-35
Java Web Start	4-35
Application Client Container	4-36
Security Concerns in the Client Tier.....	4-37
Input Data Validation.....	4-37
Code Injection.....	4-37
Developing an Architecture for the Web Tier	5-1
Objectives	5-1
Additional Resources	5-3
Overview of the Web Tier.....	5-4
Web Tier Development Roles.....	5-5
Web Designer	5-5
Web Developer	5-5
Information Architect	5-5
Separation of Concerns	5-6
Presentation Concerns.....	5-7
Templating the Layout View.....	5-7
Compositing the View.....	5-9
View Generation	5-9
Previewability.....	5-10
Data Concerns	5-12
Session State Management	5-12
Input Data Validation.....	5-12
Internationalization and Localization.....	5-13
URL and Content Management.....	5-16
Searchability.....	5-16
Control and Logic Concerns.....	5-17
Model View Controller	5-17
Filtering	5-19
Web Flow	5-19
Comparing Web Tier Frameworks.....	5-20
Page Request-Oriented Frameworks	5-21
Component-Oriented Frameworks	5-22
Providing Security in the Web Tier	5-23
Scaling the Web Tier	5-25
Clustering.....	5-25
Session Persistence.....	5-27
Load Balancing.....	5-27
Single System Image.....	5-28

Developing an Architecture for the Business Tier	6-1
Objectives	6-1
Additional Resources	6-2
Enterprise Application Container Services	6-3
Concurrency Services	6-4
Transaction Services	6-4
Security Services.....	6-4
Instance Pooling Services.....	6-5
Messaging Services	6-5
Naming Services.....	6-5
Instrumentation Services	6-6
Persistence Services	6-6
Architecting Domain-Model Services	6-7
Synchronous Communication with Session Beans	6-7
Asynchronous Communication with Message Driven Beans	6-9
Java Naming and Directory Interface Servers	6-11
Using Rules Engines	6-12
Using Workflow Engines.....	6-13
Architecting Domain-Model Entities	6-14
Using Entity Classes as Domain Value Objects.....	6-15
Mapping Domain Value Objects to XML	6-17
Distributing Domain Model Components	6-18
The Component Distribution Golden Hammer	6-18
Creating Coarse Grained Façades	6-19
Development Best Practices	6-20
HttpSession Compared to Stateful Session Beans.....	6-20
Error Handling	6-20
Logging.....	6-22
Developing an Architecture for the Integration and Resource Tiers	7-1
Objectives	7-1
Relevance.....	7-2
Additional Resources	7-3
Examining Enterprise Information System Integration	7-4
The Integration Tier	7-5
The EIS Resource Tier.....	7-7
Data Resources	7-7
Operational Resources	7-8
Resource Servers	7-9
Reviewing Java Integration Technologies.....	7-11
The JDBC API and Object-Relational Mapping Mechanisms	7-11
JMS API and MDBs.....	7-13
J2EE Connector Architecture Connections.....	7-15

Java Web Service Technologies.....	7-17
Comparing Integration Technologies	7-19
Applying Integration Tier Patterns	7-23
Data Access Objects (DAO)	7-23
Web Service Broker.....	7-24
Examining Service-Oriented Architecture (SOA)	7-25
What Is SOA?.....	7-25
SOA, Web Services, and Java EE Technology.....	7-26
SOA Best Practices	7-27
Designing Services.....	7-27
Integration-Level Guidelines.....	7-28
SOA Governance.....	7-30
Developing a Security Architecture	8-1
Objectives	8-1
Relevance.....	8-2
Additional Resources	8-3
Analyzing the Impact of Security in Distributed Computing.....	8-4
Securing the Network Services	8-4
Securing the Hosting Environment.....	8-5
Securing Applications	8-5
Common Security Architectural Principles	8-5
Costs and Benefits of Security Features.....	8-9
Resolving Trade-Off Items in Security.....	8-9
Examining Security in the Java EE Technology	8-11
Defining Java EE Security Terminology.....	8-11
Authentication.....	8-11
Authorization	8-13
Data Confidentiality and Integrity	8-14
Declarative and Programmatic Security.....	8-15
Understanding Web Services Security.....	8-19
XML Signature.....	8-20
XML Encryption.....	8-22
Web Service Security (WS-Security).....	8-23
Web Services Security and Java EE	8-25
Evaluating the Software Architecture	9-1
Objectives	9-1
Relevance.....	9-2
Additional Resources	9-3
Evaluating Software Architectures.....	9-4
Characteristics of a Good Architecture.....	9-4
Architecture Evaluation Guidelines.....	9-5
Evaluating Java EE Technologies	9-6
Designing for Long-Term Application State.....	9-6
Managing Client Session State	9-10
Enabling Business Process and Workflow Control.....	9-14

Enabling Presentation Process and Workflow Control.....	9-16
Managing Presentation Layout.....	9-18
Designing for Asynchronous Communication.....	9-20
Creating System Prototypes	9-24
Prototypes Based on Patterns.....	9-24
Prototype Validation for Standards Conformance	9-24
Prototype Testing.....	9-25
Measuring QoS Capabilities of System Prototypes	9-25
Judging the Prototypes Against Architectural Goals	9-27
Defining Application Server Selection Criteria	9-30
Evaluating Application Server Selection Criteria	9-31
UML 2 Quick Reference	A-1
What Is New in UML 2	A-1
UML Basics	A-2
General Elements	A-3
Classifiers	A-3
Stereotypes.....	A-3
Keywords	A-4
Annotations.....	A-5
Constraints.....	A-6
Object Constraint Language (OCL).....	A-6
Tagged Values	A-10
Profiles.....	A-10
Frame notation	A-11
UML 2 Diagrams.....	A-13
Classifying UML 2 Diagrams.	A-13
Class Diagram.....	A-14
Association.....	A-20
Component Diagram.....	A-26
Interfaces and Components.....	A-27
Object Diagram.....	A-32
Composite Structure Diagram	A-34
Deployment Diagram.....	A-37
Package Diagram	A-38
Activity Diagram.....	A-40
New in UML 2	A-44
Use Case Diagram.....	A-51
State Machine Diagram	A-52
Interaction Diagrams	A-54
Communication Diagram	A-55
Sequence Diagram	A-57
Timing Diagram	A-62
Interaction Overview Diagram.....	A-64
Acronyms.....	Acronyms-1
Glossary	Glossary-1
