About This Course	Preface-xiii
Course Goals.....	Preface-xiii
Course Map.....	Preface-xiv
Topics Not Covered.....	Preface-xvi
How Prepared Are You?.....	Preface-xvii
Introductions	Preface-xviii
How to Use Course Materials	Preface-xix
Conventions.....	Preface-xx
Icons	Preface-xx
Typographical Conventions	Preface-xxi
Additional Conventions.....	Preface-xxii
Introduction to Java EE	1-1
Objectives	1-1
Additional Resources	1-2
Introducing the Java Platform, Enterprise Edition (Java EE)	1-3
Java EE Specifications.....	1-3
Implementation of the Specification	1-5
Java EE 6 Software Development Kit (Java EE 6 SDK).....	1-5
Java EE Components and Applications.....	1-6
Examining the Java EE Application Architecture	1-7
Examining the Component-Container Architecture.....	1-7
Java EE Platform Components.....	1-8
Examining the Container-Component Architecture.....	1-9
Component Packaging	1-10
Packaging Requirements	1-11
Application Deployment	1-11
Application Execution.....	1-11
Examining Java EE Container Services.....	1-13
Deployment-Based Services	1-13
Inherent Services	1-13
Vendor-Specific Functionality.....	1-14
API-Based Services	1-14
Examining the EJB Component Types.....	1-18

What Are Enterprise JavaBeans?	1-18
JavaBeans and Enterprise JavaBeans	1-18
Characteristics of Enterprise JavaBeans.....	1-19
Types of Enterprise JavaBeans	1-19
Comparing Java EE Application Development And Traditional Development	1-20
Examining the EJB Application Creation Process.....	1-21
Choosing Between EJB and Other Technologies.....	1-24
Reviewing the Java EE Platform.....	1-28
Implementing EJB Session Beans	2-1
Objectives	2-1
Additional Resources	2-2
Understanding the Session Bean Layout.....	2-3
What Is a Session Bean?	2-3
Types of Session Beans.....	2-3
Session Bean Annotation Types.....	2-3
Characteristics of a Session Bean	2-4
Session Bean Clients	2-5
Stateless Session Beans.....	2-5
Stateful Session Bean	2-7
Singleton Session Bean	2-9
Choosing a Session Bean Type.....	2-10
Creating Session Beans: Essential Tasks.....	2-12
Declaring a Business Interface for the Session Bean	2-12
Annotating the Business Interface.....	2-13
Implementing the Business Interface.....	2-16
Annotating the Session Bean Class	2-17
No-Interface Implementation.....	2-18
Session Bean Packaging and Deployment	2-20
EJB Deployment Artifacts.....	2-20
Packaging Requirements	2-20
Creating a Session Bean Component Archive	2-21
Deploying a Session Bean Component Archive.....	2-22
Reviewing EJB Session Beans.....	2-23
Accessing Session Beans	3-1
Objectives	3-1
Additional Resources	3-2
Naming Services in the Component Model.....	3-3
JNDI API	3-4
Configuring the <code>InitialContext</code> Object.....	3-5
Performing JNDI Lookups.....	3-7
Resource Injection.....	3-8
JNDI and EJB Components.....	3-9
Traditional JNDI Registration	3-9
Global JNDI Registration	3-9

Developing Session Bean Clients.....	3-12
Client Communication With a Session Bean	3-12
Session Bean Client Reference Types.....	3-13
Determining the Type of Client.....	3-13
Steps to Create a Session Bean Client.....	3-14
Creating a Stand-Alone Client	3-15
Application Client Containers	3-15
Application Client Container Development Steps.....	3-15
Creating a Client Without Using Container Services	3-16
Creating a Session Façade.....	3-18
Dependency Injection of a Session Bean.....	3-18
Context Lookup of a Session Bean	3-19
Reviewing Session Beans	3-22
Advanced Session Bean Concepts	4-1
Objectives	4-1
Additional Resources	4-2
Analysis of the EJB Component Model	4-3
Role of the EJB Container.....	4-3
Types of EJB Containers.....	4-3
Understanding EJB Component Characteristics	4-6
EJB Component Characteristics	4-6
Session Bean Identity.....	4-6
Examining the Session Bean Life Cycle	4-8
Session Bean Life Cycle.....	4-8
Common Session Bean Life Cycle Transitions	4-9
Stateless Session Bean Life Cycle.....	4-10
Stateful Session Bean Life Cycle	4-11
Defining Life Cycle Event Handlers	4-15
Life Cycle Callback Method Rules	4-15
Asynchronous Communication.....	4-17
Synchronous Communication.....	4-17
Asynchronous Communication.....	4-17
Asynchronous Session Beans	4-18
Implementing Asynchronous Session Beans.....	4-18
Dealing With Future Results	4-19
Advanced Configuration and Deployment	4-21
Configuration Through Annotations.....	4-21
Configuration through Deployment Descriptors.....	4-22
Example of a DD for an Enterprise Bean.....	4-23
Reviewing Advanced Session Bean Concepts.....	4-25
Singleton Session Bean.....	5-1
Objectives	5-1
Additional Resources	5-2
Examining a Singleton Session Bean.....	5-3
Singleton Session Bean.....	5-3

Creating a Basic Singleton	5-3
Examining the Singleton Session Bean Life Cycle	5-5
Common Session Bean Life Cycle Transitions	5-5
Singleton Session Bean Life Cycle	5-5
Singleton Initialization Strategies	5-6
Startup Initialization Dependencies	5-7
Examining Singleton Concurrency	5-9
What Is Concurrency?	5-9
Singleton Concurrency	5-9
Types of Concurrency	5-10
Container Managed Concurrency	5-10
Concurrency Timeouts	5-12
Bean-Managed Concurrency	5-13
Reviewing Singleton Session Beans	5-14
Developing Java EE Applications Using Messaging.....	6-1
Objectives	6-1
Additional Resources	6-2
Java Messaging System Overview	6-3
Java Messaging System	6-3
Messaging Concepts	6-3
JMS Components.....	6-5
Administered Objects.....	6-7
Connection Factories	6-8
Destinations	6-9
Messaging Clients.....	6-12
Session	6-12
Message Producers	6-13
Message Consumers	6-14
Messages.....	6-16
Header	6-16
Properties	6-17
Body	6-18
Creating a Message Queue Producer.....	6-19
Queue Message Producer Code Example	6-20
Creating a Synchronous Message Queue Consumer	6-22
Synchronous Queue Consumer Code Example	6-23
Reviewing JMS API Technology.....	6-25
Developing Message-Driven Beans	7-1
Objectives	7-1
Additional Resources	7-2
Introducing Message-Driven Beans	7-3
Limitations of EJB Components as Messaging Clients.....	7-3
Types of Message-Driven Beans	7-4
Perspectives on Message-Driven Beans.....	7-4
Creating JMS Message-Driven Beans.....	7-6

Life Cycle of a Message-Driven Bean.....	7-6
Implementing the Message-Driven Bean	7-8
Inheritance-Based Implementations.....	7-8
Convention-Based Implementation	7-9
Message Processing	7-10
Exception Processing.....	7-11
Life Cycle Event Handlers	7-12
Configuring the Message-Driven Bean.....	7-14
Destination Configuration.....	7-14
Message Acknowledgement.....	7-15
Message Selectors.....	7-15
Reviewing Message-Driven Beans	7-16
Using Timer Services	8-1
Objectives	8-1
Additional Resources	8-2
Introducing Timer Services	8-3
Timer Functionality	8-3
Timer Notification.....	8-3
Creating a Timer Callback Notification.....	8-5
Examining Types of Timers.....	8-5
Non-interval Notification Timers	8-5
Interval Notification Timers.....	8-7
Calendar-Based Schedule Timers.....	8-8
Creating a Timer Object	8-9
Processing a Timer Callback Notification Object.....	8-12
Creating Timer Handler: Implementing <code>TimedObject</code>	
Interface.....	8-12
Creating Timer Handler: Using <code>Timeout</code> Annotation.....	8-13
Creating Timer Handler: Using <code>@Schedule</code> Annotation ..	8-14
Guidelines for Coding Timer Handler Method.....	8-14
Managing Timer Objects.....	8-16
Interrogating a Timer Callback Notification.....	8-16
Obtaining a List of Outstanding Timer Notifications.....	8-18
Canceling a Timer	8-18
Reviewing The Timer Service	8-19
Implementing Interceptor Classes and Methods.....	9-1
Objectives	9-1
Additional Resources	9-2
Introducing Interceptors	9-3
Aspect-Oriented Programming	9-3
Enterprise JavaBeans Interceptors.....	9-4
Types of Interceptors.....	9-4
Interceptor Life Cycle	9-5
Implementing Interceptors	9-6
Invocation Context.....	9-6

Implementing Business Method Interceptors.....	9-6
Implementing Life Cycle Callback Interceptors.....	9-8
Implementing Timeout Interceptors	9-10
Interceptor Chaining	9-10
Step-by-Step Examples.....	9-13
Creating a Business Method Interceptor	9-13
Creating a Business Method Interceptor Class.....	9-14
Creating a Life Cycle Callback Interceptor	9-15
Reviewing Interceptors	9-17
Implementing Transactions	10-1
Objectives	10-1
Additional Resources	10-2
Introducing Transaction Demarcation Management	10-3
Transaction Demarcation Task	10-3
Selecting a Transaction Demarcation Policy	10-5
Implementation Options for Transaction Demarcation....	10-6
Using Container Managed Transactions	10-8
CMT Attributes	10-8
Implementing CMT	10-14
Interacting Programmatically With Ongoing CMT.....	10-16
Getting or Setting the Rollback Status During CMT	10-16
Enabling a Stateful Session Bean Instance to Monitor CMT.....	10-18
Using BMT	10-22
Restrictions on Transaction Demarcation Policies BMT .	10-24
Applying Transactions to Messaging	10-29
Examining Transactions and JMS API Messages.....	10-29
Applying Transactions to Message-Driven Beans	10-30
Implementing Security	11-1
Objectives	11-1
Additional Resources	11-2
Understanding the Java EE Security Architecture.....	11-3
Authenticating the Caller.....	11-6
Establishing User Identities.....	11-6
Caller Authentication	11-9
Examining the Java EE Authorization Strategies.....	11-11
Using Declarative Authorization.....	11-13
Declaring Security Roles	11-13
Declaring Method Permissions.....	11-14
Declaring Security Identity.....	11-17
Using Programmatic Authorization.....	11-21
Using the <code>isCallerInRole</code> Method.....	11-21
Using the <code>getCallerPrincipal</code> Method.....	11-25
Examining an Example of the DD Security Section.....	11-27

Examining the Responsibilities of the Deployer	11-29
Reviewing the Java EE Application Security Tasks	11-30
Using EJB Technology Best Practices.....	12-1
Objectives	12-1
Additional Resources	12-2
Defining Best Practices	12-3
Benefits of Applying Best Practices.....	12-3
Java EE Perspective of Exceptions.....	12-5
Application Exceptions	12-5
System Exceptions	12-8
Examining the Exception Path	12-11
Container Exception Handling	12-12
Handling Exceptions in Enterprise Bean Methods	12-17
Handling Application Exceptions in Bean Client Code..	12-20
Design Patterns	12-26
Java EE Design Patterns	12-26
Java EE Application Design Decisions.....	12-30
Matching the EJB Components to the Tasks	12-30
Maintaining Session-Specific Data	12-33
Minimizing Network Traffic	12-34
Introducing Transactions	A-1
Additional Resources	A-2
Examining Transactions.....	A-3
Types of Transactions.....	A-5
Transaction-Related Concurrency Issues	A-9
Handling Distributed Transactions.....	A-13
Two-Phase Commit	A-14
Java Transaction API (JTA).....	A-15
Integrating With Legacy Systems	B-1
Additional Resources	B-2
Introducing Integration With Legacy Systems.....	B-3
Examining the EIS Connectivity Module	B-4
Requirements.....	B-4
Implementation Alternatives	B-6
Examining JCA Resource Adapters	B-10
Resource Adapter System Contracts.....	B-10
Application Contract	B-11
Using the CCI API Interfaces	B-12
Creating the ConnectionSpec Object	B-16
Using the ConnectionFactory Object.....	B-17
Using the Connection Object	B-18
Using the Interaction Object.....	B-19
Examining a CCI Example.....	B-21
Using an MDB Resource Adapter: An Example	B-23

Integrating With Legacy Systems Using CORBA	B-26
Examining Interoperability Between EJB and CORBA	B-27
Accessing an Enterprise Bean With a CORBA Client.....	B-28
Accessing a CORBA EIS From an EJB Component.....	B-30
Quick Reference for UML	C-1
Additional Resources	C-2
UML Basics	C-3
General Elements	C-6
Packages	C-6
Stereotypes.....	C-8
Annotation	C-8
Constraints	C-9
Tagged Values	C-9
Use Case Diagrams	C-10
Class Diagrams.....	C-11
Class Nodes.....	C-11
Inheritance	C-14
Interface Implementation.....	C-15
Association, Roles, and Multiplicity	C-16
Aggregation and Composition	C-17
Association Classes.....	C-18
Other Association Elements	C-21
Object Diagrams	C-22
Collaboration Diagrams.....	C-24
Sequence Diagrams.....	C-26
Statechart Diagrams.....	C-28
Transitions.....	C-29
Activity Diagrams.....	C-30
Component Diagrams	C-34
Deployment Diagrams	C-36
