# Contents

## **1 Introduction**

- Overview 1-2
- Course Goals 1-3
- Course Agenda: Day 1 1-4
- Course Agenda: Day 2 1-5
- Course Agenda: Day 3 1-6
- Course Agenda: Day 4 1-7
- Course Agenda: Day 5 1-8
- Introductions 1-9
- Your Learning Center 1-10
- Your Lab Environment 1-11

## **2 Installing Oracle Solaris 11 by Using an Interactive Installer**

- Objectives 2-2
- Workflow Orientation 2-3
- Lesson Agenda 2-4
- Importance of Working from a Plan 2-5
- Planning for an Oracle Solaris 11 OS Installation 2-6
- Identifying Network Configuration Options 2-8
- Installation Process 2-9
- Methods for Installing an Oracle Solaris 11 Operating System 2-10
- Differences Between LiveCD GUI and Text Installers 2-11
- Identifying Pre-installation Tasks 2-12
- Identifying System Requirements 2-13
- Identifying Additional Installation Considerations 2-14
- Checking Device Drivers 2-15
- Quiz 2-16
- Lesson Agenda 2-19
- Installing Oracle Solaris 11 Using an Interactive Installer 2-20
- Preparing for the Installation 2-21
- Performing the Installation 2-22
- Installing Oracle Solaris 11 by Using the LiveCD with GUI Installer 2-23
- Introducing the LiveCD Desktop 2-25
- Initiating the Installation with LiveCD 2-26
- Welcome Screen 2-27

Selecting a Disk 2-28  
Setting the Time Zone, Date, and Time 2-29  
Providing User Information 2-30  
Reviewing Installation Specifications 2-31  
Monitoring the Installation 2-32  
Verifying the Installation 2-33  
Reviewing the Installation Log 2-34  
Rebooting the System 2-37  
Login Screen 2-38  
Practice 2-1 Overview: Installing Oracle Solaris 11 by Using the GUI Installer on the LiveCD 2-39  
Installing Oracle Solaris 11 by Using the Text Installer 2-40  
Initiating the Installation with Text Installer 2-41  
“Welcome to Oracle Solaris” Screen 2-42  
Selecting a Disk 2-43  
Selecting an Fdisk Partition 2-44  
Selecting a Network 2-45  
Manually Configuring the Network 2-46  
DNS Name Service 2-47  
Alternate Name Service 2-48  
Selecting the Time Zone: Regions 2-49  
Setting the Time Zone: Locations 2-50  
Selecting the Time Zone 2-51  
Setting the Date and Time 2-52  
Providing User Information 2-53  
Reviewing Installation Summary 2-54  
Monitoring the Installation 2-55  
Verifying the Installation 2-56  
Reviewing the Installation Log 2-57  
Rebooting the System 2-58  
Login Screen 2-59  
Practice 2-2 Overview: Installing Oracle Solaris 11 Using the Text Installer 2-60  
Lesson Agenda 2-61  
Verifying the Operating System Installation 2-62  
Checking the Login Username 2-63  
Checking the Login Password 2-64  
Using the First Time Login Assistant (LiveCD GUI) 2-65  
Selecting a Login Session (LiveCD GUI) 2-66  
Selecting a Language (LiveCD GUI) 2-67  
Accessing a Terminal Window from Gnome (LiveCD GUI) 2-68  
Verifying the Host Name 2-69

- Displaying Basic System Information 2-70
- Displaying a System's Release Information 2-71
- Displaying Disk Configuration Information 2-72
- Displaying Disk Configuration Information: Format Menu 2-73
- Displaying Disk Configuration Information: Partition Table 2-74
- Displaying Installed Memory Size 2-75
- Displaying Information About Network Services 2-76
- Displaying Network Interface Information 2-77
- Baseline System Information Commands: Summary 2-78
- Practice 2-3 Overview: Verifying the Operating System Installation 2-79
- Summary 2-80

### **3 Updating and Managing Software Packages**

- Objectives 3-2
- Workflow Orientation 3-3
- Lesson Agenda 3-4
- Planning for an Oracle Solaris 11 OS Software Update 3-5
- Software Update Plan 3-6
- Software Update Process: Overview 3-7
- Installing and Managing Packages 3-10
- Updating the Operating System 3-11
- Introducing Boot Environments 3-12
- New Boot Environment Creation: Example 3-13
- Introducing Boot Environments 3-14
- Introducing the IPS Interfaces 3-15
- Implementing the Software Update Plan 3-16
- Quiz 3-17
- Lesson Agenda 3-20
- Updating the Oracle Solaris 11 Operating System 3-21
- Performing the Update with the Command-Line Interface (CLI) 3-22
- Performing the Update with Package Manager 3-23
- Monitoring the Update with Package Manager 3-26
- Rebooting the System 3-27
- Practice 3-1 Overview: Verifying Access to the IPS Server 3-28
- Lesson Agenda 3-29
- Managing Software Packages 3-30
- Listing Package State Information with the CLI 3-31
- Displaying Package Information with the CLI 3-33
- Displaying the Contents of a Package with the CLI 3-34
- Updating an Installed Package with the CLI 3-35
- Installing a Package with the CLI 3-36

Viewing an Installation Action Without Installing with the CLI 3-37  
Verifying a Package Installation with the CLI 3-38  
Searching for a Package with the CLI 3-39  
Uninstalling a Package with the CLI 3-40  
Package Management Commands: Summary 3-41  
Managing Packages with Package Manager 3-42  
Displaying Package Information with Package Manager 3-46  
Displaying the Files of a Package with Package Manager 3-47  
Displaying Package Dependency Information with Package Manager 3-48  
Displaying Package Notices with Package Manager 3-49  
Displaying Package Versions with Package Manager 3-50  
Installing and Updating a Package with Package Manager 3-51  
Verifying a Package Installation with Package Manager 3-52  
Uninstalling a Package with Package Manager 3-53  
Practice 3-2 and Practice 3-3 Overview: Managing Software Packages by Using the  
Command-Line Interface and Package Manager 3-54  
Lesson Agenda 3-55  
Administering Boot Environments 3-56  
Listing the Boot Environments on the System 3-57  
Creating a New Boot Environment with beadm 3-58  
Renaming an Existing, Inactive Boot Environment with beadm 3-59  
Destroying an Existing, Inactive Boot Environment with beadm 3-60  
Activating an Existing, Inactive Boot Environment with beadm 3-61  
Verifying the New Boot Environment 3-62  
Managing Boot Environments with Package Manager 3-63  
Renaming an Existing, Inactive Boot Environment with Package Manager 3-64  
Deleting a Boot Environment with Package Manager 3-65  
Activating an Existing, Inactive Boot Environment with Package Manager 3-66  
Practice 3-4 Overview: Administering Boot Environments 3-67  
Summary 3-68

#### **4 Administering Services**

Objectives 4-2  
Workflow Orientation 4-3  
Lesson Agenda 4-4  
Planning for Oracle Solaris 11 Services Administration 4-5  
Service Management Facility 4-6  
What Is a Service? 4-7  
Identifying a Service Instance in SMF 4-9  
Service Configuration Repository 4-10  
SMF Master Restarter Daemon (svc.startd) 4-11

Run Levels 4-13  
SMF Milestones 4-14  
Oracle Solaris Boot Design 4-15  
Boot PROM for SPARC Systems 4-16  
Boot PROM Initialization Sequence 4-17  
BIOS and GRUB Initialization Sequence for x86 Systems 4-19  
Boot Process 4-20  
How Oracle Solaris Boot Archives Are Managed 4-22  
Implementing the Services Administration Plan 4-23  
Quiz 4-24  
Lesson Agenda 4-26  
Administering SMF Services 4-27  
Listing Services Information 4-28  
Displaying the Status of a Service Instance 4-29  
Identifying Service States 4-30  
Setting Up Service State Transition Notifications 4-31  
Installing the smtp-notify Package 4-32  
Enabling the smtp-notify:default Service 4-33  
Configuring Service State Transition Notifications 4-34  
Service State Transition Notification: Example 4-35  
Managing Service State Transition Notifications 4-37  
Displaying the Service Dependents 4-38  
Displaying the Dependencies of a Service 4-39  
Disabling a Service 4-40  
Enabling a Service 4-41  
Refreshing and Restarting a Service 4-42  
Practice 4-1 and Practice 4-2 Overview: Administering Services and Administering SMF Notifications 4-43  
Lesson Agenda 4-44  
Booting a System 4-45  
Booting a SPARC-Based System 4-46  
Booting a SPARC System to Run Level 3 (Multiuser-Server Milestone) 4-47  
Booting a SPARC System to Run Level S (Single-User Milestone) 4-48  
Booting an x86 System 4-49  
Booting an x86 System to Run Level 3 (Multiuser-Server Milestone) 4-50  
Booting an x86 System to Run Level S (Single-User Milestone) 4-51  
Fast Reboot 4-52  
Initiating a Fast Reboot of a SPARC-Based System 4-53  
Initiating a Fast Reboot of an x86-Based System 4-54  
Shutting Down a System 4-55  
Determining Who Is Logged In to a System 4-56

Shutting Down a Server 4-57  
Shutting Down a Stand-Alone System 4-59  
Practice 4-3: Booting and Shutting Down the System 4-60  
Summary 4-61

## **5 Setting Up and Administering Data Storage**

Objectives 5-2  
Workflow Orientation 5-3  
Lesson Agenda 5-4  
Planning for Data Storage Management 5-5  
What Is ZFS? 5-6  
ZFS Storage Pools 5-7  
ZFS File Systems 5-8  
ZFS Snapshots 5-9  
ZFS Clones 5-10  
Determining Your ZFS Storage Pool Requirements 5-11  
ZFS Storage Pool Components 5-12  
ZFS Storage Pool Components: Disks 5-13  
ZFS Storage Pool Components: Slices 5-15  
ZFS Storage Pool Components: Files 5-16  
ZFS Storage Pool Components: Virtual Devices 5-17  
Virtual Devices and Dynamic Striping 5-18  
ZFS Storage Pool Data Redundancy 5-21  
Mirrored Storage Pool Configuration: Examples 5-22  
RAID-Z Storage Pool Configuration: Examples 5-23  
Determining ZFS File System Configuration Requirements 5-24  
Identifying Data Backup and Restore Requirements 5-26  
Implementing the Data Storage Management Plan 5-27  
Quiz 5-28  
Lesson Agenda 5-31  
Creating ZFS Storage Pools 5-32  
Creating a Basic Storage Pool 5-33  
Determining Local Storage Disk Availability 5-34  
Creating a Mirrored Storage Pool 5-35  
Creating a RAID-Z Storage Pool 5-36  
Default Mount Point for Storage Pools 5-37  
Destroying a ZFS Storage Pool 5-38  
ZFS Storage Pool Properties 5-39  
Displaying Pool Properties 5-40  
Querying ZFS Pool Status 5-43  
Displaying Basic Pool Usage Information 5-44

- Displaying Specific Pool Statistics 5-45
- Viewing Pool I/O Statistics 5-47
- Determining the Health Status of a Pool 5-50
- Displaying Pool Command History 5-56
- Quiz 5-57
- Practice 5-1 Overview: Administering ZFS Storage Pools 5-62
- Lesson Agenda 5-63
- Administering ZFS File Systems 5-64
- Creating a ZFS File System 5-65
- Destroying a ZFS File System 5-67
- Renaming a ZFS File System 5-69
- Querying ZFS Properties 5-72
- ZFS Properties 5-73
- Types of Native ZFS Properties 5-74
- Identifying Native ZFS Properties 5-75
- Listing Basic ZFS Information 5-76
- Mounting and Unmounting ZFS File Systems 5-78
- Mounting ZFS File Systems 5-79
- Unmounting a ZFS File System 5-81
- Quiz 5-82
- Practice 5-2 Overview: Administering ZFS File Systems 5-85
- Lesson Agenda 5-86
- Administering ZFS Snapshots and Clones 5-87
- Creating a ZFS Snapshot 5-88
- Destroying a ZFS Snapshot 5-90
- Displaying a ZFS Snapshot 5-91
- Snapshot Space Accounting 5-93
- Creating a ZFS Clone 5-95
- Relationship of Clone and Snapshot 5-96
- Destroying a ZFS Clone 5-97
- Quiz 5-98
- Practices 5-3 and Practice 5-4 Overview: Administering ZFS Snapshots and Clones and Administering ZFS Pools with Disk Slices 5-99
- Summary 5-100

## **6 Administering Oracle Solaris Zones**

- Objectives 6-2
- Workflow Orientation 6-3
- Lesson Agenda 6-4
- Planning for Oracle Solaris Zones 6-5
- Oracle Solaris Zone Technology: Overview 6-6

Zones Server Consolidation: Example 6-7  
Oracle Solaris Zones: Requirements and Restrictions 6-8  
Global and Non-Global Zones and How They Work 6-9  
Branded Zones 6-10  
Zone IP Network Connectivity 6-11  
Network Virtualization with Zones 6-12  
Resource Management 6-13  
Zone Resource Management 6-14  
Allocating System Resources to a Zone 6-16  
Non-Global Zone Configuration Process: Overview 6-17  
Identifying Non-Global Zone States 6-19  
Implementing the Oracle Solaris Zones Plan 6-21  
Quiz 6-22  
Lesson Agenda 6-26  
Determining an Oracle Solaris Zone Configuration 6-27  
Displaying the Current Zones Configuration on the System 6-28  
Determining the Current Zone Configuration 6-29  
Displaying a Zone Configuration 6-30  
Displaying Zone Network Information 6-32  
Determining a Zone's Resource Utilization 6-33  
Quiz 6-35  
Practice 6-1 Overview: Determining an Oracle Solaris Zone's Configuration 6-37  
Lesson Agenda 6-38  
Administering an Oracle Solaris Zone 6-39  
Delegated Administration for Zones 6-40  
Logging In to a Zone 6-41  
Exiting a Non-Global Zone 6-42  
Shutting Down a Non-Global Zone 6-43  
Starting Up a Zone 6-44  
Halting a Zone 6-45  
Quiz 6-46  
Practice 6-2: Administering an Oracle Solaris Zone 6-48  
Summary 6-49

## **7 Administering a Physical Network**

Objectives 7-2  
Workflow Orientation 7-3  
Lesson Agenda 7-4  
Planning for Network Management 7-5  
TCP/IP Protocol Architecture Model 7-6  
How TCP/IP Handles Data Communications 7-9

Networking Stack 7-10  
IPv4 Addressing 7-12  
IPv6 Addressing 7-14  
Unicast, Multicast, and Broadcast Addressing 7-16  
Subnets, Netmasks, and Subnet Masks 7-17  
Implementing the Network Management Plan 7-18  
Quiz 7-19  
Lesson Agenda 7-22  
Determining Datalink Availability 7-23  
Determining Which Physical Links Are Available 7-24  
Determining Which Datalinks Are Available 7-25  
Verifying That the Network Service Is Running 7-27  
Lesson Agenda 7-28  
Configuring a Network Interface 7-29  
Displaying Network Interface Configuration Information 7-30  
Displaying Network Interface IP Address Information 7-31  
Creating a Network Interface 7-32  
Assigning an IP Address to the Network Interface 7-33  
Verifying the IP Address Assignment 7-34  
Lesson Agenda 7-35  
Administering a Network Interface 7-36  
Taking Down a Network Interface 7-37  
Bringing Up a Network Interface 7-38  
Deleting an IP Address for a Network Interface 7-39  
Deleting a Network Interface 7-40  
Summary of ipadm Commands 7-41  
Practice 7-1 Overview: Manually Configuring the Network Interface 7-42  
Lesson Agenda 7-43  
Verifying Network Operation 7-44  
Checking Connection to the DNS Server 7-45  
Examining the Status of All Network Interfaces 7-46  
Checking Network Connectivity and Response Times 7-50  
Checking Network Interface Traffic Status 7-51  
Quiz 7-52  
Practice 7-2: Verifying Network Operation 7-53  
Summary 7-54

## **8 Setting Up and Administering User Accounts**

Objectives 8-2  
Workflow Orientation 8-3  
Lesson Agenda 8-4

Planning for User Administration 8-5  
Types of User Accounts 8-6  
Main Components of a User Account 8-8  
System Files That Store User Account Information 8-10  
Interpreting the /etc/passwd File 8-11  
Interpreting an /etc/passwd File Entry 8-13  
Interpreting the /etc/shadow File 8-15  
Interpreting an /etc/shadow File Entry 8-16  
Interpreting the /etc/default/passwd File 8-18  
Interpreting the /etc/group File 8-20  
Interpreting an /etc/group File Entry 8-22  
Implementing the User Administration Plan 8-23  
Quiz 8-24  
Lesson Agenda 8-26  
Setting Up User Accounts 8-27  
Gathering User Information 8-28  
Creating the User Accounts Default File 8-29  
Modifying the User Accounts Default File 8-31  
Adding a Group 8-32  
Adding a User Account 8-33  
Verifying the User Account Setup 8-35  
Verifying User Account Creation in the /etc/passwd File 8-36  
Verifying User Account Creation in the /etc/shadow File 8-37  
Verifying User Account Creation in the /etc/group File 8-39  
Setting a Password to Expire Immediately 8-40  
Lesson Agenda 8-42  
Maintaining User Accounts 8-43  
Modifying a User Account 8-44  
Deleting a User Account 8-46  
Modifying a Group Entry 8-47  
Deleting a Group Entry 8-48  
User Account Management Commands: Summary 8-49  
Practice 8-1 and Practice 8-2 Overview: Setting Up and Maintaining  
User Accounts 8-50  
Lesson Agenda 8-51  
Managing User Initialization Files 8-52  
Oracle Solaris 11 Shell Features 8-53  
Working with the bash and ksh93 Shells 8-54  
Initialization Files 8-56  
System-Wide Initialization Files 8-57  
Viewing the Default /etc/profile Site Initialization File 8-58

Viewing the Default `/etc/.login` Site Initialization File 8-60  
Modifying the System-Wide Initialization Files 8-62  
User Initialization Files 8-63  
Customizing the User's Work Environment 8-65  
Accessing the Initialization File Templates 8-66  
Setting Environment Variables in the User Initialization Files 8-67  
Practice 8-3: Managing User Initialization Files 8-68  
Lesson Agenda 8-69  
Using Shell Metacharacters and Configuring User Disk Quotas 8-70  
Using Shell Metacharacters 8-71  
Using the Tilde (~) Character 8-72  
Using the Dash (-) Character 8-73  
Using the Asterisk (\*) Character 8-74  
Using the Question Mark (?) Character 8-75  
Using the Bracket ([]) Characters 8-76  
Configuring User Disk Quotas 8-77  
Setting Quotas for ZFS File Systems 8-78  
Setting and Displaying a User Quota 8-79  
Displaying General Space Usage 8-80  
Identifying Individual User Space Usage 8-81  
Removing User Quotas 8-82  
Practice 8-4: Exploring Shell Metacharacters and User Quotas 8-83  
Summary 8-84

## **9 Controlling Access to Systems and Files**

Objectives 9-2  
Workflow Orientation 9-3  
Lesson Agenda 9-4  
Planning for System and File Access Control 9-5  
Controlling Access to Systems 9-6  
Login and Password Security 9-7  
Password Algorithms and the `/etc/security/policy.conf` File 9-8  
`/etc/security/crypt.conf` File 9-9  
Superuser Limiting and Monitoring 9-10  
Controlling Access to Files 9-11  
File Types 9-12  
UNIX File Permissions 9-13  
Interpreting File Permissions 9-14  
Special File Permissions 9-15  
File Permission Modes 9-17  
Setting File Permissions in Symbolic Mode 9-18

Setting File Permissions in Absolute Mode 9-19  
Setting Special File Permissions in Symbolic or Absolute Mode 9-20  
Oracle Solaris Authentication Services 9-21  
Secure Shell 9-23  
Secure Shell and the Secure Shell Protocol 9-25  
Secure Shell Protocol Version 2: Parts 9-26  
Secure Shell Authentication Methods 9-27  
Host-Based Authentication 9-28  
Identifying the Secure Shell Defaults 9-29  
Secure Shell sshd Daemon 9-30  
Implementing the System and File Access Control Plan 9-31  
Quiz 9-32  
Lesson Agenda 9-38  
Controlling Access to Systems 9-39  
Securing Logins and Passwords 9-40  
Displaying a User's Login Status 9-41  
Displaying Users Without Passwords 9-43  
Disabling User Logins Temporarily 9-44  
Monitoring Failed Login Attempts 9-45  
Monitoring All Failed Login Attempts 9-46  
All Failed Login Attempts: Example 9-48  
Changing the Password Algorithm 9-49  
Changing the Password Algorithm: Example 9-50  
Verifying the Password Algorithm Change 9-51  
Monitoring Who Is Using the su Command 9-52  
Practice 9-1 Overview: Controlling Access to Systems 9-53  
Lesson Agenda 9-54  
Controlling Access to Files 9-55  
Protecting Files with Basic UNIX Permissions 9-56  
Displaying File Permissions 9-57  
Changing File Ownership 9-58  
Changing Group Ownership of a File 9-59  
Changing File Permissions in Symbolic Mode 9-60  
Changing File Permissions in Absolute Mode 9-61  
Setting Special File Permissions in Absolute Mode 9-62  
Protecting Against Programs with Security Risk 9-64  
Finding Files with Special File Permissions 9-65  
Disabling Programs from Using Executable Stacks 9-67  
Practice 9-2: Controlling Access to File Systems 9-68  
Lesson Agenda 9-69  
Configuring and Using Secure Shell 9-70

Configuring Secure Shell	9-71
Enabling Host-Based Authentication	9-72
Verifying That Users Have Access on Both Hosts	9-73
Configuring Secure Shell	9-74
Logging In to a Remote Host with Secure Shell	9-75
Generating the Public/Private RSA Key Pair	9-76
Copying the RSA Public Key to the Remote Host	9-77
Verifying That the RSA Public Key Is Functioning	9-79
Generating the Public/Private DSA Key Pair	9-80
Copying the DSA Public Key to the Remote Host	9-81
Verifying the Authentication Process	9-82
Using the Secure Shell	9-83
Reducing Password Prompts	9-84
Locking and Unlocking the Authentication Agent	9-85
Practice 9-3: Configuring and Using Secure Shell	9-86
Summary	9-87

## **10 Managing System Processes and Scheduling System Tasks**

Objectives	10-2
Workflow Orientation	10-3
Lesson Agenda	10-4
Planning for System Processes Management	10-5
System Processes	10-6
Parent and Child Processes	10-7
Viewing the Parent/Child Process Relationship	10-8
Identifying the Process Subsystems	10-9
Identifying the Process States	10-10
Managing and Controlling Processes	10-11
Terminating Unwanted Processes	10-12
Scheduling Routine System Administration Tasks	10-14
Interpreting the crontab File Format	10-15
Displaying the Default root cron File	10-16
Introducing the crontab Files	10-18
Introducing the Default cron.deny File	10-19
Implementing the System Process Management Plan	10-20
Quiz	10-21
Lesson Agenda	10-24
Managing System Processes	10-25
Listing System Processes	10-26
Displaying Information About Processes	10-29
Displaying Active Process Statistics	10-30

Stopping and Starting a System Process 10-33  
Stopping and Starting a System Process: Example 10-34  
Killing a Process 10-35  
Process Management Commands: Summary 10-36  
Practice 10-1 Overview: Managing System Processes 10-37  
Lesson Agenda 10-38  
Scheduling System Administration Tasks 10-39  
Scheduling Repetitive System Tasks 10-40  
Scheduling Repetitive System Tasks: Example 10-42  
Administering crontab Files 10-43  
Removing a crontab File 10-44  
Denying crontab Command Access 10-45  
Limiting crontab Access to Specified Users 10-46  
Practice 10-2: Scheduling System Tasks 10-47  
Summary 10-48

## **11 Performing Basic System Monitoring and Troubleshooting**

Objectives 11-2  
Workflow Orientation 11-3  
Lesson Agenda 11-4  
Monitoring System Logs 11-5  
syslogd Daemon 11-6  
/etc/syslog.conf File 11-7  
Interpreting the /etc/syslog.conf File Selector facility Field 11-8  
Interpreting the /etc/syslog.conf File Selector level Field 11-10  
Interpreting the /etc/syslog.conf File Action Field 11-11  
Monitoring a syslog File in Real Time 11-12  
Interpreting System Messages 11-13  
Lesson Agenda 11-15  
What Is a Core File? 11-16  
Core File Generation: Advantages and Disadvantages 11-17  
Lesson Agenda 11-18  
Crash Dump Process: Overview 11-19  
How and Where Crash Dump Files Are Saved 11-20  
Crash Dump: Example 11-21  
Lesson Agenda 11-22

Core Dump Process: Overview 11-23  
How and Where Core Dump Files Are Saved 11-24  
Core Dump: Example 11-25  
Quiz 11-26  
Practice 11 Overview: Performing Basic System Monitoring and  
Troubleshooting 11-32  
Summary 11-33
